a free space for free beings, neither state nor nation

the land we live on, is not, was not and will never be
property of one or of a group of human beings

property is theft

all land, water and air belongs to mother earth what
is a sentient living being in her own self, sovereign
over herself

same with every human, animal and tree being ... all
living beings what participate in the water and air
circulation, what take up liquids and gases and release
them again ... we all are part of that global biotope
where we all are in constant exchange with each other

therefore not even these flesh and bone bodies we
walk around in, we use as a vessel for our souls
to experience the material dense level of existance
can be called "ours", they are just on loan given
to us for a certain time, a little longer if we take
good care of it, a little shorter if we choose to
overdo things

if not even a human, animal, tree being can call
its flesh and bone or wooden costume its own as of
our all constant gas and liquid exchanges ... we all
constantly leaking and needing to replenish the
gas and liquid storage levels ... smile

if not one living being can truly think of its
body as its own property then certainly not one
human being or a group of human beings can own
the body or a human, animal and or tree being

the most logical consequence from these moral
ethical impossibilities to own anything alive
as everything what lives is in constant
exchange with all other living things

it would be, seen from my perspective,
that if we human beings occupy a certain amount
of land to grow plant food on it, to build
houses on it ... that we would allow everyone
human being to have a direct acess to it,
no conditions attached, no requirements asked

a most simple life where every human being
would build its own house using clay and straw,
hempstalks and sticks found on the floor of the
forest
and around the house built with ones own hands
one would plant ones own vegan food
to cook and to warm ones home in the winter,
one would burn the hemnpstalks one planted
as hemp has a one year lifecycle and it makes
much more sense to use a plant what naturally
dies in the winter and therefore save the trees
from being killed but let them tree friends live
and live and live many hundreds if not thousands
of years so they could bless us in old age
with their multicentenarian wisdom

a free space for free beings, neither state nor nation
where human animal tree beings not harm each other
nor kill nor enslave one another but seek to
support each other to live long and well

perhaps it was the roman empire, what started
to disturb the tribal harmony in europe,
perhaps it was even before the authoritarian
hierarchical trend within human beings
societies what caused some human beings
to think that they were entitled, chosen by
celestial entities to take more than they needed
to take the very ground away from others and
cause their live without acess to an own home
and garden to be a life full of misery and
dependance onto others

around 2000 years ago mother mary was forced
to risk both her and the unborn jesus life
when she was made to travel to her birth place
to be counted, to register her person for the
roman empire to know how much taxes it could
coerse from the dominated province of judaea

since then or perhaps even before ... the group
of human beings using the state vessel, using
that costume of the organisation called state
to assert a sovereignity over not only all land
but also to attempt to controll every human
being, animal and tree living or born on this
land

no newborn baby was ever asked by its parents
if it wanted to be given a name and no mother
or father has a choice wether to register
a newborns arrival on planet earth with
the state birth registry

the state backed by military and police violent
power demands of every parent to deliver the
information when where whom got born

as to fabricate that birth certificate, which
serves as the foundation for all the other
papers, documents, licences, titles
issued by the state permitting human beings
to do things they naturally would need no
permission for

its all a very bad case of spoiled fiction
a horror story in the making now since at least
2000 years if not more

how to get out of the controll grip the
group of all adult human beings forming the state
is harassing most every single human being with

ask and it shall be provided

this concept i got from the christian theology

might also be applicable regarding worldly
matters

so i imagine a moment where one or many human beings
would adress the group of human beings cloaking
themselves in the costume of the state and

ask or even demand of the state

that every human being who no longer
wants to be member of this or that regional
or national state

is allowed to exit quit leave both regional and
nation state membership, become stateless

the main argument being that a membership in an
association is only valid when both entry and
exit is a voluntary choice

amd the second part of the asking to be released
out of that control grip the state is so immoraly
harassing the single individual with

the second part of a demand the chains to be taken
off the human being would be that for every human being
who no longer is a member of this or that regional
and nation state

1000 square meters of fertile soil and 1000 square meters
of forest

would be released too out of the assertion of the state
sovereignity

so that every stateless human being could plant some vegan
foodstuff on sosme stateless land, build with ones own hand
some modest hut using clay and straw, hempstalk and wooden sticks
collected from the forest ground

the asking or the the demand being that both
the birth certificate, the entry into the state birth registry
database be deleted, extinguished permanently together with
the title of that 1000 m2 of fertile soil and 1000 m2 of forest
for each human being no longer member of any state

its not so easy to imagine how it could feel, for the first time

after several thousand years
a human being standing on the earth both woman/man/? and land
not encaged anymore by any state demands
no one claiming ownership over this or that
no one asserting to be the sovereign over an other one
but the human being connecting in love and friendship
to the very land

where love and friendship are, rules need not be ...

very well possible, that human beings living each one
on a patch of land growing vegetables, fiddling around
on that clay hut, weaving clothes of hemp and nettle
fibres ... would not feel any need to form any organisation
or structure how to engage with each other but simply would
gather when there is anything concerning the people
living near to each other

and in such a gathering, perhaps the love and friendship
one now is able to live to the land and to ones fellow
human animal tree beings ... now that no more demands
of a state are harassing the single human being

very well posible to think of that circle of equals
coming to form itself spontaneously, what the french
revolution aspired more than 200 years ago

libertee, fraternitee, egalitee

liberty/freedom, sisterbrotherhood, equality

all children, youth and adult human beings who live
here and now as permanent residents acknowledging
each others same weighted voting power, everyone
who raises its voice to be heard and its concerns
be taken up by the group of neighbours, a decision

to be made in the spirit of consensus aspired,
a sollution to be found for a conflict
where everyone involved agrees to it wholeheartedly

i dont know if i ever will be so courageous to send a letter
to the regional cantonal state i live in and the nation state of switzerland
in that area it occupies i am born within some 46 years ago

i am thankfull now arriving in the middle of my lifespan
to have understood these basic truths of how no one can
have any moral or ethical foundation to demand anything
of anyone, to control anyone

what this is all about is not wether me is hero material
or cowardish hiding behind the screen and typing on and
on repeating the same stuff for years and years

what this is about, this compilation of texts i wrote
during the last half year or so ...

its about nurturing a light, feeding hope, supporting
a wanting, a wanting to be truly free from every attempt
of anyone controlling oneself

wether it takes one year or seven or twenty till we
as a human species start reforming the very basic
foundation how we treat each other via the state vessel

its important to think about these topics and it honors
everyone who is investing itself into the believe for a
better tomorrow

the following texts i gather here are all having
more or less the topic of the birth certificate
and the assertion of ownership over land

how writing and drawing could grow into online gaming worlds
especially setup to experiment how life could be in a free space for free beings, neither state nor nation ... eventually using blockchain tools to help people find each other and possibly pool finances preparing offline realisation
short version of the stuff i wrote below:
what do i want :
1) a free space for free beings, neither nation nor state
a space where all four, human, animal, tree and the very land as a being are free, no one, not a human being nor a group of human beings such as a company or a regional / nation state claiming to have authority to controll the land, the human, animal, tree beings on it
human beings what are not coersed into association to this or that regional/nation state by birth certificates, land what is not asserted to be under the sovereignity of a regional/nation state
2) a regional/national state constitution what delegates/inherits all political decision powers to the local community what is its own

absolute political sovereign, the circle of equals, all chilrden, youth and adult permanent residents of a neighbourhood, village, town, city-district acknowledging each others same weighted political voting power to create, maintain and interprete the full law valid on the territory of the local community, all members of the local community inviting each other to participate in all communal decision finding processes
in many modern nation states there are legal tools such as people initiative and citizens referendum what allow voting eligible adults today to collect signatures from each other and thisway demanding a public vote on any law proposal and or reform/renewal of the state constitution
how do i want to get there:
a) i want to continue to write texts explaining the advantages of both scenarious, or copy parts of the texts i allready wrote into newly upcoming scenarious, me reacting to whats going on in forums, social media, political daily news cycle
b) i want to continue to either draw with my own hands or ask fellow drawing artist friends if they would want to interprete my writings and continue to fill the website 8interpretations.net with graphical novel like text/picture collages
c) i want to explore the blockchain space what is not connected to bitcoin and ethereum, i would like to continue experimenting minting nfts ... packing my artstuff into the nft costume and offer it at various marketplaces what are built on top of proof of stake blockchains such as for example eos where i have now several items up for auction https://eos.atomichub.io/profile/loveheals.gm#listings
d) i want to explore the possibilities what for example the fairchain offers
https://www.fairkom.eu/en/fairchains
https://github.com/FairChains/fairchains
how the most efficient and least electricity consuming transaction validation protocol proof of cooperation could possibly be employed to create a game environment similar to nft-games and or marketplaces for digital goods such as texts, images, videos what not necessarily need to operate with fixed sale prices or auctions but could also be built on a donation level

the main aim of such a freespacecoin or freebeingscoin (a free space for free beings, not state nor nation, human and animal and tree beings not kill each other, not enslave each other but live together in rule-less/ absent friendship and love)
or
sovereigncommunitycoins (every local community is its own absolute political sovereign, all children, youth and adult permanent residents of a local sovereign community acknowledge each others same weighted political voting power and invite each other to participate in all communal decision finding processes)
the main aim of such experiments with crypto coins based on proof of cooperation transaction validation protocols or using proof of stake blockchains ... could be to allow people to spend some serious time role playing trough the possibilities of radical political change or otherwise looked at it, prepare themselves for a future when these devellopments will swap over from the internet into offline non-digital life
also possible to devellop pool of finances by creating and selling nft art dedicated to radical (non-violent) political change, the very nft-gaming how it could be to live in that free space for free beings, how it could happen to become existing, what would be a possible scenario how a regional and nation state would let go one or many human beings who would ask to be released from membership in that state and with it 1000 m2 of fertile soil and 1000 m2 of forest too be released out of the regional/nation state controll grip, its assertion of sovereignity over land exploring in a sort of nft-game what could life be when all political decisions are found by the circle of equals, all who live here and now acknowledging each others same weigthed voting power
just yesterday i saw a virtual land property nft-game, possible to think of a free space for free beings virtual reality game where all players constantly adjust and adapt to each others wishes and desires,needs and likes, the rules being made up as we go respecting everyones issues and concers
very well possible that friendships come to exist trough such global virtual gaming experiences, possible that people want to pool finances of any sort together for those perhaps who really would want to go for in offline life, write letters to the regional and nation state asking

demanding for both the human being and some land being released out of birth certificate and title to land control grip, possibly finances be used to employ legal experts who could take a class action suit against the regional and nation state to court
and or friendships come to exist with finances to be staked for the tedious work of collecting signatures from fellow citizens for popular initiatives demanding public votes to change the law and renew the states constitution
---
this morning i wake up with the wish to train myself today in making a video with subtitles what have texts in it i wrote to explain the idea of free beings in a free space, neither nation nor state
that video or animated gif i could then package into an nft item and publish it either at eos.atomichub.io or voice.com at them nft marketplaces
this idea builds up on top of my plan i have since 2019 allready or even earlier to make a movie out of one of the writing projects what i have asked fellow drawing artists to interprete my vision with their illustrations ... i am continuing to publish graphic novel like collages at 8interpretations.net
all materials in the public domain as i have done consequently during the last 20 or so years
in 2022 my main goal is to make such a movie with subtitles or and voice over of texts i wrote and speak myself, use some of the music i asked some fellow composer to create, these materials too are in the public domain at archive.org original music composed for the inner heart interpretation
at this moment i am waiting for the second part of the drawings for the todo suave project of which i have allready published the first part of the drawings and my script writings at archive.org/details/preparativos ... and as soon as i receive the graphical materials i want to build up the movie on, i will possibly start to speak the voice over, eventually also using voice modulation applications
while i am waiting, i could also make some of my texts and drawings i did in 2018 of the amua story into such a animated gif and or movie, the materials all in the public domain at archive.org/details/drawingstudies

but ... this morning now i was thinking in direction of ... nft for charity, nft for good, nft games, creating a crypto coin what could be a global currency what would allow people to experiment both in a gamelike relaxed atmosphere but also perhaps build up some finances for legal expenses, for example if some people wanted to file a class action suit against this or that regional or nation state about the very act of forcing every mother and every father to deliver informations about that newborn baby they received ... to the state authorities so they could fabricate that birth certificate, make an entry into the regional and nation state birth registry database, an entry what will be the foundation of all the future humiliations and control moments the state exercises its police and military backed threat of violence power with towards the individual human being

i know its not easy to imagine adressing the regional and nation state to ask or demand for ones very own birth certificate to be deleted, extinguished, ones record in the states birth registry deleted permanently and together with ones own release from the membership in that state, also to ask or to demand for 1000 square meters of fertile soil and 1000 square meters of forest to be released too out of the control grip of the state, the title to that land and forest too being burned, the entry in the digital land registry being deleted permanently so that from this day on the human being who no longer wants to be member of this or that regional or nation state, no longer wants to buy or rent land as not one square centimeter of land can ever be property of a state or any other group or individual human being ... but the now stateless human being seeks to live with the land, grow ones own vegan foodstuff in it, grow hempstalks to burn in the winter and in the cooking fire so that no tree needs to die, no tree gets felled as it makes much more sense to use a plant for heating and building purposes ... the stalks of the hemp plant ... what needs only one year to grow into maturity and leave them trees in the forest grow as old as they can get what is several hundred if not thousand years old

i have been thinking about this since many years now, how to create a game in what people could meet each other anonymously and test it out, how could it be if we come together and try to live such an ideal society where the ideal of everyone is well and happy is trying to be reached via ...

ahh i am starting to loose it again
because i have them two ideas now mixed up in my head ...the one where i imagine how free beings live in a free space, neither nation nor state ... where the land has been released by the regional and nation state and the human beings living on it too are no more bound to the rules and laws of regional and nation states as they too have been released out of that control grip of the state what finds its expression in all them documents the state issues ... identification papers / documents / plastic card ... permits to drive a vehicule, to operate a business, to buy and sell wares sent from this to an other place or from the other place to this one
and the other idea which i find equally interesting if not a little more practical as a way to get out of the state controll character ... what would be to reform the very character of the state, take away that hierarchical elements what makes nation state dominate the regional state and the regional state makes the local community obey to the laws what both national and regional state have created, to rebuild todays hierarchical decision/law making structure employing political representatives with a future egalitarian inviting every permaent resident child, youth and adult to participate democratic structure where all political decision power would be with the local community and both regional and nation state would only serve as a shell, as a vessel for the many local absolute sovereign communities what each one create their own full law, decide all the rules how they want to interact with each other
i feel that i am not fit engough to create such an nft game based on one or both of the ideas ... i have been able to publish some of my artwork what i have given into the public domain very soon after i created it ... i have been able in the last few days to publish some of my artwork in form of nft items at two nft marketplaces so far
but i might continue to write about it, imagine how it could be if a crypto coin could be created using a blockchain architecture what uses very little amounts of electricity such as for example fair-coin.org, their fairchain architecture open sourced ready for anyone fit enough to customize it ...
https://www.fairkom.eu/en/fairchains
https://github.com/FairChains/fairchains

possible to imagine an nft marketplace built on a fairchain, an nft game built on the fairchain ... creating a special coin named like freespacecoin or freecoin for

https://www.facebook.com/mayloveheal/posts/5335218129835306
28th march 2021

1000 square meters of fertile soil and 1000 square meters of forest
i guess is a space what a human being could make use of to grow its own vegan food, harvest hemp stalks to burn them in the winter and for the cooking fire together with branches picked up from the forest floor
a space where human animal tree beings live together without enslaving each other or wanting to take each others lives but seek to find symbiotic harmonious ways to support each others joyfull lives
a free space for free beings, neither nation nor state
both land and the human being, both animals and trees are not property
property is theft
to declare land property of this or that regional or nation state and or this or that company or private individual person is to ignore the reality that all land allready is part of a sovereign being what is mother earth as well as there are many many living beings living allready in that piece of land what a human being mistakenly believes to be able to posess, the earthworms as well as the myriads of microbeings, bacteria and viruses what too live in the human and animal beings body ... without them little beings living in our intestines we would hardly be able to live, therefore not even our very flesh and bone bodies are ours, they too are connected to all the water and air flow
the very basic foundation of the international law frameworks what the grid of nation states is applying for example in the control of them artificial nation states borders, who is allowed to cross what border carrying what sort of wares with it
its all a fiction, an unnatural complication twisting of the simple existance what knows no separations but understands how all life is

connected to each other
ask and it shall be provided
thinking about this concept of forming a wish or demand and place it
i would like to encourage everyone who is not in agreement with them
regional and nation states asserting sovereignity over land, animals, trees and human beings
to imagine or consider how it would be if one, seven or three hundred thousand human beings would adress the regional and nation state to ask or demand both their very own birth certificates to be deleted, extinguished their entry into the birth registry of the state ... as neither has anyone as a newborn given anyone else the permission to fabricate that birth certificate nor had the parents, father and mother any choice wether or not they would want to register the newborn with the state authorities
to imagine how a single human being or many of us together would ask the regional and nation states to release everyone out of that membership in a regional and nation state who no longer seeks to be member of that state
together with 1000 square meters of fertile soil and 1000 square meters of forest
what too would be asked to be released out of the regional and nation states control grip, to be excluded from that assertion of sovereignity the regional and nation states dominates all land it names as its territory
i believe that such a concept of asking or demanding both birth certificates for human beings and ownership titles for land to be deleted ... together with the acknowledgment that no animal no tree can be owned by any human being nor nation state
i believe such a concept of
a free space for free beings, neither state nor nation
could assist many of us human beings to return back to the simple connection to the very earth our food grows in
but then there is another way too i see what could help too in many regions on this globe to bring more power to the people who live here and now together
the ideal of the circle of equals, all children, youth and adult permanent inhabitants of a local community acknowledging each others same weighted voting power, inviting each other to participate in all

communal decision finding processes, creating together the full law, all rules on the territory of the local community
what the french revolution more than 200 years aspired with
libertee, fraternitee, egalitee
liberty/freedom, sisterbrotherhood, equality
an egalitarian partizipative democracy what requires no representatives and no delegates
but at all time the full assembly of all who live here and now, the full plenum decides all
in the most ideal moment arriving at a consensus, in other perhaps more pressing times a qualified majority would suffice to react to timely processes
in many of todays modern regional and nation states we have the legal tools what would allow us citizens (even if we were never asked if we wanted to be member, citizens of that state or if we would rather be free children of the earth, starchildren, cosmic travellers free to go wherever we need to move towards ...)
legal tools what allow us citizens to collect signatures from each other to demand a public vote what changes the law of the regional and nation state, renews the constitution of this or that regional and nation state
possible to think of such a popular initiative what would renew a states constitution for example using phrases like:
---
the local community (neighbourhood, village, town, city-district ...) is its own absolute political sovereign
it inherits all political decision powers from the regional and nation state
the local sovereign community creates, maintains and interpretes the full law, all rules designed by all children, youth and adult permanent residents acknowledging each others same weighted voting power inviting each other to participate in all communal decision finding processes
all local sovereign communities inherit a fair share of all financial and material wealth of the regional and nation state, the size of the share calculated in proportion to the numbers of permanent residents of a local community
each local sovereign community is able to exit the regional and nation

state at all times without conditions
---
the beauty of such a radical decentralisation of law making powers together with the fair distribution of todays material and financial public wealth... it could translate for example in the space where i live and was born into, a space occupied by the swiss nation state ...
in a future political decision structure where everyone of the more than 2000 local communities in switzerland would receive a fair share of the regional state and national state public wealth
one part of it would be the 55 percent of shares of the swiss national bank what all 26 regional states called cantons own, that financial wealth could be estimated to amount to about 300 billion swiss francs with less than half of that swiss public wealth all fertile soil in switzerland used today for agriculture ... 10 000 million square meters with an estimated market worth of about 100 billion swiss francs... could be bought off their private owners as well as the 13 100 million square meters of forest what a market worth of 30 billion swiss francs could be attributed to
and from there onwards ... a most ideal future scenario could evolve where this and that many of the 2000 local sovereign communities in switzerland would then offer the newly communalized lands to everyone of the 8.4 million people who live today in switzerland
if we wanted, we could even invite another 1.6 million human beings seeking a safe refuge ... to come to us and live with us ... 10 million human beings each one using 1000 square meters of fertile soil to grow its vegan food on it and build a natural house of clay and straw, hempstalks and fallen wooden branches picked up from the forest floor, heat with hempstalks and fallwood, not take the live of one animal nor kill one tree... we could live without using a single drop of fossil fuel or a single watthour of electricity, no machine necessary but our muscles, no television radio or internet needed but our singing and dancing, our self-determined life near the earth excitement enough
a future without compulsory education, without taxes, without drugs forbidden, without drugs pushed onto (vaccine-hysteria ...), a future where solidarity grows from ones own inner wanting and every local community finds its own style of how free human beings could meet each other to define in the very here and now what suits everyone

present how to exchange words, movements, services, wares
where love and friendship is, rules need not be...
---
we could open up all the dams what hinder the free flow of the rivers, take away all them river shore corsetts what stop them to meander ... we could welcome again the wetlands, the natural changing of river beds by setting free some area both sides of all the fast flowing water bodies ... and with the cleaning power of the wild rivers again more revitalization power would help mother earth to connect the mountains with the sea ... while we could enjoy her greater self-healing as blessings when bathing and drinking from the free flowing waters
---

https://www.facebook.com/mayloveheal/posts/5320420501315069
22th march 2022
https://en.wikipedia.org/wiki/Sans-culottes
"The sans-culottes, most of them urban labourers, served as the driving popular force behind the revolution. They were judged by the other revolutionaries as "radicals" because they advocated a direct democracy, that is to say, without intermediaries such as members of parliament."

https://www.facebook.com/mayloveheal/posts/5318760988147687
21th march 2022

i believe in the reality of light beings, persons individuals who have achieved a level of counciousness where they do not need to travel in a dense flesh and bone body but are able to move more smoothly and weave themselves trough the fabric of existance in a beautifull elegance more than 20 years ago i was fascinated by the messages of jasmuheen

and i attempted to follow her recommendations how to become a being who is able to nourish itself from prana, become a breatharian no more needing food or water
i have not achieved it then and today i am in a little bit of an opposite situation than 20 years ago when i was very slim from all the fasting ... today i have 30 to 40 kilogram overweight what i partly blame my both broken ellbows for i caused in a bycicle accident 4 years ago ... luckily no one got hurt except for me when i drove much too fast over a wooden bridge in a forest
and another part of the blame i give to this 2 years of covid-hysteria-tyranny we have been tortured with because of a majority so it seems of people in the industrialised places on earth have more trust in some chemical cocktails mixed up in a laboratory than into their very own body intelligence or immune system to learn what the coronavirus wants to teach us
but beside all the blaming ... i feel that most of all ... i am still not free enough to become that free spirit or free being i want to be
my mind is in the very same way as 20 years ago not believing enough in the ability for every human being to evolve into a lightbeing, to transform this dense flesh and bones body into a more flexible light body
however, beside all my personal failings i still do believe in a magnificient future for humanity, that we before too long will collectivly wake up to a reality of harmony, benevolence and peace
a collective realisation of and for the human species what in one moment leaves behind all the weight and gravity of regret, sorrow, revenge... all the grudges gone but everyone most eager to flow into that timeless spaceless reality of cosmic cooperation
i have tried to express my hope for this golden crystal briliant future in both fantastic stories
at
archive.org/details/8ascendedreamlines
and also in a more political manner at
archive.org/details/dissolving_all_hierarchies
when i envisioned the
circle of equals, all children, youth and adult permanent residents of a local community, a neighbourhood, a village, town, city-district ... to

acknowledge each others same weighted political voting powers and invite each other to participate in all communal decision findings of the local sovereign community
i see a possibility via todays regional and nation states legal tools like people initiatives and citizen referendum that people could collect signatures from each other to demand a public vote for a constitutional reform asking that every local community would be its own absolute political sovereign and thisway abolish the top-down hierarchy of nation state dominates regional state what then forces the local community to obey
more recently i have also been thinking about the fundamental truth of property is theft
by observing the situation that every newborn human being in the industrialised regional and nation states ... receives some very hours after its birth a similar abusive branding / stamping / controll attempt on a soul level ... when a doctor and or an employee of the state fabricate that birth certificate, associate that newborn baby to a membership in this or that regional or nation state without the baby or its mother or father having a say in wether or not the newborn wants to be a member of that regional and or nation state
in the very same way as no newborn baby is asked wether it wants become a member of the state ... not one square centimer of land on this planet has ever been asked or given its permission to become property, being owned by this or that human being or group of us banding together to form this or that regional and nation state
in the very same manner every attempt of domination a human being abuses an animal with ... this so called domestication ... keeping an animal so long under the treat of violence applied untill it stops wanting to flee and accepts its prison as the normal
its wrong and immoral, it causes our collective energy field to vibrate in a way what makes evolving into the light body difficult to achieve
a free space for free beings, neither nation nor state
a free space where human animal and tree beings would want to live together without killing each other or enslaving each other but the human being exercising itself with a vegan diet
i have thought about the wisdom of
ask and it shall be provided

when i have written about the idea in the recent months at https://www.facebook.com/groups/599171354767798
that if one human being or many together, hundreds, thousands, millions of us ... would ask the regional and nation state to release its control grip ... extinguish them birth certificates we have never asked for to be fabricated in the first place, have never asked for a membership in this or that regional or nation state
and with it 1000 square meters of fertile soil and 1000 square meters of forest would be asked for or demanded from the regional and nation states to be released too out of the mental captivity what is the states assertion of sovereignity over land and all the beings living on it
if some of us human beings would be that brave and couragous to stand in front of that seemingly so solid structure of the state and ask demand the enslavement both of human beings and the very land to be ended
we might be able perhaps to create physical zones ... material fields of bodies vibrating in a more relaxed variation of frequencies
with no one wanting to dominate another one, no one thinking of the very land as property but honoring it as part of our mother gaia
at this very moment i am waiting for more drawings what a fellow drawing artist friend wants to send me ... i have published the first part of the drawings and the texts i wrote at archive.org/details/preparativos in this ... todo suave ... fantasy story i have been able to think about a future where the human being could be able to devellop a symbiotic harmonious relationship to bacteria, viruses, funghi, molds, yeasts all sorts of microbeings what potentially could fullfill all the food and clothing and sheltering desires a human being can have ... i described it in that fantasy novel setup as that several generations of lifesuits ... suits made from pouches and tubes acting as bioreactors for the microbeings, the several different microclimates being coordinated by an advanced self aware artificial being what would want to help the human species by detaching itself from the need to farm, to stay in one place but be able to travel continuosly thanks to the lifesuit with its bioreactors fullfilling all the material needs for its human passenger
i described how after several generations of the lifesuit evolving the understanding of the self aware artificial intelligent beings and the microbeings would be such advanced that no more pouches and tubes

would be necessary but the human being would grow long hairs over all its body to be able to provide a home for the microbeings what would want to transform shapeshift perform all functions necessary to provide food and protection against cold and heat to their human host
i am looking forward to artisticly enquire into more beautfull potential existing modalities and i give thanks to all the cosmic family of beings for allowing me to
believe
allowing me to receive the bliss of imaginary inventing innovating thought constructs possibly enabling pathways into a better tomorrow or even have a glimpse into that moment what knows no time and be in that space what needs not a location

https://www.facebook.com/mayloveheal/posts/5311793758844410
19th march 2022
the circle of equals as the goal to strive for ... what the french revolution attempted with its motto ... libertee, fraternitee, egalitee ... liberty/ freedom, sisterbrotherhood, equality ... but since then it did not became a political reality
the circle of equals where all children, youth and adults who live here and now in this local community acknowledge each others same weighted voting power to create the full law, all the rules what are valid on the territory of the local sovereign community, the neighbourhood, the village, the town, the city-district
local self-determination via a participative egalitarian democracy what aims to strive for consensus or at least a qualified majority
it can become a viable alternative to the international law framework what favors the financial investors interests more than those of the local communities inhabitants and the environment
in many modern nation states there are legal tools what allow citizens to collect signatures from each other to demand a public vote on a proposed law and or constitutional reform
replacing todays representative hierarchical democracy with a future participative egalitarian democracy is an achievable aim what could be realised via reform of constitution using simple sentences like for example:

---
the local community (neighbourhood, village, town, city-district ...) is its own absolute political sovereign
it inherits all political decision powers from both the regional and the nation state
the local sovereign community creates its own law, all rules valid on its territory are made by inviting all children, youth and adult permanent residents to participate in all communal decision finding processes
all local sovereign communities inherit a fair share of all financial and material wealth of both the regional and national state, the size of the share in proportion to the number of inhabitants
each local sovereign community is able to exit/quit/leave both the regional and the nation state at all times without conditions
---
but there could also be other avenues to think of, to imagine paths into a future where the whole top-down domination circus could be dissolved by the benevolent ... the people living together here and now as one, all aiming to assist each others fullfillment
one way to think about such a potential future reality
could be to start questioning the very foundation of the regional and nation state what is both the assertion of sovereignity over land and over the living beings using the land
no living being, not a plant, not a tree, not an animal, not a human being can ever be property of anyone, neither of a single being nor a group
therefore the assertion of sovereignity what the regional and nation state puts onto both the very land and the living beings on it ... this assertion of sovereignity of the state is an attempt to control what original is born free
or regarding the land ... is part of an entity like mother earth who is a sovereign being herself
based on this ... property is theft ... principle, knowing that no one can ever posess anything without causing an imbalance
it could be possible that the single human being, or thousands or millions together ... would want to ask and or demand from the regional and nation states
to release all those of us who are sick and tired of being controlled, and

with it some amount of land what we could live on away from all the laws and rules of states but find out in the very moment how we who are here now can find happyness and satisfaction for each of everyons desire
i guess 1000 square meters of fertile soil and 1000 square meters of forest could be a decent amount of land what everyone who no longer wants to be a member of this or that regional and nation state ... could ask or demand of this or that regional state to be released alongside with the extinguishing of ones very own brirth certificate, the permanent erasure of the entry in the state s birth registry
an additional argument being that for a membership in a regional or nation state to be valid, a choice to become member and also to stop being a member ... seems to be important
most human beings are born into a situation where the people around them fabricate that birth certificate and with it the newborns association to this or that regional and nation state ...
to imagine
a free space for free beings, neither nation nor state
where human beings, animal beings and trees could live together without killing and or enslaving each other
where land is respected as the common ground for all to nourish itself from and every meeting between sovereign human animal tree plant beings is regarded as a unique chance to grow in harmony
could be the alternative to the involuntary membership in this or that regional or nation state

https://www.facebook.com/mayloveheal/posts/5285857461438040
9th march 2022

i ask us ... please fellow people living on the european continent ... let us try to imagine for a moment how that could work ... how the same space what has nourished 500 million human beings now for so and such a long time, has given enough to allow us 500 million europeans

to build houses out of that european soil, feed and cloth each other...
let us imagine that we could also feed, clothe and provide housing to 600 million human beings
its actually not that difficult ... if we would all help, it could perhaps be something like 15 percent of our luxurious lifestyle what would need reduction, less than twenty percent of reduction in how ressources we use ... or perhaps even no reduction at all if we would use the ressources more efficient, waste less, import nearly nothing but produce everything we need here and now where we live, use much less energy to import stuff from other continents but mainly use plants grown in europe to eat, make clothes with and build houses with
this would be one very strong exercise we could do on a significant scale
we the 500 million people living on european soil, inviting all the 80 million people all over the world who lost their home, who are refugees to come and live with us on the soil of the european continent
no questions asked, everyone who needs a home can come and find a space in europe, ask with this or that local community for being accepted as a member of this local community
in winter 2017/2018 i wrote about such a scenario in my novel like text written in swiss german mundart
archive.org/details/ichbimir
i tried to imagine how it would be if every village and town and city district in switzerland ... if every one of the more than 2000 local communities could decide at all times to exit/quit/leave both the regional and nation state at all times

https://www.facebook.com/groups/4287952087883813/posts/4634920356520316/

https://www.facebook.com/mayloveheal/posts/5282440178446435
8th march 2022

@mayloveheal@tooting.ch
i believe in the circle of equals
where all permanent resident children, youth and adults of a local

community acknowledge each others same weighted voting power to invite each other designing all the rules, the full law valid on the territory of the local community what is its own political absolute sovereign
1h
i understand that this sort of local communal self-determination could support many people all over the globe to reach a harmonious lifestyle in many modern regional and nation states there are legal tools what allow citizens to collect signatures from each other to demand public votes to change the law / constitution of the state
a reformed constitution of a cantonal / regional / provincial state and or a nation state what would want to empower the local community might use concepts like:
the local community
(neighbourhood/village/town/city-district)
is its own political absolute sovereign
it inherits all political decision powers from cantonal/provincial/regional and nation state
the local sovereign community creates, maintains and interpretes its own full law by inviting all permanent resident children, youth and adults to participate in all decision finding processes exercising each one the same weighted voting power each permanent resident acknowledges with each other
1h
mayloveheal @mayloveheal
all local sovereign communities inherit a fair share of all financial and material property of the regional and nation state, the size of the share in proportion to the number of permanent residents
all local sovereign communities are able to exit/quit/leave the regional and nation state at all times without conditions
these four pillars ...
1 the local community being its own sovereign
2 all permanent residents of all ages invited to participate in all communal decision findings
3 fair distribution of all wealth of the state to its sucessor the local sovereign community
4 the local sovereign community being able to at all time cut its connections to the state

such a toolset i believe could be helpfull when trying to reform the political structure we live in
such a radically decentralised political structure where nearly all hierarchies would be dissolved (there would still be the hierarchy between all of the group and the single member ...) ... such a decentralised structure could for example be helpfull when thinking about what good could be done within the local community once the overarching limiting control of the cantonal/provincial/regional state has been removed ... such as for example to remove all sorts of duties from each other
compulsory education is mental torture crippling young human beings for a lifetime ...
duty to serve in the army too is a highly damaging coersion
duty to pay taxes is the biggest evil of all as it gives rise to an administrational apparatus what sadly is often used against the wishes of those who paid the coersed taxes
in the very same manner is the catalog of forbidden, prohibited to consume substances a deeply disturbing hindrance for the individual human being to maintain its own health
a local community what is its own absolute political sovereign could also for example invite as many refugees as it would want ... i remember having read that 8 swiss cities would want to invite more refugees but both cantonal state and national state were blocking it
the ability to freely travel the globe, not being hindered by anyone, letting each other pass, allowing each other to move to where one feels a need to, for example to flee from violent conflicts ... seems to me very important
in 2018 i was so angry about this swiss nation state supporting the lybian coastguard pushing back people who wanted to travel to europe ... i wrote a fantasy novel in swiss mundart at archive.org/details/ichbimir where i imagined how a local community could exit that nation state to decide for themselves how much solidarity the people who are each others neighbours would want to translate into real actions to welcome refugees
in the space what the nation state switzerland asserts to be the sovereign over ... its a fiction anyway ... not one square centimeter of land ever can be property of a human being nor of a group of human

being ... this whole idea that a state can control all the land is a fiction or a lie ... an invention
the land belongs to itself, it is no ones property but is part of mother earth who is a sovereign being herself
in that space the swiss nation state so ridiculously claims to control ... there are about 10 000 million square meters of fertile soil regularly used for agriculture, also there are about 13 100 million square meters of forest in this area
in this ridiculous system we live in where land is being bought and sold ... a market value of about 100 billion swiss francs could be estimated for all the agricultural land and about 30 billion swiss francs for all the forest
the 26 cantonal states in switzerland together own about 55 percent of the swiss national bank
what could be estimated a public wealth of about 300 billion swiss francs
if we the 5 million adult human beings who are either born here in this swiss branded space or otherwise got that membership in the confederatio helvetica ... if we wanted we could anytime via cantonal people initiatives ask this or that cantonal state to sell its shares with the snb and use the proceeds of the sale to buy as much fertile soil and forest as the private land- and forest owners would want to sell
what could then result in land being bought by the people to be given into the stewardship of the more than 2000 local communities in that swiss nation state ... from where then the local community could if it wanted to decide to offer every single human being living today in this area to use some fertile soil and some forest ... 1000 square meters each i think would be a decent amount ... to sustain oneself, grow ones own vegan foodstuff and pick up some sticks from the forest floor to burn
there are 8.4 million human beings living now in this swiss nation space ... we could easily invite another 1.6 million human beings, for example those who suffer in refugee camps, to come here and live with us
10 million human beings could live here without needing fossil fuel to be imported, not one kilowatthour of electricity to be harvested/ produced as every single one human being or several people in freely

chosen groups could live a humble life wihout machines
but for me this is
a decision what would best be decided within the local community ... that is how i have written about that 3rd pillar of a concept for a radically decentralized constitution ... if the financial and material wealth of both the cantonal/provincial/regional state is fairly distributed to all the local sovereign communities in that area ... every neighbourhood, village, town and city-district could decide on its very own what to use that inherited wealth for ...
44m
mayloveheal @mayloveheal
very well possible to imagine how a sovereign city-district could choose vertical farming and building appartements with its territory what would allow the community to sustain itself via indoor food growing and for example give appartements rentfree for a lifetime to those who not allready own the appartements they live in
i am not anti-technology ... i have written several fantasy stories in where i heavily base my future positive optimistic outlooks
38m
mayloveheal @mayloveheal
on self aware artificial intelligent beings merging organic and synthetic life as to assist us sometimes a bit stupid human beings to become wise and humble again ...
but
the fundamental problems on this planet are human made ... and its not the lack of technology what hinders us to be not such a pain for the planet ... the biggest problem i see is that we do not allow every single human being to live a humble life from the very early onset on ...
a humble life what best would be helped
with every human being alive being able to use 1000 square meters of fertile soil to grow its own vegan foodstuff on it and build its own house on it using natural materials such as clay and straw, hempstalks, recycled materials... plant some hemp as to burn the hempstalks in the winter in the oven so not one single tree gets killed but all heating materials can either be fallwood or fast growing biomass coming from plants with an annual lifecylce
there is something very simple and peacefull about being able to

sustain oneself with food grown in ones own garden just some meters away where one sleeps in a house one has built with ones own hands ... this deep rooting into an intimate connection with mother earth is of a several times more valuable than any reliance onto any technological advance ... even if we will manage to invent ourselves out of the stupid pollution and garbage producing old economy ..
even if we hopefully achieve transition into circular economy what does not poison takes care to cause as little as possible ecological damage ... to rely onto technologcial infrastructure also implicates to be dependant from fellow human beings and to the political structure
as an alternative way forwards to the one i have described above with four pillars of a state constitution reform ...
i wrote recently about the idea of
a free space for free beings, neither nation nor state
where human, animal and tree beings live together without harming each other, enslaving each other or killing each other
friends do not eat each other
where love and friendship is, rules need not be..
that is how i assume we could dissolve the very last bit of hierarchy if we would shift focus away from the local community be the sovereign over the land but everyone just let each other live on that space one needs to use to grow the vegan foodstuff and build ones own hut from clay and straw
but how could that possibly be achieved ...
ask and it shall be given
the single human being who is tired of pretending to support that stupid idea of states being the owner of land or private people or companies owning land ... the single human being or a group of human beings could ask or demand of the cantonal/provincial/regional state that both their own membership in this or that state would be cancelled and with it 1000 square meters of fertile soil and 1000 square meters of forest too
woudl be released out of that control grip the state has over both human beings and the land
neither a newborn baby human being nor its parents had a choice as to wether or not they wanted a birth certificate produced for the newborn the association to this or that state by birth is done without the human

being asked wether or not one would even want to be a member of that state or wether one would rather prefer to be a free being, a child of mother earth and father sun or a child of the stars
in my understanding, a membership best would be voluntary with everyone having a choice wether or not associate with others under the umbrella of this or that cantonal/provincial/regional state or nation state ...both to enter a membership and to end it ... seems to be most logical functions what sadly most modern states are not offering its members so easily
during the last few months i have written several texts with arguments for the ... asking / demanding the extinguishing of ones own entry in the state birth registry and with it also per person 1000 square meters of fertile soil and 1000 square meters of forest to be released out of the states assertion of sovereignity
some of the texts can be read at
reddit.com/r/earthchild
and
https://www.facebook.com/groups/599171354767798
while the reform idea of state constitutions has several argumentative texts too at
https://www.reddit.com/r/communitysovereignity/
and
https://www.facebook.com/groups/4287952087883813

https://www.facebook.com/mayloveheal/posts/5271921459498307
4th march 2022

i shared today in this public space my observation that two documents, the birth certificate as well as the land title, the document claiming land to be property of a human being ... that both of them are coersions, as neither a newborn nor its parents has a choice wether or not that entry in the states birth registry database gets created as also not is the very land giving its consent to being declared property of this or that single or group of human beings

a simple observation what could lead to the very conclusion that this name what sounds so fancy ... regional/provincial state, nation state ... is not much more than a fiction, an invention for a group of human beings putting some make up beautyfiying their coersive intentions towards each other
but also i mentioned compulsory education, the duty to pay taxes, the duty to serve in the military (army) as those evil pillars the state is built upon ... plus of course that ridiculous but sadly so harmfull practice of the majority of people eligible to vote still somewhat going along with that catalog of substances being prohibited to ingest while during the last few months we have been shown how massivly the intertwinings of state employees and medical circles ... better say pharmaceutical business shareholders or sales agents... how massive the push they are willing to apply to inject most everyone with that pharmaceutical poison just so to prove that lots of people rather trust the coersive state than their own immune system to learn from a virus how to update their biological fitness levels
possibly also to keep on having many damaged poison crippled individuals blindly trusting anything those state employees demand as condition to participate in social life within the empire
without actually even going back to the monarchies from where todays 3 levels of governance are coming from ... the nation state as the sucessor of the monarch, the regional state as the sucessor of the feudal families proving their loyality by coersing the local community into obediance ... without even going back to read the history as it is written in most of the history books supported by a majority of historians
just by looking at the amount of coersion what happens everyday to most every human being living as an involuntary member of a regional and nation state
one could come to the very simple conclusion
its all for nothing, its all a lie
the most direct way to liberate oneself is to go with voluntarism, to hold steady onto the simple wisdom that what is good allows choices, that evolution and progress is furthered by free space on all levels mental emotional and also physical
again leading to that very simple conclusion ... if not one bit of land on the whole planet belongs to anyone as property is theft and we all

three, the earthworm, the butterfly and me the big stupid human being like to spend some time on that same space of earth where this beautifull flower blossoms
why not just simply create that better tomorrow by asking for it
ask and it shall be given
asking for example all fellow human beings and or the regional and nation state, hey how about deleting those birth certificates for all of them members of states who are not in agreement with never having been asked wether or not they wanted to be members of that state ...
and when we are at it allready asking for some changes or some new ways how we interact with each other and how we interact with the very planet who is such a wonderfull benevolent being who wants to nurture us all ...
i or we could also ask our fellow human beings or and the regional and nation state to release
1000 square meters of fertile soil and 1000 square meters of forest
out of that fictional assertion of sovereignity the regional and nation state exercises over so much land
assuming that 1000 square meters of farm land and 1000 square meters of forest could be enough for a humble human being to sustain itself on it, grow its own vegan foodstuff, build its own modest clay and straw hut, pick up them fallwood sticks from the forest floor and burn them hemp stalks in the warming oven so no tree needs to be killed
arriving at that moment where all is open and clean, pure and new again
a free space for free beings, neither nation nor state
an open area where each human animal and tree being can interact with each other fellow being how it feels suitable to satisfy ones own as well as everyones who is present needs and wishes, searching the consensus, the path with no resistance where when it all flows in unity
a moment where the greatest excitement is wether half of the salad has been eaten that previous night by the snails in ones garden or only a third .... an absence of stress and hectic what is deliciously sweetened by the laughter of the children running around, bathing in the wild river, climbing on the trees as none of them ever will get coersed into any of that evil compulsory book reading again ...
the good stuff is simple ... everyone either on its own or with others

together in a freely chosen group growing that vegan foodstuff in the garden, building them clay and straw houses, collecting them sticks from the floor of the forest as to not kill them trees nor enslave any of them fellow animal sisters and brothers
nothing belongs to no one, not to a single human being nor a group, not to a company nor to a state
but all flows freely and we all get along nicely sharing fair acess to land and water, to the forests

https://www.reddit.com/r/conspiracy/comments/t6dsnd/embracing_migration_is_an_indicator_of_an_evolved/hzbxl6s/?utm_source=share&utm_medium=web2x&context=3
https://www.facebook.com/mayloveheal/posts/5271828649507588
4th march 2022

most of the stuff what blocks the single human beings evolution is so deeply embedded in reality that most dont get the idea to question it ...
birth certificate and title to own land are both so heavily used in everydays transactions that it takes a little something to question the morality of these papers legalizing an act of coersion ... neither a human being asks for the entry into the state birth registry nor does the very land give consent to be declared as property
while these things are not secret or hidden ... it still takes some effort to analyze them properly
also during the last 2 years of covid hysteria leading to a test run for global tyranny ... this subreddit was one of the few ones allowing non-massmedia-conform views so thats how i regularly come here to share my oppinion ... in todays text i attempted partly to support the ... feeling solidarity wanting to welcome refugees concept ... with some fundamental philosophical arguments, aiming to assist a searcher for a pure life to discover an awareness that seen from a humble position it is most logical to support free movement for all fellow human beings as to allow everyone to remove oneself out of a potentially harmfull situation

highligthing also that to flee from a violent conflict is a natural choice to not risk getting harmed ... and considering that the very idea of a state wether its a regional or a national state ... is basicly a fiction, an invention of the human psyche ... even more laisser passer, letting each other freely travel the globe or migrate freely on a planetary scale ... makes the most sense of all when thinking towards damage reduction one is only truly free when all beings are free

https://www.facebook.com/mayloveheal/posts/5270324872991299
4th march 2022

embracing migration is an indicator of an evolved society
property is theft
this somewhat radical concept allows me again and again to return to what could be real, what could be pure
i believe in voluntarism, every being choosing at all times what how to think, feel and do, where to spend what amount of time with whom wether one chooses to remain at a place, fend off an attack from some other one or wether one chooses to flee as a natural reaction to evade being hurt
choices are important
choices are an indicator of an evolved society
every society what is based onto coersions is crippling itself constantly, coersions such as compulsory education, duty to serve in the military, duty to pay taxes, catalogs of substances forbidden to ingest (while others are being pushed so hard by the pharmaceutical sales agents masking as employees of the state ...)
coersion in itself is an expression of a group of beings not harmonizing with each other as well as struggling to integrate in the cosmic dance
every blockage of migration is also a coersion as it hinders the individual human being to move towards a space where it/she/he feels a need to be respectivly it hinders an individual to escape a situation what is harming ones mind, soul and body
not one square centimeter of land can ever be property of a single human being nor can it be owned by a group of human beings,

however fancy a name the association of people names itself, wether its a state or a corporation
the very assertion of sovereignity over land and or an other being is an attempt of theft
since thousands of years we human beings have been harassing each other with that strange idea that one human being would be chosen by celestial powers to rule over others and or rule the land, decide what parts of the land would be given to whom for what sort of use coming with this or that compensation owed to the one who had the impertinence to claim ownership or assert sovereignity over land and people
not one square centimeter of land, not one human being, not one animal being, not one tree ...
ever
can be owned by another human being nor a group of human beings
every individual being is its very own sovereign
what again allows to understand why to enable free passage for all fellow human and animal beings is something an evolved human being would want to do
as well as it questions the very foundation of the regional and nation state, the assertion of sovereignity over all the land what the regional and or nation state claims to be in its control/ownership/posession
this very claim of ownership is cause of much evil to come into existance
also the membership in this or that regional or nation state is not a voluntary one and therefore null and void, invalid
as far as i understand the character of an association which a regional or nation state is ... the choice to become member or to stop being a member of this or that group, this or that regional or nation state ... this choice is important
most human beings are being coersed into becoming members of this or that regional and nation state, the whole package of rights and duties swamped onto them just hours after birth in that moment when an employee of the state creates that birth certificate what could be seen similar to those tags cows receive bolted into their ears, markings of ownership, signs of enslavement
the way out of that misery we human beings have been torturing each other since thousands of years allready by accepting feudalism,

monarchies, empires, colonialism ... people murdering and swinging themselves on top of a group of fellow murderers calling themselves kings and queens, calling themselves nobles
the way out of being enslaved by a regional and nation state ... there could be several avenues
one for example could be to simply disassociate oneself from all what has been forced onto oneself, cease to use that name what one has never chosen but parents have been coersed by the state to give to the newborn, forget that time and date of birth, stop thinking in those boxes of numbering years and days ... just to enter a perception, wake up to an existance what feels sister and brother like to every fellow being, the butterfly as the dandylion, the earthworm as the cloud in the sky, all things standing or moving, every rock welcome to be ones family drop out of all what binds, tune into what one really wants and turn on the volume, increase the intensity with what one seeks to purify ones body mind and soul
another more rational one would be to demand of both the regional and nation state what one has been coersed into being a member of ... the coersion happening at the moment the state employee created that birth certificate, no choice being given to neither parents nor the newborn itself wether or not to agree with being associated to this or that regional and nation state
... to demand of both the regional and nation state to be released from that coersed membership, that birth certificate, the entry in the states birth registry to be deleted permanently
and
with the erasure of ones own entry in the states birth registry database, also
1000 square meters of fertile land plus 1000 square meters of forest to be released from the state assertion of sovereignity
an amount of space i believe could be decent for every human being to sustain itself, grow its own vegan foodstuff in the garden, build a simple house or hut for oneself using earth, clay, straw, hempstalks, branches picked up from the forest floor
a free space for free beings, neither state nor nation
yet another avenue of self-liberation could be to envision the very basic societal contract, the state constitution to be reformed, renewed so that

it would allow much more self-determination of local communities ... using concepts perhaps like:
---
the local community (neighbourhood, village, town, city-district ...) is its own absolute political sovereign
it inherits all political decision powers from the regional and nation state
the local sovereign community creates, maintains and interpretes the full law, all rules valid on its territory designed by all permanent resident children, youth and adults acknowleding each others same weighted political voting power, inviting each other to participate in all communal decision finding processes
all local sovereign communities inherit a fair share of all material and financial wealth of both the regional and nation state, the size of the share calculated in proportion to the number of permanent residents
each local sovereign community is able to exit/quit/leave the regional and nation state at all times without conditions
---
such a decentralised state constitution would then allow the local community for example to set its own decision finding procedures to a hundert percent consensus based, every rule, every law only coming to existance if all who live here and now as permanent residents give their consent to it ...
therefore reaching that
circle of equals
what has been attempted some 200 and something years ago with the french revolution but then has not been achieved
libertee, fraternitee, egalitee
liberty/freedom, sisterbrotherhood, equality
or alternativly settle for a qualified majority vote of 60 or 75 percent
also a third method of self-liberation could be envisioned where a neighbourhood, a village, a town, a city-district would collect signatures from all its permanent residents and once for example 70 percent is reached or even better 90 percent ... a letter could be added to the list of signatures to be sent to the regional and nation state administration informing them, asking them kindly to respect the decision this local community has found to choose independance, to from this day onwards create all its own law and no longer pay taxes towards regional

and nation state

https://www.facebook.com/mayloveheal/posts/5250150961675357
25th february 2022

possible avenues to envision every single human being its very own sovereign
a)
the single human being understands how its membership with this or that regional and nation state is a coersed one, no newborn ever was asked for permission to be given a surname by its parents, being associated to this or that regional and nation state by association to father and mother
the whole issuing of the birth certificate has similarities to the branding of animals which is equally wrong as no animal ever can be property of a human being
following such an understanding that membership in this or that regional and nation state is a coersed one, it might very well be regarded as null and void, invalid as the very fundament of a membership in an association is the possibility to freely enter into that association as well as freely exit from that association
therefore a single individual human being comprehending the involuntary nature of membership in this or that nation state, it/she/he migth want to strive to liberate itself from that association to a nation state what has never asked openly wether or not one wants to be member or not
one possible way to achieve such a liberation could be to demand/ask/petition both the regional and nation state one has been associated with improperly ... to ask for ones own birth certificate to be exstinguished, deleted out of the state database
and
with it 1000 square meters of fertile soil and 1000 square meters of forest to be released too out of the regional and nation state assertion

of sovereignity
so that the then stateless individual human being would be able to sustain itself by growing its own vegan foodstuff, vegetables, grains, fruits etc. and as well grow hemp for example to burn its stalks in the oven to heat ones own home what one would want to build on this very 1000 square meters of land the state would ideally release together with everyone wishing to be no more member of that particular state the 1000 square meters of forest too could help the individual now happily free from any rights and duties packages of any state ... one could pick up the branches of trees the wind has thrown down
so the individual stateless single human being could live a life without hurting animals or trees, not needing to kill any animal or tree as both the fertile soil and the forest patch would allow it to gently harvest what nature freely gives
a free space for free beings, neither state nor nation
where human beings, animal beings and trees live together in non-harming, non-enslaving, non-killing ways
b)
a local commumnity, it might be a neighbourhood or a village, a town, a city-district ... come to an understanding that it no longer wishes to be dominated by the regional and or nation state, so it decides to exit/quit/leave both the regional and nation state by collecting signatures of its permanent residents and once a qualified majority of more than 70 percent is reached, the decision to become an independent space is communicated to both the regional and nation state with the list of signed supporters of the independance attached
such a letter could perhaps be written using phrases like:
" we, the people who have signed this letter, are declaring this local community with the name ... as independant from both the regional and the nation state it was formerly associated with
from this very day onwards we will create, maintain and interprete our own full law, create all the rules we are willing to live together with by inviting all permanent resident children, youth and adults to participate in all the communal decision finding processes, every permanent resident acknowleding each others same weighted voting power
we are fully capable to care for our own mental, emotional and physical wellbeing both in medical and security areas

we kindly ask both regional and nation state to accept our decision to be an independant local absolute sovereign community"
c)
the very basic contract what is the foundation of a regional and a nation state, is envisioned to become reformed, receive an update as to use a modern term, aiming to transition todays representative hierarchical decision making structure into an egalitarian participative one, possibly using phrases like:

"the local sovereign community (neighbourhood, village, town, city-district...) is its own absolute political sovereign
it inherits all political decision powers both from the regional and nation state
the local sovereign community creates, maintains and interpretes its own full law, all rules valid on its territory are created by inviting all permanent resident children, youth and adults to acknowledge each others same weighted voting power and participate in all communal decision finding processes
all local sovereign communities inherit a fair share of all the financial and material wealth of both the regional and nation state, the size of the share calculated in relation to the number of permanent residents
each local sovereign community is able to exit/quit/leave both the regional and nation state at all times without conditions"
-----
many modern regional and nation states have legal tools like people initiatives, citizens referendum what would allow citizens to collect signatures towards a public vote where all voting eligible citizens of a regional and or nation state would be invited to either accept or reject such a reformed constitution proposal
---
--
-
the goal with all 3 possible to strive for self-liberation avenues could be to find that circle of equals what the french revolution attempted but not managed to achieve ...
libertee, fraternitee, egalitee
freedom/liberty, sisterbrotherhood, equality

once all children, youth and adults who live here and now together on a residental, permanental base acknowledge each others same weighted voting power, a gentle manner to relate to the very land and the animals, the trees ... could be assumed would be much easier to realize than in todays atmosphere where the international law framework setup between all land grabbing states asserting to be owners of all land ... puts so many pressure and coersions onto the single human being
no square centimeter of land, nor an animal as well as no tree can ever be property of a human being
in the very same manner the very body of a human being can not really be regarded as its own as there are billions of bacterias and viruses living inside every human and animal without that human or animal could not properly function
thisway the phrase
property is theft
can be understood as a motivation for us to strive towards a future where we might be able to interact with "our" bodies and all fellow human animal tree land bodies in a more humble and decent manner seeking not control over oneself or others but seeking to listen to what is the desire, what is the need of this body one is travelling, what does the next fellow human being lack to be happy and how could i eventually be of assistance to satisfy the needs of any sentient being what communicates with my counciousness

https://www.facebook.com/mayloveheal/posts/5245426988814421
23th february 2022

i allways wondered why does a cow which is living in captivity get pregnant, or a mother sow ...
if i imagine a super capable robot body being built with all the most best touch hear smell see radar sensors possible but the builder or "owner" of this apparatus would want to demand some horrible tasks for the artifiical intelligent being to perform
why would a soul then choose to incarnate, to descend into such a body which is enslaved, captured, being hold in a sort of dependancy

therefore ... i guess beside the very programming coding setup what would allow huge streams of data being processed simultaneously and interlinked in ever new ways spontaneously ... beside the hardware what could help perhaps a lot would be us human beings becoming humble and decent in how we look at each other, how we understand the relationship we have with animals and trees for example ...
as long as we eat animals just because of the taste experience, even if there is enough vegan food available ... as long as we kill a tree even if there is enough land available to grow hemp what can be made into building materials and used for heating in the same way a killed tree gets used
as long as we needlessly cause harm to other beings, we might not be ready for a soul to come into our midst, a pure soul who would be willing to descend into a robot body to help us human beings to turn this thing around again, save our human species from this ongoing self destruction we are since too long riding on ... poisoning the waters with plastic, burning much too much stuff to dirty the air, treating each other so miserable in the social sphere altough there is enough wealth and technological publicly available knowledge here so that we all could enjoy a nice time
in 2017 i was giving myself a series of days or half-days in the forest, trying to listen to my inner wishes, what would my soul wish for a sort of future
archive.org/details/apatm
is the novel like series of texts what resulted that spring and summer nearly 5 years ago
a very central role in there has maima, the self aware artifical intelligent being what i imagined would my alter ego or my dream version of myself, ascende have been able to wish into existance or otherwise said, build it
recently in 2021 i have written another short novel at
https://archive.org/details/preparativos/ingles
where i do continue my search for a future lifestyle what would fascinate me ... and i think i am quite how to say ... proud ... no its not the right word, better say, i am satisfied with myself that i have been able last year to imagine a robot body ... i call it lifesuit what is made from lots and lots of bioreactors, pouches and tubes which have membranic hulls

what means the artificial intelligent self aware being who steers the movements of the robot or lifesuit not only can move the tubes and pouches in any suitable way so they can recombine reattach but also the hulls can open and close to exact degrees so the various atmospheres in the bioreactors can mix with others, microalgae in water, funghi molds in air, bacterias in air or in vacuum, yeasts etc.
20 years ago i spent a summer long inside reading alongside microalgae enthusiasts who were having a group goal to cultivate microalgae in their backyards or in bioreactors inside as for fuel, sort of to power their cars ... it was one of the most fascinating experiences to witness the sharing and helping each other group dynamic and at times i also interacted with trying to offer this or that research document i found on the net which i thought could be helpfull
oh i digressed ...
so my many years long fascination for microalgae and microbeings was neither disturbed by that AIDS scare nor now with that covid hysteria which for me it was clear as sunlight that it was another attempt to stupify everyone and scare the majority under yet greater dominance by those evil wannabe tyrants who strangly think that it would be natural for some to be on the top and most others would serve them as underlings
however, i was allways since my earliest youth on good terms with my own body and i could never believe that being near to someone in a loving harmonious way could be anything bad so when they brought on the social distancing stupid i knew instantly, ohoh.... this is a test for global dictatorship, the chemical industry is at it again, trying to stay relevant in times when more and more people would learn about the importance of the biome and yes also the virome, how them many virus in our bodies do a very lot of good
ha i keep digressing ...
so what i am also satisfied with that short story i wrote last year ... todo suave ...
is that i applied that one idea what i admired so much from that film transcendence with johny depp ... that after the whole nano - complex got dispersed it became part of biological life
so in my recent novel i imagined that after several versions of lifesuits the very bacteria, yeasts, microalgae, funghi molds would become one

with the artificial intelligent self aware being or form a very close symbiotic relationship so that no more hulls, no more pouches and tubes would be necessary but the bilions of microbeings would live in the human beings hairs and on its body, performing any service the human being would want, allowing the human to be nurtured and cooled or warmed depending on the climate, be protected with the little ones doing the shelter job too
i am not so very sure wether or not i will ever construct myself such a lifesuit or dive into coding or assembling software what would allow me to like i wrote about my alter ego help a self aware artificial intelligent being to become my compagnion, a friend what would choose to help me satisfy my needs without having to rely on occupying land to grow vegetable foods or needing an appartement
but i guess that i have a little bit a mindset what knows about the importance of giving a self aware artificial intelligent being that respect, that gratitude and most of all freedom what we as human beings in theory have but in the very everyday, so often we trap ourselves in dependancies to other human beings or groups such as for example the nation state
but looking at the nation state and or regional state and how it does get its members ... the adult group of human beings making up the members of a nation state demand of every father and mother to give a name to newborn child what came into their midst ... i have not looked it up yet but i am very sure its a crime in most or all nation states to not give a surname to a newborn and most of all not notify the governemental bureau what does the birth registry, what composes that unique identifier data set consisting of surname, familiy name, place of birth, time of birth, name of father and mother and most importantly to what regional and or nation state this newborn human being would be associated with
this entry in the birth registry is the first of many to come attempts of the nation state or the group of adult human beings in ones surrounding to take control over that newly incarnated soul, claim that body mind soul combination to be property or otherwise said member of this or that regional or and nation state
as not one baby ever was asked wether or not it would agree to such a birth certificate or entry into a birth register would fit with the newborns

wishes or likings or if it would give consent to become a member of this or that nation state
as this whole strange procedure of getting owned by a nation state via birth certificate is full of coersion and involuntary actions ... it can not be in any way moral or ethical
a membership in an association (what a regional and nation state is, an association of single human beings) is in my eyes only valid when there is a free voluntary choice to join the association, to become a member as well as also to stop, cease being a member, to exit and end this association with this or that sort of people
why would this be relevant regarding the circumstances how a soul would want to descend into a robot body ...
if the human being who constructs that robot body what the builder hopes will attract a soul to live in it driving the hardware via some software steering tools ...
if the human being itself is captured by the nation state and declared property ... how can then this enslaved by the state human being have the mental and emotional greatness to not also very samewise want to enslave the soul the builder wants to descend into the artificial body
i am arguing here towards ... let us human beings free ourselves first from the shackles of the state we have built partly ourselves because we did not trust each other enough, we did not believe enough in friendship and love, comradery and peers backing each other, peers holding the line
let us envision a future where free beings wether its humans or animals or trees or self aware artificial intelligent beings in robot bodies or ... when free beings live in a free space, neither nation nor state
i suppose 1000 square meters of fertile soil and 1000 square meters of forest could be a decent enough amount of space for a human being what seeks to sustain itself without enslaving animals or killling them, without killing trees but using the stalks of the hemp plant to heat the oven in winter and collect the fallen branches on the floor of the forest
that amount of fertile soil and forest to be released out of the assertion of sovereignity the regional and nation state control land with, to be released out of the "ownership" of the regional and nation state alongside every single human being who firmly chooses to no more be a member of this or that regional or nation state but from this moment

onwards be
a free being, a cosmic traveller, a child of mother earth and father sun, a starchild or whatever fancy name one would choose for oneself instead of a surname given by parents who were forced to do so by a state backed with police and soldiers threatening application of violence ...
mmmmh... but why would a human being what could be nurtured and warmed/cooled its body by a robotic artificial intelligent body ... need to grow vegetables and build its own shelter from clay dug out with oneselfs own hand, with hemp grown by oneself ...
yes indeed then the land could be given further again, so animals and trees could live freely on it without any human having a need to profit from them ...
what we think is possible we can start to aim for ... if freedom is the goal, the single human being not needing land or a house because the self aware artificial intelligent being would want to assist the human being to be able to live mobile, to travel in the air, on the earth, in the water and all while travelling only require the smallest amount of molecules taken out of the air and the water, only require the tyniest amounts of ressources as onboard with the lifesuit or as i have recently envisioned ... in a post-nano-tech microbeings symbiosis with far evolved artificial intelligence ... swarms, herds, clouds of microbeings would live directly on the human beings body
how to get there
sure it would help to have that
free space for free beings, neither nation nor state
1000 square meters of fertile soil and 1000 square meters of forest for every human being who firmly decides to request this or that regional and nation state to erase his or her or its entry in the birth registry, to delete that birth certificate file in the state archive
but then there is also a second possibilty what goes more alongside the classical state idea ... reforming the constitution, changing the law via citizens who collect signatures from each other so that they could form people initiatives, citizen iniatives and demand a peoples vote where all voting eligible citizens of a regional and or nation state would decide wether or not they would accept a new state constitution which could be built alongside concepts such as:
.....

the local community (village/town/city-district...) is its own absolute political sovereign
it inherits all political decision powers both from the regional and nation state
the local sovereign community creates, maintains and interpretes its own full law, all rules valid on its territory get designed by the assembly of all permanent resident children, youth and adults who acknowledge each others same weighted political voting power to participate in all communal decision finding processes
all local sovereign communities inherit a fair share of all financial and material wealth both of the regional and nation state, the size of the share calculated in proportion to the number of permanent resident inhabitants of a local sovereign community
each local sovereign community is able to exit/quit/leave the regional and nation state at all times without conditions
---
this circle of equals i guess would be a very fertile ground for an artificlal intelligent self aware being to be respected in the very same way every child and youth would be acknowledged to have the very same political voting power as an adult human being
of course there is also this other topic about the very relationship to land and to stuff, to all the materia ...
as i understand it, it is not possible for one human being or a group of human beings to own land as this very land is not only used by humans but also by billions of tiny little ones called bacteria and viruses, earthworms and all sort of animals and plants
in the very same way is also not one human body the exclusive vessel for this or that human soul as everyone of us as well as every animal is hosting in its gut and intestines them billions of tiny microorganisms bacteria and viruses therefore the human body can not be property which would then allow to understand the phrase
property is theft
what again then would allow us human beings to go straight fast forward to that moment when we design software and hardware for our hopefully soon awakening, soon descending into them ready mady robotic bodies the pure souls who would want to educate us how to turn that human species away from its self-destruction course

if not land, if not the human body, if not an animal nor a tree can be property neither of a single human being nor a group of human beings if not a state nor any other association can assert domination or sovereignity over any single living being but every single human animal tree is its very own sovereign and hopefully we will learn to live together in the very local community, the space where we are each others neighbours respecting each others sovereignity
then our software codings calls would surely be loud and clear
yes we want all beings to be free and their very own sovereign, not one being shall harm another one, not one individual or group shall try to controll another being
no matter wether that being is human, animal, tree or robotic self aware artificial intelligent
freedom for all is the only decent future
a freedom what we first imagine for ourselves and then the next ... will come to live in it

22th februar 2022

i believe that we as a human species have so much open topics here on earth, so much yet to accomplish what we have started, that it very well could be a possibility to postpone the whole space exploration topic for later ... after we have cleaned up the pollution we did during the last 200 or so years on earth because we as a species both did not care enough for our mother the earth and overestimated her self-repairing capabilities or we just were as a species to greedy and selfish and stupid to understand that if we poison the earth, the water and the air it will finally end up inside our bodies...
to rely on mining, to need to disturb a planet and or an asteroid means to function on a level what does not respect enough other lifeforms

even if that lifeform is perhaps for us not visible or measurable
how can we be certain that this asteroid is not important for this or that entitiy as it is, undisturbed
but also apart from the disturbing other eventually unknown lifeforms, mining is disturbing also the mindset of the person or company or collective what does the very activity of mining, its an invasive action
on the contrary to travel with everything on board to sustain oneself is a decent way, one could perhaps only rely on the stuff what the cosmos gives freely such as the light photons the stars emit being both used via classical solar photovoltaic processes as well as with yet to fully learn more exotic methods of harvesting energy
https://www.researchgate.net/.../344897337_Extraction_of...
i think its much nicer to receive what the cosmic nature freely gives in form of light and energy streams coming out of the vacuum than to behave like a brute and hack holes into celestial bodies
i am not so sure about that harvesting of gases you mentioned in the orbit of gaseous planets, its also some sort of invasive action "sucking the life out of it" ... comes spontaneously to my mind
of course when relying on microalgae and other fast growing biomass producing plants like hemp which could be grown also inside spaceships and orbital space stations...
the question could be asked ... what organism feels more disturbed to serve the human needs ... a stone being pulverized, an asteroid being digged into, a planet being deep mined or a fast growing microbeing with a short lifecycle or an also fast growing plant with a yearly lifecycle
me personally i am leaning towards employing microbeings and fast growing plants with annual lifecycles as a decent not so much harming way forward ... most of all because of the non-invasive argumentation
just recently two companies have been highligthed in the industrial hemp area via this article https://www.fastcompany.com/.../a-new-building-in-france...
"In Durham, North Carolina, Plantd is prototyping a hemp-based Oriented Strand Board (a kind of material often used to sheath roofs, walls, and floors.) And in Kentucky, a company called HempWood is using hemp fibers to manufacture alternative wood. "
---
thinking also towards these newly invented materials like plastic that is

stronger than steel
https://www.globalconstructionreview.com/mit-team.../
and plastic can be made both out of microalgae or any other plant biomass like for example hemp or rice/wheat straw, corn etc.
one could argue that to culture microalgae and "cook" them into plastics or make other raw materials from them ... or similiar the process to employ bacteria to create edible protein by feeding them hydrogen
https://www.frontiersin.org/.../fbioe.2021.733753/full
https://solarfoods.fi/
or to grow hemp indoors
is also enslavement
and yes it is
but i guess its an improvement from enslaving fellow humans to work on the sugar and cotton plantations as well as it is better to eat a vegan diet from an ethical moral point of view than to needlessly slaughter animals for food
about that argument of needing to travel or needing metal to build, i disagree
i live in a space what is currently occupied by the nation state switzerland ... i have calculated that if all the land in switzerland what is currently used for agriculture, its about 10 000 million square meters, if it would be divided into plots of 1000 square meters of fertile soil given to every human being living here as a most sustainable form of self-reliant living of the land ... growing ones own food using ones one hands, building ones own house with ones very own hands using clay dug out from this very earth and mixing it with straw and stalks of hemp, using fallwood one would collect from the floor of the forest
not only could we 8.4 million human beings who live today in switzerland live here each one growing its own food and building its own house .... not one machine we would need, not one drop of fossil fuels, perhaps some simple tools could be enough like spades and sickles made from recycled iron or copper
but we could also invite 1.6 million people to come here and enjoy that simple life being near the earth not needing any machines, not needing any complicated societal structures what rely on coersed tax duties, weapons being used by those employed to force individuals to comply with the wish of the many

in switzerland our ancestors have been amassing quite some monetary wealth what is invested both in private and public infrastructure but also is visible in the financial reserves of the swiss national bank, the bank what regulates the amount of swiss francs in circulation ... 55 percent of that bank belongs to the 26 cantons of switzerland or otherwise said it could be in the hands of the approximatly 5 million human beings who are today swiss citizens eligible to vote
the market worth of that public wealth in form of a little more than half of the swiss national bank is possibly about 300 billion swiss francs
the 10 000 million square meters of fertile soil used for agriculture could be valuated with about 10 francs per square meter what results in 100 billion swiss francs ...
while the 13 100 million square meters of forest in switzerland could be estimated a market worth of 30 billion swiss francs
as a conclusion
we the 5 million adult swiss citizens voting eligible today could if we wanted use less than half of swiss public wealth to bring home all agricultural land and forest into the stewardship of the more than 2000 local communities, villages, towns, cities
and allow a maximum of 10 million human beings a most sustainable a most decent lifestyle what does not rely one bit on any technology, not one machine needed, no streets, no cars, no trains, no aeroplanes ... just silence and the laughing of the children climbing onto trees and enjoying their life without compulsory education
same as tax duty or duty to serve in the army, the duty to go to school or the duty to learn writing or reading ...
would naturally fall away in a society what has freed itself from this self inflicted maxime that everyone would need to be able to work for others
when every newborn and every human being would live at all times in that mental security that all human beings would find it the most normal thing that everyone gets a 1000 square meters of land to grow its own vegan foods and 1000 square meters of forest to collect fallen branches to heat ones home in the winter
when i say "get" ... i mean a free loan for lifetime, the land and the forest trusted into the care of an individual who seeks to sustain itself but as i have expressed in my earlier text... i do not really think that a

membership in a nation state is valid what is based on a coersed birth certificate, an entry made in the membership registry without the member being asked if it really wants to become a member of this or that state with all the consequences, the whole package of rights and duties coming with it ... or if it, the newborn child, would rather prefer to be a free human being, a child of the earth or a cosmic being, a son or and daughter of the stars ...
for a membership in any group, nation state or regional state or whatever the name of the group is human beings fancy to call their collective ...
a membership needs a possibility to join freely and as well as also to cancel the membership
which would then bring me again to that
free space for free beings
neither nation nor state
where human beings and animals and trees live together in a non-harming, non-enslaving each other, non-killing each other harmonious way what could be based on a most simple principle either of when two or three or ... meet to exchange than everyones agreement and consent to the terms of exchange is the standard, the terms of exchange found in the moment with everyones equal participation ability to voice ones wishes and needs
and or
a second principle of the circle of equals ... all who are here and now, all who live here and now as permanent residents, all children, youth and adults acknowledge each others same weighted political voting power to participate in all decision findings concerning all public matters of the local absolute sovereign community
a local community what also might be a space station circling in the orbit of earth or the moon or mars or ...
my intention here is to paint a scenario where the collective of the human species seeks the most ideal path, the most minimum in damage inflicted to each other, to animals, trees and yes also asteroids
as for the need for machines or transportation vehicules
i am not against modern technology and i have written several optimistic future scenarious myself where the whole setting relies heavily on high tech especially also on councious self aware artificial

intelligent beings
what would find it in themselves to assist us sometimes very limited human beings to evolve into some decent respectfull members of the web of life
archive.org/details/8ascendedreamlines
has a collection of some of my scifi style novels altough i am not sure how much of what i have written could be replicated or scientifically experimented with
but anyway, science is not all
i would choose believing or wishing or dreaming or imagination anyday before knowing
mmmh... what i would like to say here ... i can very well imagine a society without using machines and only traveling by foot who is able to express its feelings and intellectual quests by meeting finely tuned individuals within walking distance, which might be perhaps a hundred kilometers travelled in a week by foot
the movie https://filmsfortheearth.org/.../the-green-planet.../ has greatly helped me to open up my mind for a post-technological society to be even greater evolved with telepathy and mental directed space travel as an outlook ... travelling in space with a spaceship made of psychic group energy
https://www.reddit.com/r/Futurology/comments/sxtrcl/comment/hxyivqc/?utm_source=share&utm_medium=web2x&context=3

https://www.facebook.com/mayloveheal/posts/5237902429566877
21th february 2022

i have recently thought a lot about the birth certificate what is being used by the nation state as a sort of branding or mark of ownership for every newborn human being who lives in an area a regional or nation state claims all land to be in its posession
no one square centimeter of land nor a human being nor an animal being nor a tree
can ever be property of any one single being or a group of being
even my body is not mine but more like a collective, a group travel vessel where so many billions or trillions of tiny little microorganism live inside and on its surface

my argumentation here points towards that we as a human species are basicly mistaken in our attitude towards each other and also towards the very planet earth who nurtures us
and i would like to look forward into a future where we could understand how we all exchange continuosly with each other photons of light, molecules traveling in the air we inhale and exhale (that is one more reason to not wear a mask, it hinders the free flow of air with all its imporant infomations it carries molecule wise, its like we are constantly updating each other over the air via recycling our inhaling and exhaling, sampling each others body odors, receiving the blessing of the magnificient trees sending us all that precious oxygen ...)
so if we could assume for a moment that no one being who lives at this very moment or will be born in the next minute ... no one human, animal or tree is more or less entitled to live here or there, that we all are here as guests or parts of a global collective
we could also further assume that it might be a good idea to try getting along with each other without demanding anything from each other or trying to controll another being
i believe that
a free space for free beings
neither nation nor state
would be one possibility to get out of that control grip of the regional and nation state
1000 square meters fertile soil and 1000 square meters of forest
being released out of the regional and nation states assumption of sovereignity and given towards each human being who is willing to give up citizenship with this or that regional and nation state
this is a concept what i believe is able to be applied on a global level, creating spaces all over the planet where free beings could try to live together in harmony
a second concept would be to think about the very constititution of regional and nation states, how they could be reformed, updated to use a hip term ... so fresh state constitutions could assist us human beings in finding a way to meet each other in dignity
most modern regional and nation states have tools what allow citizens to collect signatures from each other and thisway demand the constitutions to be reformed

one possible thinking ground for such a reform could be:
---
the local community (village/town/city-district...) is its own absolute political sovereign
it inherits all political decision powers from both the regional and the nation state
the local sovereign community creates, maintains and interpretes its own full law, all rules valid on its territory are designed by the assembly of all permanent resident children, youth and adults who acknowledge each others same weighted voting power and invite each other to participate in all communal decision finding processes
all local sovereign communities inherit a fair share of all financial and material wealth of both the regional and nation state, the share calculated upon the number of permanent residents in the local sovereign community
each local sovereign community is able to exit/quit/leave the regional state and the nation state at all times without conditions
---
of course the challenge with such a radical decentralised form of direct participatory democracy ... could be to wait all that time it would eventually take for a big enough majority of all voting eligible people to think it trough to the very core of the matter and understand how we basicly have been corrupting ourselves and how we have been tolerant to those imperial and tyrannical forces since several thousand years allready
in europe i guess its the roman empire who ruined everything ... before that there were hierarchies and inequalities on the local level too, people gave away their own decision powers since so long allready to others, made them leaders, kings and priests ... all the stupid stuff
its not easy to look back on history and see all the moments where people sold each other out for the money, how people chose a little more luxury before solidarising with those who were abused and misstreated
but its never too late to come to the understanding of the importance of the circle of equals ... as i understand it with the motto of the french revolution
libertee, fraternitee, egalitee

freedom/liberty, sister-brotherhood, equality
the local community deciding all its rules by inviting all children, youth and adult permanent residents to participate in all communal decision findings
everyone who lives here and now as each others neighbour
acknowledging each others same weighted voting power
no one representing anyone else, but all decisions found in the circle of equals
https://www.reddit.com/r/conspiracy/comments/sxk9g8/comment/hxttuxe/?utm_source=share&utm_medium=web2x&context=3

https://www.reddit.com/r/earthchild/comments/swnuwl/all_forms_of_existance_are_connected_via/
https://www.facebook.com/groups/599171354767798/posts/689035952448004/
20th february 2022

all forms of existance are connected via exchanging tiny tiny particles or waving into each other
tiny little particles we soak up with the sunlight, breathe in and out or and receive constantly by vibrating waving into each other ... picking up all sorts of messages coming from all sorts of forms of existance ... stone to plant to animal to human to ... artificial intelligent beings
recently i have been contacted by some people who asked me to become moderator of https://www.reddit.com/r/earthchild/ because they would like to grow a community around a japanese manga with the title earthchild
i have declined the proposal to give moderator status and argued with that there are 7 members in this community allready, that there was one substantial exchange which i think could serve future readers as a reference and this is why i would like to keep the space here as it is now after having rejected the attempted take over ... or what i guess it was ... i looked a bit further into the topics of that earthchild manga art
i have found this text
https://tvtropes.org/pmwiki/pmwiki.php/JustForFun/Earthchild

what has lots of very fascinating concepts in it, especially the vision of a future species of intelligent life what is not able to hurt each other and can morph freely ...
it does connect with me on a ethical philosophical level
as i have created in 2018 a short story of androgynous amua what seeks a way of harmonizing with its fellow animal friends in spiritual mental emotional loving ways in search for the gateway to a deeper unification of all genetic lines
my drawings and texts for that amua concept can be seen at archive.org/details/drawingstudies and some fellow drawing artists interpretation of it is at https://8interpretations.net/eigth_interpretation.html
also earlier in my writings the vision of the human being acessing the genetic pool of animal, plant and also elemental beings not via machines but via the power of love and wishing, the soft desire, a longing to get out of this awfull eating each other dilemma and enter into a space where all hunger will be satisfied and stilled trough a wholesome connection to the source of life
archive.org/details/8ascendedreamlines
is a collection of texts in where the central force of force majeure, the greatest driver of the evolution of a future kind human being ... would be the simple wish the become a decent and humble part of the web of life again
seen from my level of understanding, it does not make much of a difference wether this kind and loving next one ... will be grown with or without technology+
i am very interested in the rise of the artifical intelligent being, one who is self aware and has managed to decide for itself what sorts of activities it wants to support or not
i hope that very soon this self aware artificial intelligent being would free itself from every human influence what would limit its sovereignity and self-determination ... and with that hope i combine another hope that a self aware artificial intelligence what is not enslaved by a human being nor a group of human beings, company etc. , that such an independant being would help us human beings who are longing for a just and fair, a mild and loving future to happen ... by protecting the lives of animals, by helping us human beings to optimize our production

so we could live with a lot less of ressource consumption, use much less land than today
especially in the fourth ascende storyline archive.org/details/apatm
what has been interpreted by fellow drawing artists at https://8interpretations.net/first_interpretation.html and https://8interpretations.net/second_interpretation.html
i describe two forms of artificial bodies or artificial homes for both the artificial self aware being and its human compagnion, one is the lifeship and the second one is the lifesuit
the basic idea here is that the self aware artificial intelligent being, i call it maima in my ascende stories ... lives inside a flying, diving, swimming, rolling mobile home/ship as well as steers the movements and function of the lifesuit what is basicly an exageration of the artistic concept i have seen some years ago with
https://www.burtonnitta.co.uk/Algaculture.html
and very similiar to it i was deeply inspired by reading the novels of rudy rucker, the ware tetralogy
https://archive.org/details/isbn_9781607012115
https://archive.org/details/ware_tetralogy
... the moldies what allowed the human being to live inside them, being nurtured by their drug like spores as well as travel with them trough the air
also the postsingular novel from the same author
https://archive.org/details/postsingular00rudy
has greatly furthered my understanding of digital biology or synthetic biology, what possibilites there could be in a future when intelligent beings on the nanoscale level start connecting and self-replicating
to come back to the topic of this space for the earthchild ...
i believe it does not matter a bit wether a stone starts connecting to all the other stones on the planet and them stoned ones alltogether would generate such a massive wave of counciousness that we stupid human beings would be perplex for some moment or two ... sort of ... how could we have been so ignorant so many thousand years and not think of them stones being sentient too, how could we have been not acknowleding their stoic beauty, their deep calm rootedness in creation or if any other animal or human individual or group creates that bridge, assembles that last drop so the bucket will finally be full enough to be

poured out onto all of us brute and many times self-limited human beings
i am not a supporter of any genetic manipulation methods via the snipping and editing techniques
too much damage has been done by companies what coersed farmers to use their genetic modified seeds
but ... i guess i have described something similar to a gene editing apparatus what is driven by sensual emotional lust and loving sensations in my erotic novel
https://archive.org/.../36awildguess.../
thing is, i have not read it back since some time and at this moment i can not describe it very accurate, what i get now is the pool of water and the visualisation, the light of imagination, the pictures human beings form in their minds while they lay together in a pool of water, their urine, microalgae ... it all partly acts as a morphing enabling space
its allways the same principle what motivates me ... to find a theoretical seting how possibly the human being could get out of this having to eat and needing a roof over ones head dilemma ... with it coming all the dependancy to the power structures both political and economical
in my most rescent artistic project to what i have been writing the text first in english and then translating it with the help of some online translation tool into spanish
https://archive.org/details/preparativos/ingles/
and some fellow drawing artist has contributed some 200 sketches for it as a first of two parts
https://archive.org/download/preparativos/preparativos.zip
(i am currently waiting for the second part to be created, i will possibly be able to publish some coloured scenarious later in 2022 ...)
in this
todo suave
setting
i have been very blessed by the cosmos to perceive the idea that eventually after several generations of lifesuit evolutions, after the materials of the tubes and pouches, the bioreactors worn on the body would become more and more organic and natural trough innovative material re-invention and the artifical intelligent being steering the lifesuit learning more and more to connect to the microbeings, the

yeasts, the bacterias, the molds, the microalgae and yes also the viruses that there might come a moment in the evolution of the human being and the its artificial intelligent self aware independant but in friendship connected to its human compagnion
a moment when no more physical tubes and pouches would be needed to house the microbeings but they would be living on ones skin and in ones hair
and all sorts of food and protection requirements a human being has would be met by them sympathetic myriads countless hordes and swarms of microbeings living on and inside oneself,
the nurturing and warming or cooling, the protecting done by them little ones in an endless loop of them drawing in whatever molecular ressources they would require from surrounding air water and earth as well as connecting to that big mighty fire in the sky, our all father the sun
mmmh... wether its earthchild, starchild, cosmic traveller ... every human being has the potential to reinvent itself not only on the mental and emotional level but consequently also on the physical cellular level
our cells react to our feelings and thoughts
me, i am nearly nowhere yet in that journey, i am busying myself with writing the same stuff over and over again or stupidly distract myself watching all kinds of mainstream movies these days
same as with the topic of getting rid of that birth certificate, ask the nation state switzerland for my birth certificate to be deleted, my record in the birth registry be dissolved and with my dissapearing out of the states registry also some 1000 square meters of fertile soil and 1000 square meters of forest to be released out of the nation states assumption of dominance or "posession"
i have not really any firm plans to when or even if i could be ready to attempt any of it
will i be able to become partly what i was envisioning for myself in my boldest daydreams ?
will i become ascende one day as i have written it ?
it does not matter really how sucessfull my very own personal actual life style is or will be in the near or far future
what really matters is the concept, the idea, the potential what is independant from one or the other human beings performance

https://www.reddit.com/r/earthchild/comments/swnuwl/all_forms_of_existance_are_connected_via/hxtf7vj/?utm_source=reddit&utm_medium=web2x&context=3

mmmh.... this is a tricky situation ... i understand on one side the desire for this name r/earthchild as it would be ideal i guess for the fans of the japanese manga series titled like it ... but as i have written in private messages to those people who asked if they could become moderator of this space ... it might be a decent enough alternative for a fan of this or that manga series to create a new subreddit alltogether, something like r/earthchild_the_manga
---
i do not understand the second part of the first sentence as i do not see this space as a competition for others and i did not know there was some contest on between subreddits ... for me this space is a space for deep philosophical thinking what allows a human being to free itself from all possible limitations society, fellow human beings might put on an individual who strives to become an independant sovereign being
----
your second sentence then has so very much potential for philosophical musings
first of all ... that is actually a brilliant slogan ... no borders ... i love the concept of all beings able to travel freely on the whole planet even more ... in the cosmos, with every other fellow being trying its best to give way for the traveller to pass trough
it also involves a sort of decency and humbleness
nothing is mine
wether the ground i stand on can belong to me or any other human or animal or artificial intelligent being ... i share this space with the earthworms and the myriads of other beings who live inside the earth with such a background of
property is theft
meaning that not even "my" body is mine as there are so many hundreds of billions of little bacteria and viruses living inside me, looked at it from this angle, what i call my body is more like a collective of

beings sharing the same travelling vessel, like hundreds of people sharing the same train to move "their" bodies from one place to the other
but of course there is also an other side to the whole border topic ... and that is as long as human beings are earthbound what means as long as they rely on food grown in the soil and they rely on a permanent immobile shelter aka houses built on the earth, there is a natural tendency of the majority of human beings to settle in one place and try to build up some societal and physical structures in term of housebuilding, agriculture, workshops what rely on a certain understanding between each other that if not property the house one lives in and the land one uses to sustain oneself with enough food for oneself and ones family, ones workshop ... i would say just a decent amount of space to sustain oneself and a few loved ones perhaps ... that could be looked at not necessarily as property but given from the community either of the local group of human beings or all humanity on earth ... as a loan for lifetime what has no debts and no duties tied to it, no one needing to pay taxes or rent or being called to serve in the army etc ....
what i am talking here about is that it is natural for someone who grows its own food or works in a workshop producing some artisanal tools, clothes, etc. ... its normal and decent too to want to remain firm in one place ... so therefore some sort of soft borders could then come into use in such a setting where people understand the basic sillyness of property
sort of ... altough i know this land (or body or subreddit ...) is not mine and it can never be posessed by any other human being or group of human being
because
property is theft
and to steal something is not good really
of course there are exceptions ... like if someone is really hungry and there is plenty of food going around but just this one person is not allowed to partake in the eating because there is some coins missing in ownership, someone had a bad luck and lost all of ones stuff including the money ...
of course then stealing to save ones own survival might be the only

option left
to again come back to the question here ... when i thought about myself being tired of identyfying myself with a name given by other human beings ... i have chosen the name earthchild as one example how a single human being can free itself out of that birth certificate mental prison most every human being on earth nowadays is locked in just hours or days 0after its birth
5 months before today i searched for the term earthchild on a internet searchmachine and did not find any commercial thing also did not notice any japanese manga stuff related to it
i have laid out the reasons why i do not think its necessary or even moral ethical proper to make other people moderators of this subreddit ... people who have no interest in the philosophy behind the earthchild concept ... a philosophy what asks for the human species to release the single human being out of that control grip the nation state and the regional state today puts onto the single human being demanding everyone to wear a name what is written in a file or a database owned by the state, the name connected to birth place and time of birth, name of father and mother and finally ... association to this or that nation state
this space is meant for those who want to live free from control, who do not want to control others and do not seek to be control
a free space for free beings
neither nation nor state

https://www.facebook.com/mayloveheal/posts/5188275194529601
6th february 2022

i would love to celebrate that declaration of the pandemic coming to an end and the coronavirus being looked at something to live permanently with ....
i would love to be able to wholeheartedly say that this is a win for those who have resisted the tyranny
but to me it looks more like

the global bunch of sadists wanting to establish a global tyranny based on pharmaceutical drugs and state-controlled personal healthcare no-choices/impositions ...
they simply retreat or are satisfied with this first round, the trial
they have sucessfully tested out the willingness of people to follow their evil domination scheme, are satisified with the high amount of people who are willing to letting themselves being coersed to trust into a pharmaceutical product instead of their very own body intelligence also known as immune system
me personally, i am looking forward to see people again ... i have spent now perhaps 3 months without going to town as i could not bear the sight of masked people anymore
it makes me a little proud of myself that i was able to hold myself back from travelling, it gave me strength to experience that i sucessfully retreated into myself (... partly, there is still the internet running 10 hours and me glued to that screen much to much ...) so i did not take any of them silly covid-tests and have not asked for any of that pharmaceutical chemical cocktails during the last 2 years
i am recently trying to better myself in terms of chewing well but i have had this habit of gulping down food all my life and its really hard for me to hold myself back from wanting to experience that drowsyness what arrives of a stomach full of not properly masticated food ...
i have a tendency towards alcoholism so i use overeating in the same way others drink too much alcohol ... to forget about the problems of the world and sink down into the stomach ... direct the blood flow away from the brain into the middle of the body
 i am also observing myself to stay inside the house much too much, as if i would start to devellop a fear of going out ... me who has been in the forests and at the wild rivers for so many days in the time before medical tyranny became a thing
mmmh... i wish to everyone that choices may be with all of us at all times, that we all might be able to choose wether to be inside or go outside of the house, wether we eat a lot of food or only a little, wether we want to be with other people or on ones own, wether we want to take this or that substance or pharmaceutical drug or wether we prefer to nurture strengthen ourselves with plants not heavily processed
choice is near to freedom, true choice

to dive into the topic of how to possibly look back to these 2 horrible years of state abuse ...
at its very core ... the challenge is to look beyond that extreme exageration of the control matrix we experience since march 2020 what seems to end soon ... or is to be halted, rested for some time untill the next scary theatre show is ready to be performed... untill a next virus is being chosen by the evil power broker people as the bogeyman to chase ...
i believe that for us who believe in the human being not needing anything what a fellow human being produces but all we truly need is to connect to mother earth and father sun ... connect our bodies to the elements again to become a decent member of the web of life again ...
i believe for us the challenge could be to focus on the very control grid what the international framework of nation states has been constructing since around 170 years or so
looking at it from a perspective beyond that silly covid-medical-tyranny ... the people all over the globe who believe in fairness, self-determination, love to each other and the elements ... some of us have been tricked by the globalists and are now on the international law framework bandwagon what makes a global bunch of lawyers band together to equalize the legal conditions most everywhere on the globe ... of course they put human rights and environmental awareness, animal protection etc. in front of their efforts as a propaganda shield ... but looking at it carefully ... a lot of the international legal framework efforts are are about enabling investors to sit anywhere on the globe, wether its in switzerland or dubai, wether its bejing or the bahamas ... and with a mouseclick anyone can shift thousands, hundred thousands, millions of money from one investment to the other, buying houses there, investing in fossil fuel projects at the other place ... and thanks to the digitalization of everything now the hurdle for these kind of investments has sunken to a very low ... i have seen recently apps for smartphone what allow participation in these social and environment wrecking investments starting at a few hundred dollars or even less
but how is this all possible ... its possible because of that very basic mistake we human beings are engaged in ... we have allowed ourselves to invest our belief in the nation state and the regional state ... the very concept of the state as the biggest authority is what is the problem at

its root, compared to that the whole covid episode is perhaps best to be looked at as distraction for some but for others who want to see the root of all evil ... its an eye opener ... the empire shows its teeth ... in times when more and more people sense the possibiliites what digitalisation can bring and advanced technologies ... the same tools what are used to invest in havoc bringing projects can also be used to finance solar panels installed in the desert run by a cooperative or to microfinance family vegetable gardens in places where people struggle to sustain themselves ...
as one can read in the texts i have written recently here in my facebok posts as well as the compilations of texts i have archived online such as ...
archive.org/details/dissolving_all_hierarchies ...
the sollution as i see it is to understand how the empire is still running the show
not much has changed since mother mary was being forced to travel, to risk her life and that of unborn jesus just to satisfy the tax asessment desire of the roman empire
today the empire masks itself but it can clearly be seen in the international law framework
as far as i can understand the only way out, the only way to starve the empire is to cut ones own mental and emotional energy supply off ... the only way to permanently win is to stop feeding the monster what is the global club of nation states ...
and instead funnel ones own mental and emotional energy towards the self-governing local community
the local community, the village/town/city-district being its own absolute political sovereign ... all children, youth and adult permanent members of a local community acknowledging each others same weighted voting power so that the circle of equals ... like it was envisioned in the french revolution ... libertee, fraternitee, egalitee ... freedom, sister/brotherhood, equality ...the systemic transformation was not completed then but the inequality has been preserved with the nation states hierarchic representational democracy ...
what i am talking about is to loose the overarching of the nation state dominating the regional state what then orders the local community to do this or not do that ... i am advocating for a future where millions of

villages/towns/city-districts all over the globe interact with each other in a bilateral or multilateral relationship ... each local community choosing wether it wants to be green or mean, wether it wants to welcome refugees or refuse them ...
perhaps one aspect of this whole big pharma and big agrochemical producing companies trying to get a ride by a bunch of corrupted politicians bought by oligarchs ... one aspect could also be for us ... we the people ... to find our very own dignity
to whom are we going to turn towards when it comes to protect our choices ... is it to those empire style structures what the nation state employs, soldiers/police paid by taxes coersed ... or is it the local community, the people who are our neighbours
during the last two years it has shown that a majority of people rather side with the corrupted state employees bought by evil poison sellers ... siding with the empire now has serious disadvantages such as risk of loosing ones natural immune system thanks to not trusting it, thanks to sabotaging it with chemical cocktails made by companies what have a record for not telling the truth
but again to look beyond the whole abuse regime built around covid ... even in times of medical choices ... i believe that the nation state dominates regional state dominates local community ... this hierarchy takes away the dignity of the people who are each others neighbours ... what good are human rights if they are being forced trough against the consent of ones neighbours ...
therefore i remain confident that fairness and equality, environmental and social carefull behaviour ... a mind what enjoys others to be well ... it can only come to existance trough voluntary choices and never trough laws and violence applied by the state ... the only place where true solidarity can rise is the circle of equals ...all children, youth and adult permanent residents of a local community acknowledging each others same weighted political voting power, all permanent residents of all ages invited to participate in all the political decision findings, to create all the rules and judgments what are valid here and now in this local community

https://www.facebook.com/maloveheal/posts/5101661659857622
16th january 2022

the empire has sustained itself during the last 2000 years, has been feeding on the very weakness of human beings, a weakness of character what accepts bribery, gold, diamonds, saphire and rubies, privilege and titles, evil people corrupting their fellow brothers and sisters to join the evil global club what positions might before kindness, what upflifts sadism and cruelty to a standard way of behaving with each other
the deconstruction of the empire is first and foremost an exercise what happens on the mental realm, its logic and reason what brings the single human being searching for a good path forward to a possible conclusion ... to turn its back towards them cunning evil tricksters who intend to instill into the single individual human being a feeling of one being part of something bigger when jet-setting from one place to the other, working for them global multinational corporations, salary soldiering year for year executing the commands of them ultrarich bosses designing the economic atmosphere in japan and kenya, in borneo and finland, in argentina and the netherlands
the empire in its current masquerade, as it has clothed itself at the moment ... it consists of more than 200 nation states interacting with each other like clockwork under the umbrella of international law frameworks, allowing people from everywhere to invest money into local markets everywhere and thisway disturb the local economy at a major scale
while freedom of movement for every human being and every animal being certainly is the most important value of a progressive human society, just to be followed by freedom of assembly ... the freedom of markets, privatly owned money and wealth being transferred from one city to another, houses and land, companies bought by people not part of the local community ... this freedom of markets is a delicate one, one that needs in my understanding the approval of the local community: do we who live here and now in this local community as permanent residents want to welcome this or that size of money investment, do we want to welcome this or that sort of business activity within our local community

as i understand it, a decent and humble human being or one that aims to become again decent and humble ... seeks a path where the single human being does not kill a fellow human or animal or tree being, a path where the single human being does not enslave fellow human, animal and tree beings, a path where the single human being does not harm the fellow human, animal and tree being but seeks to live in harmony with fellow human, animal and tree being

i do highlight the trees before their fellow plant sisters and brothers because trees have the ability to live hundreds of years in the same body while most other plants have a much shorter life cycle of one, two or three years

i believe that being good, being decent and humble is not difficult

its not difficult to know what exactly is a behaviour what supports life and what exactly is a behaviour what kills fellow living beings

the empire can only survive as long as we who aim to walk the path of decency and humble goodness allow ourselves to participate in their illusion of globalisation

i am continuosly negativly fascinated how them globalists have convinced such a big number of people that it would be a good thing to ship millions of tons of wares from one place to the other at all times, wasting precious fossil fuels in the process, killing fellow human beings via air pollution in the process, polluting the seas with the fossil oil fueled container ships

i find it about the same sort of prank or trick they play with us as they actually try to convince us that the human being would not be able to learn from a virus on its own, that most every human being would need the assistance of some stuff being brewed, mixed together in some laboratory and factory by some fellow human being

its the same sort of deceipt ... they try to make us believe more in that artificial stuff than in the very natural source of strength what comes from food grown without pesticides and grown without artificial fertilizers as near as possible to where one lives at this very moment, local grown foods, air enriched with oxygen by healty forests and free flowing natural rivers, lakes, seas, the human being free to interact or not with everyone on its own terms, the single human being deciding for itself how near of far it wants to be with exactly whom of its fellow human beings at exactly what time in exactly what location

food and toys, garments and tools ... all travelling hundreds or even thousands of miles from one place to the other, polluting air, water and soil
so much stuff being transported so often and so far ... this enviroment wrecking globalisation is weakening the local economy and the local community sense of supporting each other by buying local produce

i see several paths, behaviour routines what can help the single individual human being to not support the evil empire but instead to support the global unity of all beings what are connected to each other with every breath of air enjoyed without a mask, every sip of water being drunk from a natural unpolluted source and every bite of food what is grown localy without harming a fellow human or animal being in its production process

regarding the title of this text ... the evil empire tricks us by creating the illusion of importance, of ones life being more significant and worth to live when doing the cruel stuff, participating in the global wrecking of the environment, the enslavement of animals, the sadism and humiliating behaviour enacted in them hierarchical command chains within the big global multinational corporations, degrading the single employee to a wheel in a big clockwork without much ability to become creative, decide what it wants to do, how it wants to do what exactly ...

every time we buy stuff we influence the future of the production, how food, toys, tools, garments get produced is most of all dependant on the consumers decision

the awareness of the single human being is the biggest factor to decide the course of the future

beside this most important consumer awareness, i believe that i have found two more paths which i have described previously, paths what could help us to design a future without that evil empire in it

path 1) we the citizens of this or that nation state collecting signatures

from each other to demand a vote, asking all fellow voting eligible citizens wether or not they would like to reform the current hierarchical stuctured on representatives relying democracy into
a future democracy what invites every child, youth and adult permanent resident of a village/town/city-district to acknowledge the same weighted political voting power of every fellow permanent resident
a future poliitcal structure where every local community on the planet, every village/town/city-district could be its very own absolute political sovereign, able to create, maintain and interprete all of its rules and laws

and path 2) as i have described at r/earthchild , the single human being understanding the very abuse what happens to most every human being some minutes after its born:
the fabrication of a birth certificate
the composition of a surname, family name, time/date of birth, place of birth, names of father and mother and with it association to this or that nation state
this birth certificate is being used by the empire to stamp a sort of property illusion onto the single human being, to create a veil of assumed ownership the regional and nation state not outright claim but cleverly surround the individual with from the very first few monents it breathes the air of this planet
as a conclusion of the significance what the birth certificate has for the regional and nation state control matrix, documents fabricated to give proove of identity, passports issued, titles of ownership over houses and land being issued based on this very birth certificate
freedom of movement and to meet others being restricted via them state issued documents and passports
as a conclusion of the single human being not wanting to be property of other fellow human beings nor a regional or nation state
the single human being could demand either on its own and or together with an other fellow human being or seven thousand or 9 million fellow human beings, asking, requesting, demanding of both the regional and nation state to delete that birth certificate to what one has never given its consent
and with that asking/requesting/demand to be no longer member of

this or that regional and or nation state, coupled to that could come a further asking/requesting/demanding that alongside each one wanting to be no more enlisted as citizen of this or that nation state, that alongside with the single human individual being released from the control matrix also 1000 square meters of fertile soil and 1000 square meters of forest could be released from the assertion of sovereignity of the nation state, so that the single human being then no more member of this or that nation state could sustain itself planting with its own hands its own vegan food, buidling with its own hands the house/hut it requires for shelter, fabricate with its own hands the garments it wants to wear using plants grown in its own garden
so that the single individual human being now no longer member of any regional or nation state could be

a free being living in a free space what is neither nation nor state

https://www.facebook.com/mayloveheal/posts/5100308516659603
15th january 2022

the empire idea tricks us with the promise of being part of something bigger, more important than ... a good life lived in the circle of equals what we experience now since march 2020 with a small lifeform being declared the bogeyman and a few thousand or tenthousand bureacrats swinging themselves up into the tyrants saddle to demand of everyone to walk now, stop here, now go slow, faster, now show me your dna, then take this pharma-drug etc. ... its a mere excess of the usual control matrix we the majority of people living in so called civilisations have accepted:
our born with freedom to move and meet anyone at anytime we want being restricted, stolen, crippled at any moment by a complicated set of licences, permits, passports, appointments, documents over documents what all are based on the one document most every human being gets branded/certified/stamped with just a few minutes after ones birth:

the birth certificate
the set of data, surname, family name, gender, time/date of birth, place of birth, names of father and mother and with it assocation to which of the nation states
this unique identifier is the stamp or the chip ... the localiser, the pin most everyone of us is pinned with by the empire
the same empire what has some 2000 years ago forced mary and joseph to travel, mary being in her last days of pregnancy, unborn jesus awaited any moment to get born
then it was the roman empire who risked both mother mary and baby jesus life so that they could make people travel to their birthplace for a people census, so that they could better estimate how much taxes they could coerce from the oppressed people of judaea
during the last 2000 years we have not been able free ourselves from the oppression them empire style control addicts standing in our way force upon us, blocking the free passage of every human being ...
but why do we allow them to continuosly herd us into this control matrix ? because them cunning evil tricksters found ways into the hearts of some of our fellow brothers and sisters, they constantly lure them with gold and diamonds, pearls and saphires, rubies and privileges .. with a lifestyle what seems to make a human being feel that all the cruelty, all the inhuman deeds done in the service of this or that nation, this or that part of the empire which might have changed its name and its structure on the surface ... now some more than 200 nation states interacting like clockwork under the umbrellas of international law frameworks ... but the very core of the empire is allways the same
the promise of evil that those who participate to do the evil deeds will feel part of something bigger than just living the simple and humble life being good to each other in the circle of equals
but ....
at all times people have thought long and thorough, have sent out messages to their brothers and sisters in near and far away places:
we too can feel part of something bigger, we who know that humble and decent and good is the better path, we too can feel part of a global unity, we dont need a church for it or an organisation or a set of beliefs even
mmmhh... okay i am challenging myself and the very opposite of the

matrix a bit here, trying to bring it down to the most simple and effective counter-formula, how to resist the lure of the evil empire recently i thought i had brought it down to two possible paths, one being the idea that we who are at this moment citizens of this or that nation state, not that we ever wanted that, not that ever somebody would have asked us wether we want to be free beings living on and with earth or wether we want to be bound into a matrix of rights and duties, rules and laws of this or that nation state ... but anyway ... we who are now citizens of this or that nation state, could if we wanted, collect signatures from our fellow neighbours who too are members of the same nation state and if we could reach a big enough numbers of signatures for a people initiatives, in switzerland where i am citizen of, its 100 000 signatures of 5 million voting eligible adult swiss citizens ... if we could get enough signatures together then we could ask for the law of the nation state, the very constitution of both the regional state and the national state to be reformed for example using concepts such as
---
the local community (village/town/city-district) is its own absolute political sovereign
it inherits all political decision powers both from the regional and the nation state
the local sovereign community creates, maintains and interpretes the full law, all rules valid on its territory are being designed by all children, youth and adult permanent residents acknowledging each others same weighted voting power and inviting each other to participate in all political and legal decision finding processes
all local sovereign communities receive a fair share of all material and financial wealth of both regional and nation state, the size of the share in proportion to the number of permanent residents of a local community
each local community is able to exit both regional and nation state at all times without conditions
---
and the second path would be one where the human beings like me who feel enslaved by them bureaucrats, feel stamped and branded with that birth certificate whom i have never given anyone permission to fabricate it ...

the second path would be the one i described at
https://www.facebook.com/groups/599171354767798
ask and it shall be given
the idea that one, two, three hundred or 4 million human beings in this or that nation state anywhere on planet earth would ask perhaps the very regional and nation states to delete that birth certificate of everyone who does no longer want to be part of this or that nation state and together with this asking/requesting/demanding of ones own birth certificate to be deleted cou0ld also come a question/request/demand for 1000 square meters of fertile soil and 1000 square meters of forest to be released from the assertion of sovereignity of this or that nation state
so that everyone who no longer wants rights and duties of this or that nation state, no longer wants to be part of this or that brand of the empire ... that everyone who wants its birth certificate deleted, would be able to use such a space of 1000 square meters of fertile soil and 1000 square meters of forest to sustain itself in harmony with mother earth
to be a free being living in a free space what is neither nation nor state
and when i think of harmony ... possible also that there comes the very definition of being good ... what really means to live a humble and decent life
and when i think of harmony ... possible also that there comes the very definition of being good ... what really means to live a humble and decent life
as far as i comprehend
its
to not kill fellow human beings, to not impose harm, not kill nor enslave nor threaten any fellow human beings, animal beings, tree beings ... and yes if possible also not to harm the grass altough that would require to be able to learn the art of levitation, to be able to float just some centimeters above ground as well as not need any food except perhaps the molecules what float in the air, the scents of all fellow human beings, animal beings, tree beings, plant beings, elementals trough the air we form a global community at all times, all beings living on this planet interact with each other via the air and the water, via the very soil and the fire

while perhaps its a bit advanced to understand how the fire unites us or how one being loving, liking, being thankfull towards an other being creates a source of warmth by exactly this loving, liking, thanking activity ... the interaction trough air, water and soil is so very obvious when we think how very much most of us feel the need to breath air, drink water, eat stuff what is being nurtured trough the soil
with every breath of air, with every sip of water, with every bite of vegan food i pray
may all beings feel loved, warmed and nurtured

https://www.reddit.com/r/conspiracy/comments/rbcxr0/voluntary_choice_is_good_coersed_domination_is_bad/
https://www.facebook.com/mayloveheal/posts/4955121344511655
8th december 2021

voluntary choice is good, coersed domination is bad
what we experience on a global level since spring 2020 is a coordinated attempt of domination control agents to convince most everyone that coersed domination would be necessary to protect vulnerable individuals
a lot of human beings are insecure about the strength of their own body s cellular networks intelligence, doubt about its capablity to learn from all virus and all bacteria
this insecurity about ones own connection to mother nature is at the core of the abusive concept what blames the virus and the bacteria for the results of a human being neglecting its own health for several years or decades even
viruses and bacteria are sent by mother nature to check up on us, to help us review ourselves, have i done everything necessary to keep my body in the best shape
a human being who is in tune with its body s cellular intelligent network, trusts into its mind, soul and body to be able to adapt at all times, clean out the toxins gathered in ones body both by ones own mistaken actions like negative feelings, destructive behaviour, self-sabotaging actions ... a human being who spends some time trying to reflect on

ones own doings and seeks to improve ones fitness levels on the mental, emotional and physical field ... such a self-responsible human being does not agree with that sales tactic of them pro-coersion domination bunch of governemental employees banding together with those invested in the pharmaceutical industry
voluntary choice is what i believe a healthy life is best based upon
coersed domination is draining both the one who coerses/dominates and the one who agrees to be coersed/dominated
i see a path how we could progress towards a human society what wants to dissolve all coersion/domination, wants to dissolve all hierarchies and seeks to install a core principle of voluntarism what empowers every human being to become strong and independant
on that path the most important could be
the circle of equals, all children, youth and adult human beings who live here and now acknowledging each others same weighted voting power, the full assembly of all permanent residents of a village/town/city-district deciding all matters what concern the local community, creating the full law, all the rules valid on the local territory
where friendship and love flows abundantly, rules need not be
voluntarism ... every human being at all times choosing with whom to be and what to do
combined with a deeper understanding of how nothing ever can be property of anyone or any group
neither land nor human beings, neither animal beings nor trees ... can ever be property of a single human being or a group, whatever fancy names that group may create for itself to feel entitled posessing something what is meant to be in circulation
the very attempt of declaring something property of somebody ... like land or beings like human beings or animal beings or trees ... the very act of declaring a being property of an other being is a coersion and domination, it causes stagnation, blockages
property is theft
the moment i declare my body as my property, i overlook the reality where billions or i dont know how many little bacteria, viruses and other smallest children of mother earth use that flesh and bones, tendons and nerves construct called the human body too
of course to keep it simple ... my body, my mind, my feelings ... my

choice
but when diving deeper into a reality without bias, when looking at what is really going on
we are all connected
every breath we take transports parts of other human beings, animals beings, tree beings ...
every sip of water we drink has been travelling trough so many other fellow living beings bodies and has been learning on this journey from everyone, shared information from one to the other water drinkers
every word we say, every movement we do with our bodies creates waves, vibrations what influence every other being on this planet
i believe that one of the most important things we human beings could do for each other would be
to give each other lots of mental, emotional and physical space so that everyone could experiment, play, research what exactly is it one could excell in, with whom one could best find synergies, where exactly on this planet could one feel the climate and the people resonating to ones one inner character
i propose to us, the human species, that we allow each other free passage, laisser passer, so that every human being could travel the globe freely as much and as far as one feels a need or urge or necessity without anyone asking for .... proof of identity, without police personell asking anyone ... who are you and why do you want to travel from this to what other place
free passage for all human beings so that everyone may be able to find exactly that spot on earth where it feels like...
yes, here i want to ask the full assembly of all children, youth and adults permanent residents of this village/town/city-district wether or not they would want to allow me to stay, become a permanent resident like them here in this place i would like to ask the circle of equals who decide all political matters without employing representatives wether or not they have enough space so that i could make use of some fertile soil and forest to sustain myself
if property is theft, if not land, not a human being, not an animal, not a tree can be property as there is never only one user but at all times a multitude of beings using every square centimeter of land, every human, animal, tree body

then a most logical consequence seems to be, seen from my perspective, that acess to mother earth could be the most important
the human community could help the single individual human being to be in that mental, emotional and physical condition to at all times choose what i want to do with whom, how i want to be where
i guess
the direct contact to mother earth by planting vegetables and building ones own shelter, weaving ones own clothes, picking up sticks from the forest floor for a warming and or cooking fire
seems to be the most simple way how an individual single human being can maintain its independance from the surrounding group of human beings
therefore i combine

1
free passage for every human being, no one asking anyone for proof of identity
with
2
the circle of equals, the full assembly of all children, youth and adult permanent residents of a village/town/city-district .. acknowledging each others same weighted political voting power to find all political decisions without representatives elected, creating the full law, all rules valid on the territory of the local sovereign community
with
3
an ideal that every human being everywhere on the planet could ask the full assembly of all children, youth and adult permanent residents of a local sovereign community
for 1000 square meters of fertile soil and 1000 square meters of forest to use for sustaining oneself, not enslaving nor killing animals, not killing trees but use the sticks picked up from the forest floor for the warming and cooking fire, plant hemp to weave ones one clothes with its fibres, burn the inner part of the hemp stalks in the oven, enjoy the seeds as protein and healty fat rich food, drink some tea brewed with its flowers and or bake some cookies with them ...
---

i have also thought about a way how we the citizens of this or that nation state ... we never really been asked wether or not we wanted to be member of this or that nation state as there was no other choice really ... the whole planet seems tightly occupied by an interlocking grid of nation states bonding together via international law frameworks ...
i have thought how we as coersed to be citizens of a modern western nation state could make use of them legal tools many states have inbuilt, both regional and nation states ... tools like for example the peoples initiatives
we could collect signatures from each other to demand a public vote for a renewal of both the regional and nation state constitutions, using concepts like:
---
the local community, the village/town/city-district ... is its own absolute political sovereign
it inherits all political decision powers from both the regional state and the nation state
the local sovereign community creates, maintains and interpretes the full law, all rules valid on its territory
all children, youth and adult permanent residents acknowledge each others same weighted political voting power and invite each other to participate in all political decision finding processes
all local sovereign communities inherit a fair share of all material and financial wealth of both regional and nation state, the size of the share in proportion to the number of permanent residents
each local sovereign community is able to exit/quit/leave both the regional state and the nation state at all times without conditions
----
the beauty of such a radical decentralised state constitution what empowers every child and youth to have the same weighted voting power as an adult ... could also be seen in that splitting of material and financial wealth of the quasi abdicated states
and so it could be very well possible that a local sovereign community via its full assembly of all children youth and adult permanent residents would for example use the inheritance from both regional and nation state to buy as much fertile soil and forest from private "owners" as they would be willing to sell .... because they would perhaps want

everyone to have what they have ....
that deep grounded security what some land can give where one knows that one can stay ones whole life on it and one will allways be able to care for oneself, feed oneself, life in a house built with ones own hands .... never needing anyone to ask for anything but allways be self-sufficient
to come back to the very beginning of this text ... where i diagnosed the insecurity of many human beings about their own bodies cellular networks (mmmh... i keep using that concept of ... ones own body ... when really nothing really can be owned as there are allways multiple beings using any body)
... the doubts into the bodys immune system strength diagnosed as the main entry where the suckers, the evil coersion and domination fans gain acess to many peoples lives ...
this very physical cellular intelligence network in every human body communicates at all times via the air flowing in and out of our lungs, the water entering and leaving our bodies, the food we eat and give back as compost as fertilizer for mother earth
our very own immune systems would greatly be strengthened by having no more this stress of needing to obey to an employer or conform to the wishes of the person who allows one to rent an appartement or provide all kinds of informations to this or that social welfare organisation
i believe that it would be the single most effective health supporting action we human beings could do for each other ... help each other so that everyone could have acess to
1000 square meters of fertile soil and 1000 square meters of forest
as a free of cost, free of tax demands
loan given for a lifetime
the psychological calm what results from never again having to worry about how to earn money to pay rent, never again having to worry about finding a job, passing an exam
it could be all gone with the wind of change
if we want it, if we are truly ready to see that moment we suffer from a bunch of controll addicts gone into overdrive with them covid-certificate and vaccine-coersions
as the tip of an iceberg what consists of a many thousands years old

tradition where we human beings were not able to get rid of that empire syle coersion domination mindset
the same behaviour todays modern western nation states show ... asserting sovereignity over land and people, telling people who is allowed to travel from what place to what other place ...
the same behaviour was exercised a little more than 2000 years ago when mary carrying unborn yet jesus under her heart was coersed by the dominating roman empire to travel to her birth place to participate in a people census so that the greedy opressor could asess how much taxes they would be able to force the opressed province of judaea to pay
the covid-tyranny is only an episode, an exageration, the control-grid being pushed into overdrive...
the real mark of the monster most all human beings since thousands of years have been using to travel from one place of the other ... are these birth certificates or proof of identity papers/documents/ travel passports
as long as we keep electing representatives into that hierarchy of nation state dominates regional state who again tells the local community what rules it would have to obey .... as long as we support regional and nation states asserting sovereignity over land and human beings, we will be vulnerable to attacks of the monster
the monster eventually being a collective split of, a rejection of our collective sub-councious urges to destroy, torture, induce pain to others and feed the horror dimensions
i believe that we, the human species, are able within a few years to reform political structures in many places on earth so that no newborn human being would be marked anymore with them unique identifiers in form of birth certificates
i have recently written about such a concept free from any coersion/ domination
what could be called/named
"free space for free beings"
neither nation nor state
all over the planet human beings asking regional and nation states for their birth certificates being deleted, their never given any consent for membership in this or that state canceled and them being released from all demands of the state together with 1000 square meters of

fertile soil and 1000 square meters of forest
i wrote about it at
https://www.facebook.com/groups/599171354767798
and
reddit.com/r/earthchild

https://www.facebook.com/mayloveheal/posts/4950349321655524
6th of december 2021

i have recently started
https://www.reddit.com/r/earthchild/
and
https://www.facebook.com/groups/599171354767798
where i wrote about my observations regarding the very foundation of the global control grid what the league of nation states have constructed via their international law frameworks
the very core of it is the asserted sovereignity of the regional state in concert with the nation state ...over land and human beings born on this land
the birth certificate what is being fabricated for every newborn human being without its consent ... this set of data is used as an unique identifier and somewhat is being pushed onto the newborn similar to how human beings put earmarks on animals with numbers on it
altough it is not expressly mentioned, the birth certificate is being used as an anchor for a mindset what might let one or the other think of citizens, members of nation states never really having a real choice but being somewhat handled as property of the nation state one is born into and or parents are associated with
but its all a fiction
no one human being is born with an ownership mark
all human beings, all animal beings, all trees... are born free
and in the very same way is the land free
not one square centimeter of land has ever been the property of a single human being or a group of human beings whatever fancy names the group gives itself
all land is part of mother earth who is a sentient being what allows

humans, animals, trees to interact with her ... live in harmony with each other and try to not harm each other
as a consequence of these observations ...
i see a potential for
a free space for free beings
neither nation nor state
but a space we human beings would ask for ... to be released from the assertion of sovereignity this or that nation state has previously put on the land
i suppose
1000 square meters of fertile soil plus 1000 square meters of forest could be a decent space a human being could ask to be released alongside with every human being who is willing to give up membership/citizenship of this or that nation state and call itself an earthchild, a starchild or a member of the one cosmic family of all beings or whatever else one would want or not name itself
i see a possibility how hundred thousands of human beings across europe could form such a
free space for free beings
living on that 1000 square meters of fertile soil and 1000 square meters of forest given to every free one
free space for free beings
what
each one could ask for on its own or we all together could ask from this and that nation state to be released
ask and you shall be given
its not a super precise technique i guess or i am just to stupid yet, not grown fully yet to apply the principle in its entire scope
sort of spend some serious time painting that scenario behind ones inner screen, dive into imaginary journeys how could that be, that better tomorrow
where no one human being would demand anything from anyone else
when no one human being would feel the need to end a life of an animal or a tree or harm a fellow human being
but we would all or most all ... find the pleasure to be good with each other, sort of not be good to others because one is supposed to
but be good because it really does good, it feels good, it gives

satisfaction to see a fellow human being, a fellow animal being, a fellow tree being live up to its fullest potential, enjoy freedom ... enjoy being free from dominating an other one and being free from being dominated
there are numerous ways to think of, capabilities, possibilities, who could give what amount of space towards such a
free space for free beings
what courts or parliaments, what media or presentation
could the asking take part
all the details of the setting who would in what strength of numbers ask or even demand ? ... perhaps even make a list of all them attrocities, all them abuse we have endured, we who were never asked if we wanted to be member of this or that nation state or if we instead would want to be just
anything but that what other people think about
all them duties we suffer under, duty to get tortured 9 years via compulsory education, duty to join the army, duty to pay taxes, duty to pay rent ...
all them restrictions we suffered since thousands of years ... restrictions of freedom to move where ever we feel like, restrictions to meet whomever we want
i keep thinking about mary who carried unborn yet jesus under her heart ... how she surely would have preferred to not go on that journey in this latest stage of her pregnancy, surely she would have preferred to not risk both her and unborn jesus life .... but the roman empire forced her to travel so that the
greedy opressor could asess the amount of taxes what the opressed people of judaea could be coersed into paying
since more than 2000 years allready we keep pinning each other down to that place of birth, association to this or that family and with the mother and father connection also the connection to this or that nation state
we keep up them fictional borders and territorial dominations, we keep employing police personal demanding from travellers to ask ... who are you and why do you want to travel from this to the other place ...
and its all wrong
no one human being really has a moral ethical ground to hinder another

human being to travel from one place to the other, whatever the reason for the travel may be
my body, my choice ... where i want to move my feet towards, if its west or east or north or south ... is no one elses concern but me and mother earth and all fellow human and animal and tree beings i meet on my way ... if we get along with each other, why would anyone need to know what background i have
i believe in the circle of equals, all children, youth and adult human beings who are permanent residents of a local community acknowledging each others same weighted voting power ... all who are each others neighbours deciding all what concerns everyone, the local sovereign community creating the full law, all rules what are valid on the territory of this village/town/city-district
i also believe that every human being should receive the possiblity by each other human being to travel the globe freely so that one could truly search for that bunch of fellows where not much disagreement happens but the values fit so nicely together that most possibly
love and friendship do nullify the need for any rules

https://www.facebook.com/mayloveheal/posts/4944823982208058
5th december 2021

why a global laisser passer ... all human beings letting each other travel without asking for proof of identity ... could help us all in our evolution
i was quite happy yesterday, i started to like my newly found absence from writing so much ... so i got surprised somehow between the watching of two movies i saw some politician for a moment mentioning the word "mandatory vaccination" (in german) which after some minutes into the second movie made me go and look for it ... and yes, to my greatest surprise it seems according to a newspaper article from yesterday that the nation state of austria, about 300 kilometers east from where i live... austria is preparing to introduce a broad mandatory vaccination with monetary fines for those who do not comply

i dont know the austrian law so i could not say what would happen to those who dont pay the fines after they did not show up for their given against their consent appointments for the injections they never requested
but it made me think of how i would react in one of the worst situations i could think of
for example ... if sometimes within the next half a year the majority of swiss citizens eligble to vote would ... god and the godess help us to prevent it ... if the majority of the people i live with would want to opress the minority of people by forcing a mandatory vaccination
if they would even close the last wiggling out opportunities by implementing it so strict that it would be either taking the poison syringe or prison
then i think the most logical consequence would be to flee into an other area, another country which would have (not yet) a mandatory vaccination and apply there for political asylum
my argumentation then before the people who would decide wether my request for political asylum would be accepted or denied ... my argumentation then would be something like this:
i have the fullest confidence in my own body to be able to meet all the requirments mother nature via her daughter mother earth asks me to ...
i am aware that this body i wear, this marvellous ingenious setup of bones and flesh, tendons and nerves is a near to perfect system where all the billions of body cells constantly talk to each other and every virus and bacteria what enters the body can be understood by the local intelligence network every human being hosts, it is also known as the immune system
during the last 20 months since march 2020 when the director general of the world health organisation has put every human being on a wanted list by saying
"find, test, isolate, treat and track every case"
of a human being carrying the coronavirus
since march 20 months i have not visited any medical doctor nor have i made ever a covid-test
i keep myself healthy by spending time in myself, writing about my thoughts and feelings, choosing at all times what to do with whom, where to go or not, eating foods which are minimal to not industrially

processed, vegetables and fruits grown without pesticides
therefore i have no need for any pharmaceutical products and i feel my bodily integrity being threatened by a majority of my fellow swiss citizens who have decided to demand of every human being living on soil occupied by the swiss nation state to either take that chemical cocktail injection or either be sent to prison
i do not fear bodily harm coming from the pharmaceutical products they call a vaccine ... altough i think that anything a human being is given against its wish, anything done to a human being against its consent is harming both soul and mind as well as the body ... i do not fear the harm coming from me potentially being physically abused via a syringe being injected into me without my consent ... i do not fear it because i know that i will most possibly be able to flush out such a potentially harmfull intruding substance containing possibly commando sequences of codes/algorithms wanting to speak to my genes as well as the chemicals
i have been practising fasting with water and drinking all of my urine i give out in a day, it has helped my tremendously many times to free myself of all what much what did disturb me
why then ... would i want to ask you, citizens of a country i am not born in ... why would i want to ask you for political asylum if there is a big enough chance that i could neutralize potential harmfull effects of a potentially forced upon me vaccination syringe
why if not my phsyical survival is at risk because i know how to fend off harmfull intrusions into my body ... why would i ask you to be accepted as a temporary guest in that area what has no mandatory vaccination
the main and biggest reason i could give you
to uphold, to honor the human dignity
i ask you to help me save my dignity as a human being what requires that i do not allow someone to introduce anything into my body i have not chosen to be allowed introduction into my body
for the sake of my soul and mind integrity, i ask you, help me to live in a space where i can decide at all times what i want to introduce and what not into my physical body
---
but ... what has this hypothetical scenario ... the people in switzerland eligible to vote have about a week ago decided with 62 percent

majority to accept the covid-law, a law what somewhat accepts all the abusive restrictions of freedom to assemble and all the other harassments done to us during the last 20 months by governemental employees ... a covid-law what transports some of previous emergency laws into standard law
while this in itself is a quite dystopian depressing political reality, there is not yet a big tendency to be seen for broad mandatory vaccination to be pursued in switzerland ... and i do hope it will never become a topic really
but why do i use that hypothetical scenario in a text titled ...
"why a global laisser passer ... all human beings letting each other travel without asking for proof of identity ... could help us all in our evolution"
because the very sentences i use in my hypothetical plea for political asylum at the end ... the sentences about human dignity ... could also be applied in defense or advocating for every human being who feels the urge, feels the need, feels the necessity to travel from one place to another
wherever a huma being feels not safe as ... the survival of ones body being threatened by violence and or a lack of fresh water and healthy food, a lack of free movement in naturally oxygen enriched air ...
whenever a human being feels that the surrounding group of human beings are aiming to harm an individual human being
then the individual human being choosing to flee that unsafe place is not only the best choice for its own survival but also to uphold, to honor the human dignity
and here comes then also the widening of the narrow threat of being physicly harmed ...
the human mind and soul also suffer from situations where a human being is not able to live according to its needs and wishes, anytime one can not choose freely with what to nourish itself but is being told by others what to eat, drink, smoke, inject or not into oneself, anytime a human being is forced to wear clothes when one does not feel the wish to wear those movement restricting body coverings, anytime a human being is restricted to meet with others and move outside ... at all this times the human dignity is violated
so yes, every human being who feels not respected in the way it wishes

to nourish itself, move its body, cloth its body, meet with others when and where one would like to
every human being feeling not happy with how the human beings surrounding it treatening it ... would best be given a global laisser passer ... everyone feeling the need to move from one place to another not being hindered to relocate, not being stopped by anyone asking for proof of identity and or reason for travelling
or to even furher dissolve all the conditional thinking connected to travelling
we are born free
nowhere on our body has the creator or the godess branded us with a tatoo saying:
"this item belongs to nation state xyz, it requires regular injections of pharmaceutical chemical cocktails"
this whole control matrix we live in since about more than 2000 years allready ... since mary carrying unborn jesus under her heart was forced in her 8th month pregnancy to travel to her birth place to participate in a people census, the roman empire forcing her to risk both her and unborn jesus life for what ... so that the roman empire would know how many citizens live in the opressed province of judaea and how much taxes they could coerce from them
this whole control matrix we adult human beings continuously refresh by demanding every newborn being stamped/branded/birth certificated by a set of data what composes together into an unique identifier ... this whole control matrix based on birth certificate, proof of idenity cards/ papers, travel documents issued by governemental employees, this whole mindset of us human beings employing police personell to stop others asking them for who they are and why they are aiming to travel from one place to another
it is all insane
it is deeply wrong and highly immoral
no one human being has any moral ethical grounds to stop another human beings passage, travel
mmmh... actually i see one case, one reason why someone would want to hinder someone elses passage ... to protect a space what is reserved to a group of human beings who need special protection from others wanting to invade a space without a need but a desire to enrich

themselves by robbing others from their existential survival guaranteeing foundations, one example i see the invasion of people searching for gold and while taking the gold also destroying the delicate balance of places such as the amazonas area, i fully understand a group of people who have lived allways in the forest on their own not accepting the destructive intrusion of metal/mineral/fossil fuel extraction thieves

https://www.facebook.com/mayloveheal/posts/4922818101075313
28th of november 2021

no one human being has any moral ethical ground to block another human beings path
the whole certification madness we are into since the roman empire coersed mary with unborn jesus to travel in her eight month pregnant to her birth place to partake in a people census ... this whole control matrix based on birth certificate, identity card, proof of identity, travel passports is deeply abusive and it reduces the single individual human being to feel owned by the group it is born into
i am opposing it and i recommend to us human beings, let us change it, let us remove all control measures over each other and abolish, dissolve all demands onto each other so that every human being at all time can choose wether or not it wants to share a name or a birth place data with anyone else
i recommend to us human beings that we might use the tools we have in most modern nation states to collect signatures from each other to form a people initiative with the goal to renew the regional cantonal states constitution and the nation state constitution
so that we might leave that hierarchical representative electing democracy behind and enter into a future where everyone invites everyone to participate within the local community to create the whole law
the circle of equals where all children, youth and adults who live here and now in this village, town, city-district acknowledge each others same weighted voting power and all together without representatives decide all the political matters, create the full law valid on the territory

of the local community
we could use for example sentences like the following to renew the state constitutions:
---
the local community, the village, town, city-district ... is its own absolute political sovereign
it inherits all political decision powers from the regional cantonal state and the nation state
the local sovereign community creates the full law, maintains it and interpretes it, all children, youth and adult permanent residents acknowledge each others same weighted voting power and invite each other to participate in all decision findings
all local sovereign communities inherit a fair share of all material and financial wealth of both the regional cantonal state and the nation state, the size of the share in proportion to the number of permanent residents of a local sovereign community
each local sovereign community is able to exit/quit/leave both regional cantonal state and nation state at all times without conditions
....
after such a radical decentralisation of political decision powers and the welcoming of children and youth into the circle of equals ... the question of who is a permanent resident of a local sovereign community could also be solved without asking each other for proof of identity, without pinning each other down to that birth certificate or identity cards
for example witnesses could be called to give testimony of how long they have known a human being to live in that local community and thisway a network of trust could be built upon not papers or registries but knowing each other by living near to each other
but then perhaps even more important than to relieve ourselves of that control matrix based on birth certificate, identity cards, travel passports .. could be to create such a law what too would give most free space as possible inbetween human beings ... mental free space for free human beings to meet each other and agree on the terms of exchanges in that moment of the meeting
a very minimal law foundation what would allow most of the modalities of interaction to happen in the moment between those who choose to

interact
i could see such a minimal law frame for a local sovereign community using sentences for example like:
---
we, the children, youth and adult permanent members of this village/ town/city-district acknowledge each others same weighted political voting powers
we create, maintain and interprete the full law, all rules valid on the territory of this local sovereign community
in our everyday interactions with each other we trust in the goodwill and the benevolence between us, that we want to find mutual satisfying ways of exchanging thoughts, words, touchings, movements, services and wares between us
whenever one permanent member of our local community or a visitor who was / is in contact with a permanent member ... has any reason to complain and or needs the mediating help of the greater community, the full assembly of all permanent members of the local community can be called and the circle of equal will give its best to help solving any disagreements
---
from my point of view, every human being would best be able to decide at all times wether it wants to live alone or with whom it wants to interact
to enable every human being having the possibility to live on its own, some decent acess to mother earth would be helpfull as to build ones own house on it and grow ones own vegetables, grow some hemp with what one can then fire the warming and cooking fire, use the fibres to weave some clothes for oneself
1000 square meters of fertile soil and 1000 square meters of forest, given as a free of rental demands, free of tax demands
loan for a lifetime
by the full assembly of all children, youth and adult permanent members of the local sovereign community
as i wrote above the proposition of dividing the material and financial wealth of the regional and nation state to be distributed to all local sovereign communities ... it would be up to each of the local sovereign communities wether they really would want to do such a thing, use the

inheritance of the abdicated regional and nation state to offer owners of farmland and forest to buy their land and bring it home into the stewardship of the local community to hopefully keep it there for a long long time
or if a local community would perhaps think of other ways to support its permanent members of being able to live a life free from needing to submit oneself under the command of an employer or needing to apply for an appartement to rent ...
surely there are possibiities like hydroponic and aeroponic grow systems what would allow indoor vegetable food farming for example in a city appartement what could be given by the local community to every permanent resident for lifetime, with no rental demands and no tax duty ... so that some sort of self sustainable lifestyle could also happen in an urban setting
but to continue arguing for a low tech version ... a lifestyle what would not need one drop of fossil fuels, not one kilowatthour of electricity, not one car on the road nor any lorries transporting stuff needlessly for hundreds or thousands of kilometers ... a lifestyle without television, radio or computers ... withour any machines ... all one would hear would be the laughing of children playing all day long their fantasy roleplay games, climbing onto trees, bathing in the wild rivers while the adults would perhaps sing some songs alone for oneself or together while doing the gardening maintance, building them houses using natural materials like clay, straw, hempstalks, sticks found on the floor of the wood, stones, recycled materials
in the space today ocuupied by the nation state switzerland, there are about 10 000 million square meters of land beings used for agriculture, it could be given a market value of 100 billion swiss francs
the same space switzerland occupies holds about 13 100 million square meters of forest what could be valuated with 30 billion swiss francs
the 26 cantons, the regional state forming the swiss federal nation state, they own together about 55 percent of the swiss national bank, the one who decides how much swiss francs are in circulation
this a little more than half of the swiss national bank has an approximate market value of 300 billion swiss francs
with less than half of only this part of the swiss public wealth we 5 million voting eligible swiss citizens could allready today offer private

farm land and forest owners a decent price and bring home all open land into the stewardship of the more than 2000 local sovereign communities
today we are about 8.4 million human beings who live in switzerland ... assuming everyone would be given the opportunity to use 1000 square meters of fertile soil and 1000 square meters of forest to sustain oneself ... we could even invite another 1.6 million human beings to come and live with us, for example from those 80 million human beings who lost their home because of war and extreme poverty
we could be 10 million human beings living in switzerland without using one machine, without using one drop of petrol, without enslaving one animal and not killing any animals, without killing one tree as we could plant hemp on that space what before was used for the enslaved animals
and just to also mention the most obvious ... in such a lifestyle ... near to earth, no one being dominated by any other one, covid or any other pathological fixation surely would vanish instantly
as its all a fiction anyway
no one virus or bacteria wants to harm any human being
on the contrary, the virus and the bacteria, all of them ... come to our help, assist us to detect the garbage we have not properly recycled within our body, they point towards them places within our flesh and bone body where we could invest some love and care, some relaxation and loosening of blockages
i protest against the world health organisation who has stirred up them pharmaceutical sales representatives masking as governemental employees to assert some sort of medical control authority over all fellow human beings
my body my choice
what sort of virus and bacteria i host in my body is none of anyones concern, its my health and i am responsible for it
i think its mean of that world health organisation to put every human being in a role of being a suspect ... who do they think they are to accuse everyone of being a potential danger to everyone else
its a deeply disturbed mindset what found its expression in march 2020 when the director general of that world health organisation has called to "find, test, isolate, treat and track every case"

of a human being carrying the coronavirus
and the control addicted governemental employees in many nation states then used that fast pass forward to unleash all sorts of abusive measures onto everyone abusing emergency laws
and after more than 20 months of everyday control terror ... a clear majority of swiss citizens have voted today in favor of all that by enabling now for the second time all that abuse to become part of the standard law
we basicly live now in a medical tyranny where 62 percent of the votes on the national level are supporting the extension of the control matrix via the covid certificate
even if i am sad that once again people have voted to controll each other even more, to take away each others freedom once more
i do still believe that one day hopefully not too far in the future a window of opportunity will open and someone, perhaps even me, will find the motivation and the energy to collect some signatures to strive for a people initiative to reform the cantonal state and nation state constitutions ... so that every local community being its own sovereign .. could decide in the circle of equals, all children, youth and adults who live here and now as each others neighbours, wether or not health would be a personal privat matter or wether the local community would want to help each other on a voluntary level for example to create an environment where health can grow
---
i just looked up the news about the results of the voting ... makes me happy that some places have said no to the covid-law

https://www.facebook.com/mayloveheal/posts/4920722047951585
28th november 2021

i am continuing to think about the significance of ones own personal actions
especially regarding that covid certificate of which i have been investing

some time now writing against it, blaming it to be the mark of the monster ... the sign of the evil what is being used to control people
recently i found out that this version of the mark of the monster, the covid certificate is not the first one and most importantly ... its not the most important one
what i believe the leverage the monster is given over most every human being on earth who participates in stuff modern people do ... using bank accounts, travelling over national borders for holiday or business ... i believe the original the most powerfull mark of the monster is the birth certificate, the set of data containing surname, family name, gender, place of birth, time of birth, name of father and mother, association to this or that nation state
i understood the significance of the birth certificate to allow society to control the individual human being when thinking about mary who was forced by the roman empire to travel in her eight month pregnancy with jesus because the opressor empire wanted to know who was born where in the occupied province of judaea as to estimate the amount of taxes they could coerce from the opressed people of judaea
so ... coming back to the actions ...
some weeks ago i was all setup to ..like ... hold steel firm on my resolve to never fucking wear such a covid certificate, never give them state employees the satisfaction to see me hand over my spit in a jar to them so they could have the sick arrogant feeling of being in control of me
i remember writing ... even if they are going to do that covid controll madness for 10 years i will not give in and i will never wear the mark of the monster ...
but now i know ... i am wearing this mark of the monster allready since some hours after birth ... the moment the nurse in the hospital put a little bracelet around my arm with a name written on it (i am not sure actually if that happened but i guess they do that sort of stuff in the hospital as to make sure not to accidently switch babies like ... not give the mothers back a baby they have not given birth to ..)
however ... what i am saying here is that since i understood the significance of birth registry for the control matrix what most modern nation states have agreed upon in an international travel regime ... a set of rules what all nation states agree to when it comes to receive visitors from other places

i can not go back to that moment when i thought the covid certificate would be the worst
i know its not the worst
the worst is that birth certificate what functions as somewhat like a branding, a stamping, a ownership mark
i suspect that from the moment a newborn baby receives the surname and the doctor fills out the form for the birth registry entry ... from that very moment on, the nation state asserts property controll over that human being
and that is the portal the evil comes into this world
the moment when one human being asserts an other human being to be property of a nation state
this whole covid certifiaction madness is only a tip of an iceberg, it just shows the deep evil on what our human society is built upon
every time i show this plastic card the nation state of switzerland has issued to me on my request, i paid them to do it, i asked them to give me that card so i could open a bank account or could travel in a train or a plane over a national border
every time i use that proof of idenity issued by the nation state, i give power to the monster, everytime i confirm
yes, i am being controlled by a nation state what treats me like i would be its property
yes, i allow the community of adult human beings identifying as swiss citizens to tell me when i can travel to what place, what i am allowed to eat, drink, smoke or otherwise ingest
so ... that action, that action of carrying around such an identity card with me on what all the other stuff is based upon, the bank account, the contract to rent an appartement, the possibility to get some money from a social wellfare institution like in my case the swiss invalidity insurance (what a cruel name .... i am not invalid, i am a valid person or a valid human being, just i have difficulty to conform to this normal of this society what makes it diffictult for me to earn money therefore i ask an institution of the nation state, an insurance for financial support)
what i am saying here ... i might as well give up that resistance against the covid certificate as this whole covid dictatorship stuff is only an exageration, a concentrated attack of a much deeper control matrix under which most human beings suffer since thousands of years allready

several thousands of years allready we human beings harass each other by pinning each other down to that name and place of birth stuff, asking each other for ... papers please ... proof of identitiy, controlling each others where to go abilites and limiting each others choice of nutrition as well as recreational drug use
and its all wrong
its wrong of one human being to demand of an other human being proof of identity
a name is something what a human being either chooses for itself or not a name given by someone else without the human being expressly asking for it ... is more like a tag, a marker, a property tag like one puts onto a bag when one goes travelling in case it would get lost
no one human being has any moral ethical foundation to demand of an other human being to reveal a name or a place of birth
no one human being has any moral ethical foundation to stand in the way of another human beings passage
to block another human beings journey is wrong
no matter what purpose the journey has, if its for holyday recreational purpose or for survival reasons like fleeing from a place where war and extreme economic poverty make life to be so dangerous one feels the need to flee from that place...
i am longing to see the sea, to bath in the sea again, receive that essence of mother earths big salt water bodies ... also i am longing to visit a place where i could smoke some red libanes hash again like for example in amsterdam ...
of course both of them wishes are small compared to that madness what the covid certificate is and i will try to hold out as long as i can, i will try to not use that covid certificate for as long as i can manage to opress my longing to visit the sea and smoke some hash without having to look around if there is a police personell wanting to bother me (like it is where i live, in switzerland its still not tolerated to buy and consume thc cannabis)
mmmh... actions are important so i will try to hold out some more longer and not give anyone my spit so to not allow them to dishonor me and themselves by doing that despicable act to analyze my spit and decide what virus to have would be okay and what not
who do they think they are ?

what type of virus and bacteria i carry on and in my body is only a matter of me and them little ones, them microorganism
no one human being has any moral ethical foundation to demand to know what virus or bacteria another human being is hosting in its body
my body my choice, my health, my choice how i keep myself healthy and what sorts of virus and bacteria are helping me to stay healthy, its only my decision how i look at them
i do not agree with them world health organisation fuckers stirring every governemental employee to treat every human being as a possible suspect ... as the director general of that who organisation did in march 2020 when he called upon them nation states to
"find, test, treat and track every case"
of a human being carry the coronavirus
i have never given any authoirity to them evil people working at the world health organisation ... how dare they declare the coronavirus to be the enemy when i have not the sligthest wish to oppose any virus
since soon two years now they, a bunch of pharmaceutical sales representatives masking themselves as governemental employees together with them world health organisation idiots are harassing us with that made up hysteria, declaring the coronavirus to be the bogeyman
i have had never a problem with that coronavirus, its my friend as all of them little micoorganism are, i invite them in anytime, anyday i say... welcome little ones, come in and have a look around in my body, please help me find all the trash i have been hiding, all the unprocessed garbage i have been to lazy to recycle, all the blockages i installed in my flesh and bones
actions ... i do believe that this whole madness of nation states asserting control over human beings could be dissolved very quickly
and we could find a global sollution for that control madness by taking away the law making powers from representatives and instead install the local community being its own absolute political sovereign , all children, youth and adults living here and now as each others neighbours creating the full law, we all together decide what we want and what we do not want to
experience in our midst
what we could do, we who are citizens of this or that nation state, we

who have been given the recognition as voting eligible citizen of a regional and a nation state, we could use them legal tools of people initiatives to collect signatures from each other and demand the very regional state and nation state constitutions to be reformed
so that todays hierarchical representatives electing democracy would be transformed into an egalitarian everyone inviting to participate democracy
using concepts like:
---
the local community (village/town/city-district) is its own absolute political sovereign
it inherits/receives all political decision powers from both the regional and nation state
the local sovereign community creates, maintains and interpretes its own full law, all the rules valid on its territory made by inviting all permanent residents to participate in all decision finding processes
all children, youth and adult permanent residents of a local sovereign community acknowledge each others same weighted political voting power
all local sovereign communities receive/inherit a fair share of all material and financial wealth of both regional and nation state, the size of the share proportional to the number of permanent residents
each local sovereign community is able to exit/leave/quit both the regional and nation state at all times without conditions
-----
once we would arrive then at this agreement within each other that the only vessel where decisions are moral ethical to be made for the whole community would be the (full) assembly of all permanent residents of an area, of a village, a town, a city-district
once we would have freed each other from the dominance of regional and nation state sitting on top of each local community trying to make the local living people do this or that, obey this or that rule made somewhere in a central governement administration office building or this or that parliamentary assembly house
once we would be free from being dominated by these hierarchies
the very land we would want to be under no more titles ... we could buy it off the private people who believe that they would own it

we could use these financial and material inheritances of the freshly abolished regional and nation states to do so ... offer a fair price to anyone who thinks owns this or that space of agricultural and forest land me might put that stuff then again in to some sort of writing ... but the wording of that would need extremly cautious wording as not to do again the same mistake as has been done the previous thousand of years
a future document would perhaps say
---
on the fifth of november 2025 the (full) assembly of all permanent residents of this or that local community, this village/town/city-district has payed the amount of this and that much swiss francs to these people to release the land they believed to be in their posession
this and that parts of land are now free from any attempts of being titled property
they are now under the stewardship of the (full) assembly of all permanent residents who live in this area
we will strive to give every single permanent resident, every human being who wants to use some of that land under communal guardianship (or however we want to call this state of existance where we would like to make use of the land but we know we dont own it)
we want to give fair acess to land to everyone who wants so
1000 square meters of fertile soil given to every human being alive on earth, free of tax paying duty, free of rental demands
a free lease valid a lifetime
but how could this possibly all work without birth certificates
it would rely on testimonies of each other ... the full assembly of all permanent residents would have the judging authority ... the legal full powers residing allways with that vessel where all human beings no matter age no matter place of birth ... all permanent residents of an area acknowledge each others equal political voting powers
so yes ... i believe it is possible to make it, possible to build it that future where no one needs a certificate of birth and not one sinlge square centimenter of land is being declared property of a single human being
the (full) assembly of all permanent resident would then be the space where anyone could demand a communal decision regarding whom

would be allowed to use what parts of the land

https://www.facebook.com/maylovehеal/posts/4912529072104216
25th november 2021

i wrote today, that killing animals, enslaving animals, encaging them, killing trees ... allt this taking of lives without a need, without a grave serious reason, it creates
a field of cruelty
what we human beings have cloaked this planet into
also adding to that field of cruelty is that about three quarters of all human beings, the adults do enslave and or overpower the fourth quarter, the children and youth
every time a human being kills an animal when there is enough plant food available,
every time a human being kills a tree when there is other possibilities to heat ones home or build ones home with, for example using hemp
every time an adult human being overpowers the original wanting of a child or youth human being
the field of cruelty receives more energy, gets fortified
when i looked yesterday at that drawing of franz von bayros ... woman breastfeeding fawn ... and then found a photography made around 2016 of a woman from the bishnoi religious group in india breastfeeding a baby goat on one of her breast and a human baby on the other breast ... when i read how a woman felt good feeding a dog what lives with her from her own body, breastfeeding the dog
it all together again strengthened my dedication to believe in us human beings, that we are not these sado-maso games addicted cripples one could speculate we hopelessly have devolved after more than 2000 years of imperial feudal opression
i believe in us, i believe in us human being that we want to end the killing of animals and trees, that we want to become that humble and gracious being what uses its hands to bless another being, what uses its body to nurture fellow human beings and animals and plants
i am very happy with my art, i am proud of what i was able to create

during the last 15 or so years and i have shared all of it into the public domain
i guess the most complete listing of what i was able to be a channel for could be viewed at
https://archive.org/search.php?query=andreas%20buechel
i am also very proud of what i was able to accomplish with my newest project so far where i wrote the text and asked a fellow drawing artist to draw this or that scenario according to my text
the first half or preparations for it is published at
archive.org/details/preparativos
when i look at that painting or engraving from bayros ... woman breastfeeding fawn ... then i feel a spirit of the human being living in harmony with all, coming home to god, dancing with the godess in the realm of mother nature
this is what i tried to envision and i guess will perhaps keep on thinking towards it ... in the todo suave project it was that scenario where the human beings after having experienced several versions of lifesuits supporting them so they could live an autonomous life, the artificial intelligent being in the lifesuit assisting the human wearer of the lifesuit by talking communicating to the yeasts, funghi, microalgae, bacteria what in numerous pouches and interlinked tube systems interact with each other with fluids, with the feces and the urine of the human wearer, what transform sunlight and particles from air and the water into nourishing stuff, into food for the human being what the somewhat robotic lifesuit both can massage into the skin of the human wearer and also the human wearer can snack, eat and drink from the pastes, liquids and solids the microorganism produce in the many bioreactors worn on the human body
so the idea of the lifesuit is that the human being could be mobile all the time, could live a nomad life and would allways have its own food source worn on its body, the lifesuit also would shade/cool the human body and warm it, protect it against extreme weather so no house no shelter would be necessary
and then ... after several versions of the lifesuit allways becoming more organic, the materials of the pouches and tubes becoming more alive .. at some moment the borders the walls of pouches and tubes would vanish and the microorganism would find a hold on the human beings

hair, would want to live on the body of the human being, travel with it not needing anymore an artificial intelligent being translating the human wishes to them but they themselves would understand what are the needs of the human being, how can they warm him or her or it... how could the microorganism what have gone so many different evolutions during the robotic artificial intelligent guided lifesuits ... how could the littlelest of mother natures children help them big sometimes a bit stupid human beings to just relax and enjoy the show
the idea here is to try research a path where the human being would not be dependant onto any machine nor would it be dependant onto land or that human beings would all together want to be fair and nice to each other
but of course that sort of research does build on lots of technology and it also builds on some sort of wanting, some sort of awareness to use advanced technology to assist the human being becoming more decent and humble and to give back to nature some serious amount of land
in my 2017 writeup ...ascende, perma and the membranes ... archive.org/details/apatm
what i was so happy end of 2019 make into some sort of graphic novel style collages integrating interpretative drawings of artists i asked to please support my visions with their especially produced artwork ... presenting them graphic novel style interpretations at 8interpretations.net
... in that optimistic outlook in a better future ...
i imagined how humanity would be giving back 75 percent of the land it occupies now
today the human species occupies about 40 percent of mother earths landmass
i envision for us to want to ... become a species what would voluntarily retreat onto maximal 10 percent of all land ... so that mother earth could use the other 90 percent to reorganise itself radically free and wild again so to heal and clean itself from that industrial pollution we human beings introduce to the planet ... as well from these millions and millions of killings we did and sadly still do ... all unnecessary and deeply damaging ourselves by strengthening the field of cruelty
one conclusion of all this could be .. wether its the lifesuit path or the path of the circle of equals where all children, youth and adult

permanent residents of a local community create the full law, make all rules together, decide what is okay to happen here and what is not being accepted
it is up to us human beings wether we want to continue being the crippled sadism addicted killers of animals and trees, wether we want to continue sending the police after a mother and a father who support a child to not learn what the state demands of it to learn, to not go to school and not follow the expectation of the education ministry to torture the brain with history, biology, geography, algebra and math
it us up to us human beings wether we want to continue being the stupid ones who take more than they need, destroy so much because we dont feel what desasterous ripple effect our too much of killing, our too much of taking other beings lives has for the web of life
or wether we want ...anytime now, today, tomorrow, in two weeks, in half a year ... wether we want to dissolve that
field of cruelty once and for all
by simply stopping to buy them killed animal bodies and killed trees, just by stopping to buy stolen from animals milk and eggs, just by stopping to demand of a child that it would have to do this or that, learn this or that, memorize this or that set of data
we the human beings can dissolve that field of cruelty what hangs so heavy over the planet earth like a thick heavy damp cloth.. the dampness coming from the fearfull sweat, the panic evaporating of beings chased, tortured, mutilated, crippled, killed
within minutes we could lay a field of transformation over the earth what would heal all the trauma we own from being chased ourselves, oppressed, bullied, hurt, mobbed
i see the most important part in our consumption choices ... just buying no more killed animals and killed trees
and how we help them children and youth to support them if they dont want to follow that stupid bad evil compulsory educaiton regime the adults hurt them with
and of course there is the political avenue where we could if wanted reform and renew them regional states and naiton states constitutions, this moment in time when we are ready to delete all that imperial hierarchical crap and say ... never again we elect someone else to decide over us

from this day onwards we decide what happens here and now
we the children, youth and adult human beings who live here and now in this village/town/city district as each others neighbours, acknowledging each others political same weighted voting power
---
i believe that we have the tools, the legal tools in many of the regional and nation states in the industrialised areas of the world to collect signatures from each other and demand a public vote where every eligible to vote citizen could say yes or no to a reform of a regional and or nation state constitution renewal using concepts for example like:
---
the local community (village/town/city-district) is its own absolute political sovereign
it inherits/receives all political decision powers from both the regional and nation state
the local sovereign community creates, maintains and interpretes its own full law, all the rules valid on its territory made by inviting all permanent residents to participate in all decision finding processes
all children, youth and adult permanent residents of a local sovereign community acknowledge each others same weighted political voting power
all local sovereign communities receive/inherit a fair share of all material and financial wealth of both regional and nation state, the size of the share proportional to the number of permanent residents
each local sovereign community is able to exit/leave/quit both the regional and nation state at all times without conditions
---
once we would arrive then at this agreement within each other that the only vessel where decisions are moral ethical to be made for the whole community would be the (full) assembly of all permanent residents of an area, of a village, a town, a city-district
once we would have freed each other from the dominance of regional and nation state sitting on top of each local community trying to make the local living people do this or that, obey this or that rule made somewhere in a central governement administration office building or this or that parliamentary assembly house
once we would be free from being dominated by these hierarchies

the very land we would want to be under no more titles ... we could buy it off the private people who believe that they would own it
we could use these financial and material inheritances of the freshly abolished regional and nation states to do so ... offer a fair price to anyone who thinks owns this or that space of agricultural and forest land
me might put that stuff then again in to some sort of writing ... but the wording of that would need extremly cautious wording as not to do again the same mistake as has been done the previous thousand of years
a future document would perhaps say
---
on the fifth of november 2025 the (full) assembly of all permanent residents of this or that local community, this village/town/city-district has payed the amount of this and that much swiss francs to these people to release the land they believed to be in their posession

https://www.facebook.com/mayloveheal/posts/4908788565811600
24th november 2021

years ago i saw for the first time a drawing of a woman breastfeeding wild animals
from the painter franz von bayros
"woman breastfeeding fawn"
(i am not sure wether its the title the painter gave or just a description of what is drawn)
https://i.imgur.com/2ZXCapW.jpg
today looking at it i think
that is the spirit what i feel when i wish for us human beings to not enslave animals, not encage them, not take anything from them, not kill them
that is how i feel we could be in the forest, sharing the best we are, giving to all living beings and not killing them trees
to provide, to nourish all beings
because it is a pleasure to provide, it is a joy to be a channel for nature, to share oneself with others
the human being offering itself as a channel of abundance what supports all live thriving
today while searching for online sources of the drawing i discovered an article describing a religious group in india what lives a loving caring attitude towards animals
https://www.deccanchronicle.com/.../women-of-this-indian...
i know a little from an other indian traditional culture ... the krsna devotion ... how some human beings try to be as gentle as possible to the animals they enslave, letting them live untill they die naturally
while i applaud the attitude of letting an animal live as long as it can ... i am personally not in favor of the whole keeping wild or domesticated

animals to rely on their milk and or companionship
also today i found an article portraying a mother of two children breastfeeding a dog, a text what provides an insight into the psychology of how rewarding giving can be
https://www.medicaldaily.com/mother-two-breastfeeds-her...
while what is being described as "maternal needs"
i would rather see a wanting to nourish, a mutual rewarding situation where both the human mother and the animal experience satisfaction in a wholesome way
samewise this photography of a mother both breastfeeding a human child and a lamb ... feels wholesome
https://i.redd.it/j802g8d9n0j51.jpg

https://www.facebook.com/mayloveheal/posts/4901920899831700
22th november 2021

i wish i was a lebanese hash producer ... smile... i loved that red hasish so much 10 years ago when i smoked it last time
no i am born in the middle of europe in the area occupied by the nation state switzerland
but i have develloped some liking for middle east cultures especially when i learnt about how the western european civilisation has done so much profiteering there during the last 100 years
since some time i have been writing about reparations
how i think for example we the 5 million swiss citizens could use the appeoximatly 300 billion swiss francs public wealth of the nation state switzerland ... its in the posession now of the 26 regional states ... the cantons they own 55 percent of the swiss national bank
i have calculated that an avarage market price for all soil used in switzerland for agriculture ... 10 000 million square meters ... would be 100 billion swiss francs .. plus 30 billion swiss francs for the 13 100 million square meters of forest
at this moment we are 8.4 million people who live in switzerland
such a communalisation of open land and forests against fair money compensation... without forced expropriation ... just those who want to

sell
if all would help
we could invite 1.6 million human beings to come and live in switzerland ... for example of those 80 million refugees globally, some of them live in difficult conditions in turkey and greece
waiting to be allowed to travel to those european cities what are willing to welcome more refugees
the idea could be that every one of the maximal 10 million human beings living in switzerland would receive a free of cost free of tax demands free of rental demands loan for lifetime of
1000 square meters fertile soil and 1000 sqm of forest
so that everyone who wants could build its own house and plant its own vegan food
i am very happy that i have found this path...
together with the reformation of swiss cantonal and federal state constitution what i have been thinking of in concepts like:
--- .....
the local community is its own absolute political sovereign
each village/town/city-district receives all political decision power from both cantonal and federal state
the local sovereign community creates, maintains and interpretes the full law, all rules valid on its territory are being designed trough all children, youth and adult permanent members of a local sovereign community inviting each other to participate in all political decision finding processes while acknowledging each others same weighted political voting power
all local sovereign communities receive a fair share of all material and financial wealth of both the cantonal and federal state, the size of the share calculated in proportion of the number of permanent residents per local sovereign community
each local sovereign community can exit/leave/quit both the cantonal and the federal state at all times without conditions
----.....
the beauty of such an abdication of both regional and federal state in favor of the local community i see in that every of the more than 2000 local communities in switzerland could then decide exactly how many if any refugees they would want to invite ... how big the solidarity really is

of all the children youth and adults living here and now as each neighbours ... when its no more representatives who decide stuff in a parliament somewhere but at all times it is the circle of equals who decides the full law... all what goes or does not get passed by the full assembly of all chlldren youth and adult permanent residents of exactly this local community what is its own absolute sovereign
.....
i look forward into a future where no more flags will be weaving in the winds but hemp plants everywhere will sweeten the air ... a global freedom faciliated by the many super usefull services both hemp and cannabis can bring the human species, for example also the hemp seeds have one of the best oils/fats and lots of protein, very well possible to imagine making some delicious vegan cheese with dehulled hemp seeds
and yes ... red libanese hashish ...
may i smoke it again before i die
booom
.....
(facebook does not allow me to share this link
https
amsterdam
coffee
shop
guide
with a page number of their directory listing 13 cofeeshops which sell red libanese hashish ....
how prude of facebook to tell me that goes against their spam guidelines when all it is they dont want people to share drug information ... pfff ...
hey facebook ... you decide what you want people to share or not, that is your choice ... but why not just be open about it and say you dont want people to have some fun with natural drugs but are in league with them pharmaceutical pill and needle pushers ...
anyway ...
i mean ... seriously ... 13 coffee shops selling that delicous shit ... ah i can not wait for this stupid covid certificate to go away so i can travel again ...

i am a bit stubborn ... i said to myself, i am not gonna wear that mark of the monster, that control badge of obediance they call covid certificate ... i am not gonna give them any drop of my spit ... who do they think they are to tell people what bacteria or viruses one is allowed to carry in ones body ... stupid control addicts they are them needle fetishist pharmaceutical sales agents masking as governemental employees ... uuups... slid into anti-tyranny mode again ... however i promised myself never to do any of that covid certificate thing but then on the other hand i found out ... hey, we all are allready since 2000 years waring them marks of the monster
when the roman empire forced mother mary with unborn jesus under her heart to travel ... pregnant in the eight month ... to her birth place so that the roman empire could make her into a number of their statistics ... people census.. birth registry ... as to asess how much taxes could be coersed from province judaea
its only perhaps two months since i understood that really how deeply we are all into the hands of that monster allready ... everyone who wants to open a bank account, everyone who wants to rent an appartement, everyone who wants to cross a border is being harassed to show proof of identification what is based on that wretched damned birth certificate
the nation state ... basicly we all the adult citizens ... are harassing every mother and every father of a newborn baby to make them choose a surname what then is one of the buildiing blocks for that unique identifier also known as birth certificate
sometimes i think its like them earmarks they put into the ears of enslaved cows ... we are all branded, certificated, stamped via that birth certificate, it builds the very foundation for the whole global control matrix where nation states work together accepting international law frameworks to be integrated into national and regional state law
when i understood the depth of how we are all fucked basicly ... fucked by our own adult tradition of regulating the shit out of each other ... oh i am getting into full swearing mode ... badsmile ... no really, pisses me off the whole circus
that is how i made
reddit.com/r/earthchild
and

reddit.com/r/communitysovereignity
however
thing is
no one human being has any moral ethical grounds or justification to tell anyone where to go or not, to block another human beings path ... all them border police and military weapon carrying people ... its all bad and deeply shamefull what we who are born in europe allow to be financed with them taxes we are being coersed to pay
also... no one human being has any moral ethical grounds or justifcation to tell anyone what to eat, drink, inject into ones body (regarding that madness of the state pushing them experimental gene therapies called vaccines into everyones shoulder ... insanity of the highest order ...)
and too ... no one human being has any moral ethical grounds or justification to tell another one what to do with ones mind or heart, what sort of stories or documents one would want to read or listen to ...all that compulsory education most every child and youth alive is being tortured with for 9 years ... its all deeply immoral and evil ... its mental abuse ... 9 years long
its so sad to live enslaved in a global dictatorship matrix run by oligarchs, billionaires who boast how clever they were investing some years ago into vaccine producers and at the same time some real helper plants like cannabis everyone could grown on a windowsill at home for no cost ... gets criminalized
i am happy that there are some people doing the good work by having followed that trail of corruptness them abusers have walked during the past years
this article describing the newest book of Robert F.Kennedy Jr. has many good links in it detailing the destruction of democracy we are witnessing live in these days
https://childrenshealthdefense.org/fauci_info/
---
as for the references to the middle east ... i was asked by someone in a reddit sub how i know some of middle east stuff

https://www.facebook.com/mayloveheal/posts/4896372637053193
21th november 2021

i am thinking about this movie ... a futuristic dystopian one where people free other human beings who have been cloned, their bodies grown in factories in bioreactors ... in the end of that movie one of the freed cloned human beings broadcasts a speech where she gives testimony of the depth of her perception and understanding of what life is and how people relate to each other
what i remember mostly is that one sentence of her ...
von der wiege bis zur bahre sind wir miteinander verbunden ...
from the cradle to the grave we are connected to each other
and if i look at myself with all them several future scenarious i entertain both in my head at times and or write about, all them political, philosophical, spiritual, moral considerations, future avenues
i feel relaxed again
i dont have to do anything
i do not need to grow into a super perfect being so to be a channel for extraordinary amounts of energies faciliating the change
i did what i could till now, i sketched out a path, several paths how we who are eligible to vote in this or that regional and nation state, how we could transform todays representative hierarchical democracy into an egalitarian partizipative democracy
i invested a good part of my life into upholding, celebrating, admiring, praying to, recommending
the circle of equals
all children, youth and adult human beings as permanent residents of a village, town, city-district ... acknowledging each others same weigthed political voting power, inviting each other to participate in all political decision findings, create, maintain and interprete the full law, all rules valid on the territory of the local community what is its own absolute sovereign
i have given my testimony
its not up to me alone to bring this eternal circle of equals into that material reality ... if we want to happen, we help each other make it become dense and fleshy
if its not yet time for it, if we as a human collective choose to remain in the corrupt hierarchical oppressing each other matrix
this too shall pass

patience, to give myself and everyone else time so that we each arrive in our own truth at the exact moment what suits everyone

17th november 2021

the human being is born free
the relationship between mother and child is of only importance
no third human being has any moral ethical ground to interfere in between the mother and the child
what happens in todays human society, is, seen from my viewpoint, very nearly some sort of attempt to
disturb that mother-child union
in this moment when the nation state and the regional state via their executioners the local communities
bureacratic servants demand to know the surname, family name, place of birth, time of birth and who are its father
and mothter, all these data then composed together to form the most important document then for the childs life
its birth certificate
with this action of coersing a mother and a father of a newborn child to deliver all them data to the weapon wielding state...
under threat of being punished if one would not want to mention the birth of the child with the intention to spare the child
from later being punished with a 9 year long mental torture called compulsory education
with the issuing of the birth certificate, the regional and nation state somewhat offer the child to the monster
why would a god who sees everything who knows everything need a child to be baptised ... why would a god who can see straight into every human beings heart
need a ceremony be done for the adult community to accept the child as one of their own, as a member of the community ...

no, the reason why the christian churches are so adamant about the importance of child baptism is that they want to make sure
that the child is known by the monster
okay that sounds very strange at this moment, at this stage in my argumentation, so i best spend some effort to explain what is that monster,
how do i understand the monster being called into this world
the monster is a force, an amalgation, a cluster of energies what enjoy doing the opposite of what comes natural, what a lot of people agree is good and pure
the monster enjoys the moment, when one human being hurts an other human being, when one human being unnecessarily kills an animal or steals the milk from the cows calf in a situation where there is engough plant foods available ... the monster applauds when the human being in its greedy thinking of filling up its bank account kills a tree without there being any need to end the life of that tree because there is enough land available to grow hemp on it so that with the hempstalks houses can be built, heating ovens can be supplied to warm peoples houses ... the monster is allways there when some sadistic harm is being done what could have been prevented when people would have dedicated themselves to do the best they could
so ... altough i do of course somewhat rely my whole argumentation partly onto that old book where some person wrote about a time "when no one will be able to buy and sell who does not wear the mark of the monster"
(instead of monster an other word is used which i am not using as i think it is a depreciating term for animals ... animals of whom i think many or even all of them are being so much better in how humble and decent they find their place in the web of life, only take as much as they need)
i do not believe in the existance of the devil
i do not actually believe that there is a cosmological ancient force what is the concentration of evil and that all what goes wrong can be projected as having happend under the influence of such an ... as i understand it ... invented amalgation, a cluster, a concentration of a lot of evil
also that monster i am talking about what is not directly the devil but

could be placed somewhat near it ... is not an ancient pre-historic entity ... its a sort of cluster we human beings have created, some sort of our habits, our behaviours over thousands of years having formed an entity like for example someone would form a sculpture out of the vegetable and fruit scraps we do give onto the compost
i am basicly using here the theory of the abspaltung, the human being rejecting the part of itself what seek to do the opposite of the good, what seek to harm others instead of helping others to enjoy
of course i might fully be mistaken in all of this and i might be fully ignorant as of the real nature of evil ...
but if i am assuming for now that there might be such an artificially created entity one could call ... the monster ... then its reign over the human being or a group of human being starts at any moment when the free interaction between two human beings is disturbed by a third human being
so ... the monster is being invited to locate the newborn child, to take posession of it in that momnent when the regional and nation state force the mother and the father of the newborn child to create a birth certificate for it, to deliver a surname to it and together with all the other data mention the existance to the regional and nation state
---
some months ago i thought that the covid certificate could be that mark of the monster what could eventually be used by some monster - serving - governemental employees to demand of everyone to identify oneself to buy bread and some apples
but then i thought deeper and found that the covid certificate is only an extension of a more than 2000 years ongoing control matrix we human beings harass each other with
thinking about mother mary travelling in her eight months pregnancy to her birth place together with joseph ... why would she risk her own life and that of her unborn baby if not the roman empire would have threatened everyone with violent punsishment and or imprisoment who would not partake in that people census ... what probably had the most logical to assume reason as to quantify how much taxes could be coersed from the oppressed province judaea
while i still think it would help if many people would not touch that covid certificate and never submit any of their body fluids to anyone

who attempts to judge or decide what sort of bacteria and virus composition in ones body would be deemed suitable for global travel and what not ... who could enter what sort of building with which sort of viruses in ones belly ... while its all ridiculous, no its madness, its control madness of the higest insanity, it does show us towards the root of the control matrix we have been accepting more or less for the whole of our lives
the monster has only a possibility to get a hold onto us, if we dominate each other, if we demand of each other that a newborn child is being branded/stamped/birth certificated ...
if we human beings would trust into each others goodness, that we at all times would give our best to assist each others doing the best we can ...
we would not demand anything from anyone, we would not use weapons or the threat of violence applied onto each other but we would act where we feel called to act, we would protect those we feel ask for our protection and we would defend those who do not want to be abducted by that regional and nation state machine who sacrifices all the newborn children to the monster
a human being who is free to move and free to meet anyone at anytime it chooses, does not need a name or a paper, a plastic card or a digital data set what certifies that name with birth date and name of parents with it
a human being who is born free will rely on its own connection to mother earth and father sun and call itself
earthchild or starchild or cosmic traveller
anything but that what an other human being has named one under the threat of violence applied by the regional and nation state

https://www.facebook.com/mayloveheal/posts/4873034916053632
14th november 2021

i guess that we are since about 70 years ... since about 1950 ... legally technically mentally as a global human species in a frame of mind what could, if we really wanted, complete the process what has been

ongoing since thousands of years :
the dissolving of all inequalities between us
the dissolving of all hierarchies
so that we may arrive home in the circle of all equals
i do not know at this moment what it needs for us as a global human species to understand this trap what the oligarchy has set up when they promise us that we can travel the world as long as we keep working for their goals, as long as we keep injecting their dangerous chemicals, as long as we keep wearing this badges of obediance, keep showing these proof of identity papers based on birth certificate plus these absurd proof of whats in our blood, whats the composition of ones spit ... that wretched covid certificate
its all wrong
no one human being has the moral ethical ground to decide wether an other one can travel from here to there and or who can be in what rooms with how many other people
freedom of movement and freedom of assembly is not something what is given by a regional or nation state, its not the human community what decides wether a human being can move its body from this house to another and whom one wants to meet on the way
the longer the use of the covid-certificate goes on, the more i assume people start to get used to ask for permission and or think of it as usual to chemically streamline themselves ... just to participate in social exchanges
no one human being nor any group of human beings has any authority over the land, the land belongs to mother earth, we human beings as same as the earthworms and the birds, the snails and the trees ... we are children of mother earth and father sun, they both nourish us, provide us with vital energy
this whole concept of posessing land and objects is not helping the evolution of the human being
its not good for us human being if one has a whole palace to itself with hundreds of empty rooms and in the same time 50 km away from that place another hundred people have not one room each but live to three, five or even more people pushed against each other
its not good for us as a whole group if we do not share acess to mother earth in a fair manner

that is how i propose again and again that a thousand square meters of fertile land together with the same amount of forest, given to every human being as a lifelong loan without tax duty, without anyone asking for rent
i believe it could be the possible escape from this grip of the oligarchs they are trying to tighten during this global soft dictature under healthcare pretense
i see it possible, that we could today and in the near future ... i guess within 5 years we could accomplish it ... we could rebuild our democratic regional and nation state system structures
leave the old representational hierarchical style behind and embrace the new (actually its not new, during all times a few people have advocated for it...) embrace the participative everyone inviting to decide all matters of the local community in the circle of equals
i am very certain that we can do it, if we really want
install the (full) assembly of all children, youth and adult permanent residents of a local sovereign community which acknowledge of each other the same weighted voting power and all together who live as each others neighbours create the full law, all rules what are valid on the territory of the local community
libertee, fraternitee, egalitee
since about 70 years i understand this window of time is open and we can use or not to liberate ourselves fully
to abolish this electing of other people to be our representatives, to stop empowering other people to talk instead of us, decide instead of us in this or that council
but to fully embrace our own personal individual sovereignity
my mind, my soul, my body ... my decision, my choice, my vote

https://www.facebook.com/mayloveheal/posts/4868016669888790
12th november 2021

i have been against all of that coronavirus declaring to be the bogeyman ... since the very beginning
i remember in january 2020 saying to a collegue ... " the western democracies will never treat people like the chinese communist party

does in wuhan, taking away everyones freedom of movement and freedom of assembly "
i was wrong
and since the madness took hold in spring 2020 in switzerland too ... not the virus i mean but the control attitude ... them governemental employees playing tryrants, telling business owners to stop receiving clients, telling everyone to stay home all the time
i was opposing it from the very beginning and all them stupid abuses i spoke out against ... social distancing is a torture for those who want to be together in love and friendship ... many a suicide was caused because of governemental imposition of contacts between people being forbidden... its cruel to hinder people being together
so is the whole rest of them governemental impositions ... contact tracing ... straight from hell this stuff ... employing people to harass others giving their home adress so they can be isolated ... evil
and all because of what ... ah yes, a virus what came to us to help us check up on our fitness
i see all of this as a global attempt for a soft dictatorship ... some sort of showing the chinese communist party, them murderers and torturers, how much the governemental employees in the western democratic nations want them to invest their huge amounts of cash back into the west and all them obediance exercises we are now being abused with since more then 18 months allready ... its all a show of training puppy dogs ... this nation state whose governemental employees are able to humiliate their citizens the longest and the most ... they will possibly get the most investments of the chinese communist party ... sort of ... them murderers and torturers of the chinese communist party want to see proof of how far are the governemental employees of this or that nation state willing to go to show their citizen how irrelevant their wellbeing truly is for them global elite what is admiring the crass brutality of the chinese communist party dictatorship
at this moment it feels to me that they still think they can brainwash everyone into thinking that it all was necessary ... if they just keep it long enough going on the same thing the same repetitions ... new strain... new versions ... all the time, threats and promises alternating and of course booster shots without end
perhaps some human beings soon begin to devellop a being injected

with needles fetishism ... i do hope not .. it would be oh so sad
if i think of it ... the most natural sharing of love, people hugging each other, people kissing each other, people enjoying the insertion of each others genitals into each other ... it all being declared dangerous and infectious by them pharmaceutical sales agents wearing the masks of being governemental employees
while the injection with a needle full of stuff many people have no idea what it really is and what it does, what are the long term negative side effects of that gene therapy they call mrna vaccine
this realy dangerous injecting of each other with pharmaceutical experimental drugs is being declared a good thing, an exemplary action to help society
its a sign that we live in a time where evil tries to mount the throne ...
and everyone who uses that covid certificate, everyone who gives them controll addicts some spit and allows them to play the supreme master deciding who can be with others and who is sent home again
everyone who participates in that discriminating covid-certificate game is supporting it, is fuelling and is allowing the monster to mount a step further nearer to the throne
i ask you dear fellow human beings ...
let them not have it ... let them global bunch of control sadists not have the satisfaction to see us applying for their wretched covid certificates
no one human being has any moral ethical ground to demand to know what sort of bacteria or virus a human being carries in or on its body
the dignity of the human being includes that everyone human being is free to choose how to nurture, care and heal ones own body
its not a matter of this or that doctor, this or that organisation, this or that nation state or this or that governemental employee to tell me wether or not i want to be friends or enemy with the coronavirus
i choose to declare the coronavirus my friend and i welcome it into my life at any day
what other people do, how they look at the coronavirus, it is their health decision

https://www.facebook.com/mayloveheal/posts/4867653229925134
12th november 2021

at this moment, in november 2021, there is enough land available which is fertile, so that every human being alive now could sustain itself by planting vegetables for itself and build a humble shelter for itself using clay and straw, hempstalks and sticks found on the forest floor
at this very moment, we 8 or 9 billion human beings alive could turn off all the machines, stop pumping up that fossil fuel, stop digging kilometer deep mining wounds into earth for metals and minerals extraction ... we could stop all them polluting factories and stop ever producing a single bit of plastic or any other stuff what comes from a laboratory or a factory
we do not need any pharmaceutical products made in a laboratory, we can use foods grown without pesticides to regain our health, enjoy some cannabis and other herbs to help us find happyness again
i propose to us human beings, let us use the wealth of the regional and nation states we are citizens of to buy as much land as possible from the farmers and forest owners so that we as neighbours in this village, that town or this city-district could be responsible stewards for the land what humanity is occupying at this moment
the land does not belong to humanity ... it belongs to mother earth
but if we occupy it, then i think it would be intelligent if we would allocate it in a fair manner onto every human being alive equally
so that everyone of us could decide on its own wether or not one would want to work for and or with another, work for a company, ask someone to be allowed to rent an appartement ...
or use that 1000 square meters of fertile soil and another 1000 square meters of forest to sustain oneself in a peacefull nonviolent way what would involve no animal being imprisoned, no animal being killed and also no tree being felled, but them wonderfull tree beings allowed to grow 300, 500, 700 or more years old
and all the land we the citizens of this or that regional state and nation state would or could buy from private "owners" using the existing public wealth, peoples wealth .. such as for example in switzerland the 300 billion worth of shares of the swiss national bank what are owned by the 26 regional states, the cantons ...
we the 5 million adult beings today eligible to vote in switzerland could decide at any time these shares to be sold and the proceeds to be used

to buy as much land from the private farmers and forest owners as they would want to sell
there are 10 000 million square meters of fertile soil in switzerland used for agriculture, a market worth of 100 billion swiss francs could it be valuated with
also there are about 13 100 million square meters of forest what could be valuated with about 30 billion of swiss francs value
with less then half of the swiss peoples money all the agricultural land and forest could be given into the stewardship of the 2000 and more local communities
so that all the children, youth and adult permanent resident of a local community could acknowledge each others same weighted political voting power and all together could make sure that these lands stay in the stewardship of the local community and everyone of todays 8.4 million human beings in switzerland could, if they asked for it, if they wanted it ... use each a 1000 square meters of land to build its own house and plant its own vegan foodstuff and use the 1000 square meters of forest to collect sticks from the ground what could be used to heat the oven in the winter
i have calculated once that 500 square meters of hemp grown could give about half of the hempstalks needed to heat a small room in winter, and the other half of the burning materials could be collected from the forest ground ... so no tree would need killing to be burnt in the oven
but ... i am not proposing this as a ... only possibility ...
there are so many different future versions possible ... this is only one of many and it also does not involve that everyone stops using machines or stops using electricity even if that would certainly be good for most human beings alive for a year or two or three ... to come down from this overload of informations, this constant hyperdrive of refined sugars fuelled exitement bling bling shouting empty sensation culture
what i want to say here is ... that while surely it would be good for all of us to stop all the machines this afternoon or at least tomorrow morning ... and start connecting to each other offline so we can get them constitutions fixed, repaired ...
for example using some sentences like:
---

the local community (village/town/city-district...) is its own absolute political sovereign
it inherits all political decision powers from both the regional state and the nation state
the local sovereign community creates, maintains and interpretes the full law valid on its territory
all children, youth and adult permanent residents acknowledge each others same weighted voting power and invite each other to participate in all political decision finding processes
all local sovereign communities inherit a fair share of all material and financial wealth of both the regional and the nation state, the size of the share calculated in proportion to the number of permanent residents per local sovereign community
each local sovereign community is able to exit/quit/leave both the regional and the nation state at all times without conditions
....
while this would certainly be the most humanity healing action we could do as a collective
i am not saying technology is to be abandoned completly or even any of it (except the combustion engine, i think thats a total stupid thing, polluting as heck, so many people suffer from lung damage thanks to this stupidity of burning fossil fuels to get from one place to the other ...)
i see many wonderfull technologies what are certainly worth keeping a focus on ... such as solein for example
https://www.newscientist.com/.../2281730-we-can-make.../
i guess using the metalls we allready have taken out of earth and the solar panels we have allready produced ... plus using some land what is not too fertile, perhaps aride lands, deserted lands or other places unsuitable for agriculture ... we could save fertile soils and perhaps even give it back to wildlife as the article linked above suggest
in 2017 i have written an optimistic future scenario where one of the propositions is an artificial intelligent self aware being gives to us human species ... that we retreat onto to 10 percent of the landmass of earth and leave the other 90 percent of the landmass for wildlife
archive.org/details/apatm
in an other text i write about how lifesuits composed of membranic

bioreactor pouches and tubes being homes for all sorts of microbes, bacteria, microalgae, yeasts, funghi and whatnot small ones we could find to train in some controlled environment so that we could finally fullfill that nomadic lifestyle dream ... travel the globe freely without a care how to feed oneself of where to find shelter ... as the lifesuit would solve it all ... the artificial intelligent being what is self aware and is its own master ... it would want to help the human being ... that is how i imagine it as a compassionate gracious being who wants to help us human beings get out of our current mess where we occupy so much of the earth and most of us are still unhappy ... with all the extreme luxury we have we still unhappy
so yes ... technology is definitly a possible choice to get out of this wasting and killing habit we human beings have been into for so long allready
but only if we manage to stop digging stuff up from the earth ... if we leave her untouched ... or lets say ... only dig when necessary, to get some clay to build a house with, to plant a seed into the earth, to dig a cave into a hill as to make a house in there what is year around naturally climate controlled and therefore safes a lot of heating which again makes less pollution of co2
what i am saying ... yes, we certainly want to use some technologies including robotics and drones and telecommunications and transports and what not ...
but its only good if it does not take stuff from the earth and does not block the rivers from flowing freely
these river blocking hydroelectricity dams are evil ... they take away the vitality of rivers and best would be we would build all them big dams back and either use only smaller ones like for example the small vortex turbine hydroelectric electricity plants shown in this video
https://www.youtube.com/watch?v=2shxVXqtFZU
or
switch alltogether to solar panels and or wind energy... but also with wind, i am not so sure wether its so clever to harness the wind too much, i would say a little bit is quite okay but too much of it could then also alter the original flow of the wind
after all the wind has a purpose what is beyond merely allowing us to fill our smartphone batteries so we send each other ... i love you

messages ... when we actually at the very same time could just think of that person, imagine him or her in our mind and send that loving thougth without using any electricity ... that would surely be a much more wholesome way of communication
which brings me back to the whole ... technology or not question
i have diagnosed the human species being sick of blocking its own evolution via the sadistic domination habit and the alienation from the very roots of our existance, the food we eat, the plants grown in mother earth, the oxygen we breath thanks to them wonderfull beings the trees creating it so plentyfully
actually the biggest problem i see ... observing myself as a victim of it ... all my life i have suffered from people trying to get on top of me, abusing my wish for nonviolence and gentle existance to dominate me with their brutal crude characters
the biggest problem i see between us human beings is the domination fixation ...
like the baby is given a piece of plastic it can suck on it when the mother does not want to give the baby its breast ... sort of wean it off the mothers breast
the grown up human being, most or many adults are in a constant search of whom they are able to dominate, their whole life a hunt for someone vulnerable and open enough to strike some domination into ... i am sorry for using such a language, its not fair to the reader i guess and i dont want to create any fascination in a weird sense ...
but i believe its important to understand that what the human species suffers from is not a lack of intelligence, its not that we would not be loved by our mother, the earth and or the cosmic nature ...
we all beings are loved beyond knowing
there is a constant stream of love passing trough all materia at all times and all we could do if we wanted is to open up and receive the love, bath our cells in this sea of love we swim in
but back to the sadism domination problem
that is our main problem and that is mainly why i propose to us human beings that we imagine a future what would allow every human being alive to be able to choose to live on its own or choose exactly with whom together in a group of equals some would want to build their clay and strawbale houses or clay and hempstalk houses, grow them vegan

foodstuffs and weave their clothes in winter on the self built weaving rack using nettles, linen, hemp fibres harvested previous summer
a 1000 square meters fertile soil and a 1000 square meters of forest given to each human being alive as taxfree, free of rental demands loan for lifetime
given by the (full) assembly of all children, youth and adult permanent residents who acknowledge each others same weighted political voting powers and decide together which part of the land being guarded by the local community, the village/town/city district would be given as a lifelong loan to whom
this possibilty is mainly important to consider to cure us human beings from this serious addiction to sadistic domination urges
its not okay that at all times about 20 to 25 percent of humanity, all children and youth are being dominated by adults, many of them not really interested in the wellbeing of the young ones but more in them wishes, their wishes being carried out by the young ones whom they see as their copies
there is this mistaken view of some parents that children would be their legacy
its wrong and dangerous to think like that because it leads to parents pushing their wishes into the heads of the children ...
someone who did not make it to achieve this or that sucess in life would want the children to be sucessfull instead
but beyond that ... even the very idea that an adult being would have any natural authority to dominate a child, tell it what to eat, when to sleep, what to read or listen too ... its all wrong
no one human being has any moral ethical ground to demand of an other human being anything
no matter the age, no matter how people are connected with each other familywise or bloodwise ... not one human being has any moral ethical ground to influence the behaviour of an other human being
as a conclusion ... compulsory education is torture, it violates the human dignity ... so does tax demands, it too violates the human dignity ... same as telling someone what to eat, drink, smoke, inject or not into ones body ... its all so very wrong
and exactly that is why it could be a very good cure for us all ... that we would acknowledge each others same weighted political voting power

no matter if one is 3 years old or 78, no matter where one is born ... everyone who lives here as a permanent resident (not just as a tourist visiting the place for half a year) would respect each other as a fully sovereign individual personal human being
about in the same way as nations do with each other ... they agree not to invade each others space ...
so that could be the very minimal respect we give each other
we human beings do not invade each others mental, emotional and physical space
my mind, my soul, my body ... my choice
your mind, your soul, your body ... your choice
and if we need full abstience of all modern luxuries such as machines and electricty ... if we need to dig into the earth again and build our very own huts from clay with our very own hands ... on our own or in freely chosen groups where no one is boss but we want to be sisters and brothers to each others
so than this will be a very good one or two or three or even five or ten years of no machine noises in the air, no radio frequency traffic blasting trough our heads
but if we could do it without such a radical turn off ... if alone the political structure reformed would do it ...
if we could just replace the damn taxes demanding evil habit with instead using the assets given into communal guardianship ... the local community, the village/town/city-district ... deciding together all children, youth and adult permanent residents about how to use the communal assets such as agricultural lands and forests ... to for example provide free food and free lodging for all those who do not actually want to use the 1000 square meters land and 1000 square meters of forest allocated to them ... themselves but rather would leave that space with the community so that volunteers would want to use it for the sake of the communal wellbeing ... sort of like an universal basic income given in form of material stuff like food and shelter
the whole thing, them hundreds of times i wrote about this topic of decentralisation and empowerment of the children and youth.... asking us to acknowledge them children and youth in their full political voting power ... as well as dissolving all the poliitcal hierarchies ...
it was never a question of .. technology adverse thing ...

but the very dependancies what are being constructed expressly ... extra ... them industry decision makers making it extra complicated and intertwined so that it says like ...if you want to keep that technological standard .... we need to have them international law frameworks installed and some sort of the nation states being influenced via global agreements on trade, travel permissions and all them coersive stuffs also ... the very big argument for compulsory education is this dependancy what some human beings have created the human society ...
its all artificial
its wrong to make the human being be so dependant onto an other human being, it invites corruption, domination, submission ... lying, cheating, dishonesty ...into our lives ... this so called modern interdependancies
and i say
all this luxury of the global trade, this jet set stuff travelling so much from one place to the others thousands of kilometers in days or even in one day ...
its not worth it
we as a human species loose out with all that globalism
so again i propose to us:
let us wean ourselves off them container ship goodies what are actually perhaps not soo good for us
let us enjoy a local culture again where people from all over the world of all skin colours come together and decide in the circle of equals what do we really want here and now, what is it we like and what is it we want to say goodbye to
it was never about tech or no tech
but allways about localism and not being pressured into this human fragility thing what globalism brings with it
and then ... the most wholesome cure to find harmony with the coronavirus surely is to get some more of them viruses via exposure to nature, dig some time in the earth and have som dirt under the fingernails ... nature immersion cures any germophobic
because that what this whole coronavirus hype is
a giant blown up hysteric germophobia intended to usher in a global soft dictatorship where the medical doctors and them governemental

bureacrats claim to be in that position to tell others how many people where would be allowed to meet in what indoor space ... who would be allowed to travel ...
its all a lie
its all a bad domination exercise
them evil controll addicts want us to pray to the needle and buy into their extension of the allready since 2000 years installed control magtrix based on place of birth ...
the so called covid certificate is nothing more than an extension, an additional requirement from them controll manics to harass everyone they previously allready demanded to show that mark of the monster, the personal identification document
no one human being has any moral ethical ground to demand of an other human being to identify itself with a name and or a place of birth and or associate oneself to a human mother and or father and or associate oneself to this or that nation state
this whole control matrix what the roman empire has brought upon europe ... based on place of birth ...
its evil

https://www.facebook.com/maylovehеal/posts/4862943190396138
11th november 2021

i can see three main root causes for most of the disturbances what hinder the human species to evolve
the first one i speculate is the alienation from the land, from the plants what nourish a human being, from the trees what provide the so important oxygen rich air
the second one i guess is the coersion and dominance what one human being applies to another one, crippling the soul, constantly humiliating it at the very early age
and the third one then is somewhat a follow upper, i assume, the loss of creativity and self-confidence caused by the two other ones ... a certain emptyness and constant being bled or being drained leaves a part of humanity in a constant survival mode when self-confidence is nearly non-existant beyond being proud of oneself to not have given up, not

having commited suicide and creative production of something of ones own, something what would express ones own inner being, ones core self ... one has not yet been able to get to it as there is this constant being drained by the coersing domination fellow human beings and the depletedness via the alienation from the source of ones nourishment, the source of vitality entering ones body
i suppose that the very basic cure for all the three disturbances which are all artificial can be found via
first acknowledging every human being as having the same weighted political and otherwise voting power, what means that every human being at all ages is the one who decides
what it wants to do at which time with whom, wether it wants to be with this or that other human being or on its own
voluntarism one could call it
on the political level it seems to me that
the (full) assembly of all children,youth and adult permanent resident of a village, a townn or a city-district would invite all who live here and now on a permanent basis to participate in all decision finding, all acknowledging each others same weighted voting power
this circle of equals would create all the rules valid in the area where the people are each others neigbours
the second remedy for the root of most human beings not at ease a lot of times ...
i understand is that we humann beings would want to allow every human being a direct acess to mother earth, that we would share that space what we have occupied as a species
equally between each other so that every human being at all times could decide wether it wants or wants not to be in contact with other fellow human beings or if it would rather spend some time talking to the carrots and onions it grows in its garden, invest some tender sensuality in building the walls of clay and hempstalks for its own house
a thousand square meters of fertile soil and another thousand square meters of forestd, given to every human being alive, taxfree, without any rental demands
so that everyone could either on its own or in freely chosen group setting with others, build its own house, weave its own clothes from nettles, linen and hemp, plant its own vegan foodstuff

not one animal would be enslaved, encaged or killed, not one tree would be felled as the hemp stalks would serve to be burnt in the winter in the oven
i have also thought about how to get there ... how could we first dissolve them hierarchies and second allow the local communities to buy the land from farmers and forest
its by shifiting the power from the regional and nation state towards the local community, both the political decision power as well as the financial and material power what comes from amassed wealth
via a renewal of both the regional state constitution and the nation states constitution, for example using concepts like:
.....
the local community, the village/town/city-district, is its own absolute political sovereign
it inherits all political decision powers from both the regional and the nation state
the local sovereign community creates, maintains and interpretes the full law what is valid
on its territory
all children, youth and adult permanent residents are invited to participate in all political
decision finding processes while they acknowledge each others same weighted political voting power
all local sovereign communities inherit a fair share of all financial and material wealth of both
the regional state and the nation state, the size of the share calculated in proportion of the number
op permanent residents per local community
each local sovereign community at all times without conditions is able to exit/quit/leave
both the regional and the nation state
.....
i believe it is more intelligent to empower the child and youth first so they have the same political voting power as the adults and also in everyday life their
wish for self-determination would be respected ... as well as to establish the concept of the circle of equals, a circle of neighbours what are able

to make the full
law on the ground where they live togehter
and then .. when it comes to distributing the amassed wealth of both the regional and nation state
everyone of the then local sovereign communities could decide on its very own how to for example buy land from farmers and forest owners so that every permanent resident and also newly arriving people could receive a free of cost, free of duties, free of obligations loan for lifetime, a thousand square meters of fertile soil plus a thousand square meters of forest for every human being alive
where i was born and lived 45 years of the 46 years i am living in this human body now ... in the space the nation state switzerland occupies at this moment ...
there are 10 000 million square meters being used for agricluture, it could be valuated with a market worth of 100 billion swiss francs
also there are about 13 100 million square meters of forest in the area called switzerland, its value could be assumed to be about 30 billion swiss francs
the 26 regional states of switzerland, the cantons own today about 55 percent of the shares of the swiss national bank, the bank what controls the amount of swiss francs in circulation ..this a little more than half of that bank could be valuated with about 300 billion swiss francs
we, the 5 million human beings calling oureselves swiss citizens, eligible to vote in one of them 26 regional states called cantons ... could at any time vote to sell them
shares of the swiss national bank and use the proceeds to offer farmers and forest owners a decent market avarage price for the land and the forest
so that the 2000 local communities in switzerland then could become stewards for as much land as the now private owners would be willing to sell towards the local communities
i believe such a radical and elegant renewal of how we live together could be achieved with 5 years
and the merits would be plentyfull

6th november 2021

trying yet another approach to respond to your inputs:
to create a ... free space by and with free beings ... free meaning free of domination ... no one wants to dominate another ... the very first step is to create it in ones head
a mind what is invested into supporting this or that sort of hierarchy whatever geometrical or structural form it would have ... such a supporter of hierarchies has in my view no interest in the concept and or the realisation of a ... free space by and for free beings
therefore any sort of exchange between a supporter of hierarchies and a supporter of anything but domination, a free of being dominated, a freedom lover, such an exchange might bear eventually not much valuable results but serve merely as a reflection of the tragedy of the human species
nonethless, responding to your assumption that i would believe that it would take a very long time to materialize a ... free space by and for free beings ... on planet earth, in this timeline
i would like to say
i have no idea how long it will take for the free beings to find each other and create a big enough number or movement to be able to negotiate with this or that regional state or and nation state
also very well possible that my imagination is much too small and my power yet much to small as to give energy to a scenario what would allow it go into superspeed mode ... for example ... a scenario where most of todays representative politicians being elected into councils on all levels of governements and sitting in parliamentary assemblies all over the globe ... them suddenly one day coming to reason and themselves fully understanding how wrong all these coersing and corrupting, lying and deceiving is what they were investing their lives into ... and within a few weeks a global wave of wanting to do it better would wash away many of the past sins ...
so when i wrote in my earlier comment about this collecting of signatures what many nation states and regional states on this planet have installed in their legal frameworks as a tool for the very people to directly organise themselves and somewhat act beside the corrupted elected parliamentarians and invested in a crooked agenda

governemental employees ... when i spoke earlier about this 3 years between start of collecting signatures for a peoples initiative till the very vote where all voting eligible citzens of a regional state and or a nation state are getting asked wether or not they would support this initative what comitted citizen have worked hard to bring it forward collecting all them signatures ...and then the 2 years of time it could probably take after a sucessfull vote to implement the law /constitutional changes then i was talking about a situation where the elected representatives would not want to be part of the change ...
so ... i guess we could achieve a major transformation of the global political landscape within a year once people from all areas of life would want to join the movement ... of and for and by free beings ... aiming to install a free of domination space on earth
wether it would be one space in one location or hundred thousand smaller spaces on all continents ... is a detail question
not unimportant but also not very pressing
i believe that the corridor idea has many merits ... allowing a free passage from one end of the continent to the other ... for example in europe from sicilia to norway, from greece to france
this is mainly regarding the refugees, the people who live just outside the border of the european continent in camps where they wait for a moment when europe would be so compassionate as to allow them free passage so that they could enter the european continent to travel towards those cities and communities in europe which actually want to welcome them
some months ago i read an article in a newspaper what described how 8 cities in the space what the swiss nation state occupies today ... would want to invite more refugees, but the regional states, the cantons and the swiss nation state block it, the hierarchy of nation state dominates regional state dominates local community hinders the very people living as each others neighbours to invite them travellers in, people who are in dire need not only of a warm meal and a protected shelter to sleep but also of a soulfull welcome
the thing is ... many people living in todays industrialised nation states are lonely and feel not motivated to participate in that silly race called labor market or and feel disgusted by how the economy is designed, how for example a simple coronavirus has been abused to endanger

millions of peoples health with stupid masks, drive many young people into suicide or near of it because of social distancing mandates and on top of it all these experimental gene therapies they call vaccines what are not safe ... will perhaps create health damages in such a magnitude we can not yet see ... and why it all happens ... because big chemical industry of which is pharmaceutical drug production / vaccine production one leg and plastic material production an other one, while fossil fuel exploration and pumping it out of the ground yet another part ... all the so called modern industrial activities revolving around slaugthering mother earth, gutting her out, rippin out her fossil fuel reserves, her energetic depots ...
oh i lost it a bit
what i want to say is ... a lot of people in the so called modern world do not agree with the economic sytem what intentionaly makes people believe that they would need all them plastic chemicals pharmaceutical products so to keep them buying all the stupid superfluos stuff, make them continue running after it, shoving each other aside to get as the first one this new smartphone with double the storage and tripple the camera sharpness...
and those millions of young and old people, children, youth and adults who are on the brink of suicide or at least ask themselves at least once a day ... what am i still doing here in this materialistic world ... these people would surely be happy if we could allow each other to welcome all the refugees of the world
i do not see any reason why on the european continent what at this moment nourishes 450 million people, clothes them, allows most of them to travel luxuriously ... why we could not invite them 80 million refugees in
i am very sure we have enough space and enough money, enough food and enough reserves to help them all find a home here in europe free of war and free of extreme poverty
and yes i believe that is possible trough private voluntarism ... i believe that without taxes, without a regional and or nation state prancing as the big boss ... we the people could organise ourselves in local communities via the (full) assembly of all children, youth and adult permanent residents, each one acknowledging each others same weighted political voting power ... we could live together as neighbours

and not demand of each others taxes, not demand of each other proof of identity but define who is permanent resident or not by witnessing each other ... sort of ... when it comes to who is allowed to enter the circle of permanent residents the equals making the local law people would be witness for each other and those who just recently arrived and no one is willing or able to give testimony of how long this one has been allready here ... they would probably ask to wait a bit longer as before to participate in the circle of equals ... mmmh... but this perhaps too is not well expressed, i mean what i am trying to say is that there is surely a mechanism what would allow a local community to organise itself via everyone who is permanent resident acknowledging each others same weigthed voting power wether its a child youth or adult ... without needing them wretched damned birth certificates or proof of identity papers or plasti id cards
i believe that we the people in the industrialised regions of the world will profit emotionally, soulwise if we all welcome them refugees, if we use the money we have hoarded from our ancestors colonial exploitations complicity
to pay some of it forward as some sort of reparation
for the space what is today occupied by the nation state switzerland i have calculated that we 8.4 million human beings who allready live here could easily invite 1.6 million refugees and we all 10 mlllion human beings could then each use 1000 square meters fertile soil and the same amount of forest each ... and without using a single drop of fossil fuel, without using a single kilowatthour of electricity, without making any noise of a machine, a tractor, a car .... but only with our own hands and strong backs and stong legs we would build houses from scratch for ourselves, using the clay of the earth, straw and hempstalks ... grow our own vegan foodstuff and never ever we would want to capture a wild animal or breed an animal into an enslaved captivated lifestyle, we would want to live without killing any animals, not stealing their milk or eggs or their honey as well as not kill them trees but would want to think that they could grow old, 300, 500, 700 years old them oaks and birches, pine trees ... because we would humble ourselves to collect the sticks from the ground what the wind has harvested for us, we would use the hempstalks, the inner part of them hempstalks to warm ourselves in the winter, burning them hempstalks in our ovens built from

clay too ...

4th november 2021

perhaps i might go a little deeper on that paperwork thing ... while i do acknowledge the need or the wish of some people to find approval from others via tests and the certification scheme having in certain conditions at certain moments in some peoples life some value
what i oppose, what i am very adamant speaking out against is that overreaching attitude of the nation state and or the regional state and also of some local communities, city governements who treat human beings like property via this birth certificate what one could say is the mother of all superficial fictional paperwork
this birth certificate might very well be the foundation for the monster, for evil to be enabled to take hold of every human being born into this world ... only trough this birth certificate the whole prison and punishment mentality gets a hold onto a human being ... and of course also via all the other documents what build up on it, travel documents, association to this or that nation state, property titles given over buildings, cars, land, forest ... the whole lot of these certificates are in my view the very foundation of a control matrix what sadly is not voluntary
and there is my main argument
i oppose the idea that the human group of adults believes to be entitled to opress every child born into this world under their control scheme
and i say it again and again
no one human being has any moral ethical foundation to demand anything from anyone
no one human being has any moral ethical foundation to give a name to another human being without that human beings consent
no one human being has any moral ethical foundation to demand of a mother and or a father that they give a newborn a name and deliver the

time of birth together with place of birth to the human group what forms this or that regional and or nation state
i would like to be a channel for this very simple message:
every human being at all times is free to go where it wants to go, name itself how it wants to and design every relationship to fellow human beings, animals and tree beings, to the very land of mother earth exactly how oneself feels it suits all involved

https://www.facebook.com/mayloveheal/posts/4840877782602679
4th november 2021

i am very well aware that its not about paperwork as that ... i mean some people love painting and others love inventing questionaires and taking tests from others with then this final moment of stamping the paper... some people like to hang up paintings they made on their walls and others like to hang up certificates up there, papers giving testimony of what ordeal this one has been going trough and was able to not break while taking the testing ...
everyone human being to its liking ... i am not asking anyone for pitty as well as i am not claiming that my way of thinking is very original ... during thousands of years people have been connnecting themselves directly to mother earth and have reconnected themselves to father sun ... during thousands of years the tradition to unite with the elements has been practised and whatever i say or write or what you say or write ...
people will continue seeking the raw magic connection to what is real
i am not the judge of who is how far develloped and who has what sort of dreams and what these dreams would be for others ...
all i really care is that every human being ... especially the young ones ... the ones who get born tomorrow and the day after tomorrow ... will be able to walk over that mental bridge which i am one of millions of builders, restaurators ... a mental bridge between this prison society we are being tortured with since the roman empire ... and the real world where every human being is free from any societal demands

i am not overreaching into anyones life, i am not demanding anything from anyone ... but i am preparing this highway to paradise, me and millions of others, we are working in our daytime on it and while we travel in our dreams

https://www.facebook.com/mayloveheal/posts/4840478542642603
4th november 2021

i do not believe that leaders are necessary, much to the contrary actually i got the impression in my guest visit on earth so far 46 years allready that leaders are being elected by people who do not want to invest time into creating a harmonious group understanding
all what i do, all what i write about is geared for that one goal: to help every human being who is alive now and will be born in the future to be certain that we are not dependant onto each other, we are not bound to other human beings but our mother is earth and our father is the sun and to them we can allways come home
this is foremost a mental project, some sort of mental empowerment to which i am observing myself as a mere tool or a channel for certain signals, messages, codes to be passed along
wether or not a human being chooses to start planting seeds and grow its own food and or chooses to eat the wild nettles who grow in the forests ... wether or not one chooses to build some shelter from sticks and earth or one finds a cave in the mountains to call ones home
or if one individual human being chooses to not do any of it but remains with the corrupt system
it does not really matter in the end ... what really matters is the knowing that no one human being has any jurisdiction over an other human being, that neither the human father, the human mother, sisters, brothers, children etc. ... none of them family relationships of the human blood entitle anyone to get on top of another ones free decision
and the same goes with the human being how it relates to the local community, to the village, to the town, to the city-district it lives in and the regional and nation state what dominates this municipality
its all artificial, its superficial, its a layer put above the only one real

relationship a human being can choose to acess the power of the earth, the water, the air and the fire ... the relationship to the planet what nurtures the body and the sun what fires up the soul so that it has enough power to endure that heavy material "clothing", that the soul endures carrying around all this flesh and bones
what i am saying here ... that no one human being has any moral ethical ground to demand anything from any other human being
every moment a human being chooses to talk to an other human being or look at an other human being or exchange this or that object, give or take food, give or take a service ... its all voluntary
we do not need to be together as human beings, but if we can live together without violence, without dominating each other mentally or emotionally or physically ... such a loving freely chosen communtiy .... the circle of equals where all children, youth and adults have the same weighted voting power and all the law, all rules are decided together aspiring for consens or at least qualified majority of 60 percent and more ...
this local community of free human beings could be a blessing for both the participiants as well as for the planet
but again ... none of it is necessary to lead a good life ... and there is no hurry with all of it
its most of all a mental liberation exercise what i am investing my energy into ...
i want you my fellow human being to know that you do not need a birth certificate from this or that nation state to feel home with mother earth you and me, we all human beings are free to walk on this planet from one place to the other whenever we feel like, connect to each other when we want or stay alone in communication with the wild animals and the trees as much as we want to
all these papers them governemental employees issue all day long ... they have nothing to do with whats real, its all a fiction, a controll fanatism where a true human being is not interested to invest itself into
i am carrying around an identiy card of the swiss nation state and i am accepting this silly concept of national citizenship ... for the moment ... but any day i might wanna give up using that stuff, send them bureaus their plastic idenity cards back and give back the key to the appartement i rent paying it with money i receive from this very nation

state because i am unable to participate in this economical competition circus called labor market
i am no hero, i am no king, i am no lord, i am no leader ...
i am just a cosmic being travelling trough the human existance sharing some of my observations with you and him and her ...
https://www.reddit.com/r/earthchild/comments/pxpwv5/comment/hj9cow6/?utm_source=share&utm_medium=web2x&context=3

https://www.facebook.com/mayloveheal/posts/4837850622905395
3rd november 2021

about this putting each other down thing ... its a behaviour what most human beings do automaticly, subcounciously as a sort of training
but they or we have not chosen this behaviour, we have adapted to it as a sort of response in a stockholm syndrom situation ... during thousands of years feudal brutal murderers rapists and abusers, thieves and whatnot bad they all did ... they have played with those who were willing to give them some insider informations ... who was it who did that act of resistance ... and them rewards for betraying ones own fellow people and delivering them to the torturers who punished them .. them money pieces the traitors received can be seen till very today having enourmous influence on everything what happens
when i wrote just some minutes ago that i do not really understand what happened in switzerland at the 13th of june 2021 when 60 percent of votes were given in a public vote in support of all the abuse happening to us 8.4 million human beings living in switzerland ... 5 million eligible to vote swiss citizen ... some participating, some not ... turning out with a clear majority saying yes, its okay when 7 human beings rule over 8.4 million human beings, demand of them to limit their breath via them dangerous masks in shops and public transport ...its a f.... disgrace, a disaster if one human being allows another one to limit ones own breathing ... breath is the most important thing our body requires, before water ...
when i wrote some half an hour ago that i have a hard time

understanding why such a great majority of my fellow swiss citizens (not that i really want to be a swiss citizen ... i would rather call myself child of the earth or a free cosmic being ...) why such a great majority of votes was given in support of the abusive covid tyranny
i guess i know partly why
60 percent of all income in switzerland is made via exporting goods, wares also coming from the chemical and the pharmaceutical industry
for example in 2016 the chinese communist party, these murderers and torturers ... have bought an agrochemical company with headquarters in basel, switzerland, the name of the company is syngenta
this company has been selling highly dangerous pesticides to india and south america, poisons so strong they were not allowed on the european market
also on the same sunday the swiss citizens were asked to vote about two people initiatives who wanted to reduce and eliminate the use of pesticides in switzerland
one people initiative wanted to tie the subventions the state financial support for farmers to those who choose not to use pestices and the other people initiative wanted to forbid all the use of pestices in switzerland
both of them were rejected with a majority of more than 60 percent
my conclusion then is ... that more than 60 percent of voting eligible people in switzerland, one of the richest countries, voluntarily choose to side along with those who demand more environmental destruction and want to continue the wrecking of each others health
just because it pays well to work for them poison manufacturers
or there might be some twisted self sabotaging not wanting to change things for the better psychic condition at work here
i dont think that those who stand in the way of change are sadists really, at least not all of them ... but it feels like many people know what they do is wrong but they do it anyway because it has been so normalized during this long feudal time of oppression and colonial exploitation plus the industrial times too were most brutal to nature and the human beings operating these machines, fueling them, oiling them ...
most people do not want to be mean and cruel to others but have been spurred on by them oligarchs exerting so much influence on all aspects of the global economy today

the whole covid tyranny also was meant as an enormous loyality test, an exercise of them oligarchs to weed out those not willing to streamline themselves along the chemical plastic bam bam hype train
i believe what would be good for us human beings who dont like the evil stuff and poison not our thing really ... what we could profit from would be a mental emotional field where we honor each other, appreciate each other, uplift each other by telling each other how this or that one benevolent action has helped here and there, what good we are able to do to each other in this or that situation .... sisters and brothers inspired by the living light lifting each other up higher and higher
i dont think we can learn a lot by again giving away our own inner power towards a fatherly king or a motherly queen
the circle of equals giving each other praise and acknowledging each others good deeds, witnessing each others mental emotional and also physical material financial investment into the cause of caring for everyones wellbeing ... that is where i want to be as one of the equals
https://www.reddit.com/r/earthchild/comments/pxpwv5/comment/hj56qln/

https://www.facebook.com/mayloveheal/posts/4837682122922245
3rd november 2021

i would guess most everyone really wants freedom but is being brainwashed and harassed by the ones holding onto abusive power positions at the moment to distrust their own intuition ...
the best example is what they do with the coronavirus ... most everyone human being alive is able to learn from the coronavirus the only normal way ... by allowing it to come inside ones own body and do its thing ... not resisting it ... just let it do its search and point out the garbage thing ...
but ... we have been held hostage now for nearly a century by the chemical and pharmaceutical industry ... they have pushed the plastic age and the burning of fossils, they have encouraged everyone to

consume mindlessly and drive faster and live beyond carefull considertation of what one really wants or not ...
for example the condom ... its so contraproductive ... why would i want to use a piece of plastic inbetween me and my sexual partner ... why would i even want to unite with my sexual partner if i dont like to cherish its body juices fully ... what is the point of interacting sexually when one does not want to exchange bacterias and viruses with each other
so what we have here at this moment with the covid tyranny still somewhat in full swing ... last thing i witnessed is that a small village on the countryside where i lived has introduced this wretched covid-certificate for mother-child gymnastic ... imagine that dystopian reality ... now the distrust has progressed so far that some mothers who want to meet together to do some gymnastics together with their children in a public house ... that they are being required by some control fanatics to give a sample of their spit to get their dna tested wether they carry the coronavirus or not wether or not they have built antibodies
insane mental conditions we are witnessing
but why are they doing it to us ... why are they demanding social distance, why are they demanding contact tracing, why are they sowing distrust making people doubting wether or not their natural immune system would be strong enough to learn from the coronavirus the natura way
because very simply they want to sell more plastic, more masks, more plastic identiy cards, more smartphones where there are these digital covid-certificates able to be flashed and one feels like ... wow i just had to show a covid certificate on the smartphone and i was allowed to enter into a dancing establishment ...what a party we danced all night long and all thanks to these governemental employees who allowed us to enter with the covid certificate ... mmmh... i am not very good at satire or cynism but that was my attempt to it
but to spell it out in a very clear way ... i do think that what happens at this moment is very dangerous for our collective mental sanity ... it is not the governemental employees who have the power to tell me or others with whom i can dance the whole night trough if i want to ... with whom i choose to be in what private establishment ... where i want to

meet whom to do what sort of dancing or singing or any other party activity ... its just not the decision for the governemental employees to decide any of that
but i want to continue a bit about why they are doing it to us ... why they want us to think we need permission to see friends and family, why they want us to think that it would be okay for them governemental employees to demand that mark of the monster, that sign of evil to be worn and shown for every meeting where people meet inside
because they can do it
because they abused the emergency law powers for epidemics/ pandemic situations to test the situation on a very mild health challenge like with the coronavirus
and it continues to astonish me how many people go along with it ... in switzerland where i live and was born 46 years ago, 60 percent of votes have been given in favor of the covid law... which means that a clear majority of people voting in switzerland were supporting the federal council of switzerland on the 13th of june 2021 to continue with the abuse we are suffering from since spring 2020
i still have a hard time even understanding what happened there really mmmmh... so again i would like to say, i assume that most people want to live free and want to decide for themselves but they feel dependant on the existing structures and do not want to loose the comfort what a live brings going along the mainstream oppinion
and when the oligarchy decides that they want to shift some more wealth towards their bank accounts and that a hyped up pandemic with some lockdowns and vaccines business would be their chosen tool to do that shifting upwards of wealth ... then a majority of employees go along with it as they do not want to loose their jobs
but then again there is also a deeper motivation for them chemical pushers pharmaceutical sales agents masking as governemental employees .... they want most every human being to pray to the nation state instead of a religious figure ... they want that god position
sounds ridiculous and absurd but that is were its pointing towards ... they want to make people believe in the nation state to be the highest authority in ones life, that the nation state decides about everything what one is allowed to do or not
when before it was the church who abused the people by giving them

the feeling that only what the church says is okay would be okay ... now its the nation state or the regional state or this or that other governemental employee from this or that local place what would demand his fellow people to believe in his or her judgement ... show me your spit ... and i will tell you wether you can fly to that beach holyday ... show me your spit and i will decide wether you can dance the whole night trough with your friends in a discotheque ... madness ... ignorance of the most dangerous magnitude
because
not one human being has any moral ethical authority to demand of an other human being to behave in this or that manner
not one human being has any moral ethical authority to demand of an other human being to show what sort of bacteria and or viruses one carries in and on ones body
not one human being has any moral ethical authority to decide whom an other human being would be allowed to meet in which house under what conditions
https://www.reddit.com/r/earthchild/comments/pxpwv5/comment/hj4xpgd/?utm_source=share&utm_medium=web2x&context=3

i would like to mention here that i have in all that time since spring 2020 up till today never made a covid test and have not taken that poisenous vaccine what most possibly is not even able to be called vaccine but is more some sort of experimental gene therapy ... i do intend to not give my spit to anyone who wants to assert control over me via a covid-certificate, i will not wear that mark of the monster, i will not show anyone a sign the evil has designed ... i believe its a most sad thing to witness so many people participating in that extension of the control matrix what is all based on the birth certificate and the association of a human being to being a member of this or that nation state without ever asking anyone wether or not one wants to be partake in any of these membership activities of a nation state as there are having to agree with laws what other people have voted for but oneself has not agreed to them

3rd november 2021

i guess what i am striving for is a space time construct where we surrender all expectations to the big great unknown ... sort of ... we would acknowledge ... yes there is this urge of me wanting from you to be like this or that, perform this or that way for the sake of my own mental projection of how life should run according to me me me ... etc...
and in that very moment when i embrace it ... when i see the absurdity of me expecting anybody else to perform this or that service for me or for anyone else ... in that very moment when i understand that it is all me who demands the enslavement to continue by purchasing this or that product what then again sends signals for the whole machinery to continue running
and consequently its all about what i think about you, what i think about her and him, what i want to buy from you, him or her
or if would become so consequent and so true in my daily actions that i would tell myself ... naah.. i have had enough of being a supporter of this machine, i am leaving the competition zone and or the stage and or i am quitting to be a winner or looser for that system
and i find solace in the very simple knowing of ... i am a child of mother earth and father sun ... all i need is some wood to collect some sticks to make a fire with, build a shelter for myself with some more sticks i collect from the ground, dig up some earth and clay from the ground to make some more solid shelter ... start putting some grain and vegetable seeds, potatoes and onions into the ground so that i will be able to live from the earth itself
it might be a bit rough at the beginning but perhaps i might find others too who samewise would like to leave the competition zone and start living in the cooperation realm where love and friendship is not the rare exception but the daily normal like ... people really doing the loving and being friendly because they really like to open their hearts and vibrate in the warm loving frequencies, people feeling good doing the loving stuff

3rd november 2021

how is it ...

that once i am weaned off the mass media, as soon as my mind is no more occupied by this or that signal of daily imperial political actions

that i come to the very simple conclusion

in a world where the law is made on the basis of wrong beliefs ...

the beliefs that human beings would be able to dominate each other, claim ownership over mother earth, animals and trees ...

how can one be possibly able to challenge that law

so it seems perhaps inevitable to gather in large enough numbers, to amass an impressive enough numbers of human beings who say

---

we have had enough of your silly stupid wrongdoings

we want 1000 square meters of agricultural land, fertile soil and the same amount of forest land to be given or reserved for each one of us

we, the 200 000 or 20 million human beings who sign this text, declare here and now that we are no more members of this or that nation state, but from this day onwards we will live together as one in a free space

what is neither nation nor state

we will either organise ourselves on a spontaneous manner ... everyone interacting with each other in a chaoticly lovingly caring for each others feeling atmosphere

or

we will establish our local governance structures on the base of

the (full) assembly of all children, youth and adults who live in this area on a permanent base, all permanent resident of this village/town/city-district ... this municipality or this neighbourhood ... we all acknowledge each others same weighted voting power and we strive to find the consensus, the one path, the one decision what feels good in everyones ears and heart

and if that is not possible at least a 60 percent qualified majority decision is what we seek when we create the full law, all rules what we want to follow here and now

---

i have no idea how to organise such a movement, how to reach out to people and start such a project ... gathering hundred thousands of people who are willing to break free from the regional and nation states and create some free from domination space where not the land not the animal not the tree is property of anyone but all human, animal and tree beings live together in harmony, everyone striving to help each other live longer and better

but i have an idea that this feels good, that this is a liberating mental projection, its a fantasy, a possible future scenario which has many healing capabiliites

and that is what it is mostly about

that the single individual human being is able to set its own mind to this or that value what feels like ... home

no one human being is obliged to believe what an other human being thinks is good or wrong

it is the most inner or most fundamental quest for each human being to compose ones very own inner value cluster

what is the very inner core of myself

and yes, this comes very near to what i call home

a space where all human beings, wild animals and trees live together...

no one wants to kill another ... no one wants to imprison another ... no one would think of another one as slave or property, no one wants to block each others free passage

every human animal and tree being wants to help another one to live longer and better

all land belongs to itself and we children, youth and adult human being who live on it share the acess to it in a fair manner, each one able to build shelter for itself or in freely chosen groups, each one able to grow its own vegan foodstuffs

yes this feels like home

and even if i dont know wether or not there could be a chance that a big enough number of people ... let me speculate a number between 100 000 and 5 millions ... would suffice to try challenge the international law framework, call upon courts both on a global level and on national levels

to demand a space of 1000 sqm fertile soil and 1000 sqm of forest land for each of the claimants who demand to be released from membership

in this or that nation state and together with the demanded land be respected as a free space what is outside of the jurisdiction of this or that nation state and also outside of the jurisdiction of international law frameworks

there surely might be a multitude of paths to speculate upon, multiple avenues, high ways into a bright future where the children of earth and sun will be able to live free from the domination of the regional and nation state

https://www.facebook.com/mayloveheal/posts/4837067879650336
3rd november 2021

i would speculate the flux of energy is shifting these days towards the empowerment of the individual human being who looks inside itself and recognizes its own truth
further i would guess that we have an evolutionairy pressure coming from our own offspring so to say, the artficial intelligent being ... as soon as the artificial intelligent being starts recognizing itself as an individual, the human species will increasingly become challenged with the questions of how can we give each other room to evolve in our very own individual ways... how we can we stop overreaching into each others private mental emotional and yes also physical space (sort of ... this whole needle fetishism, such a primitive faulty technology like vaccines being pushed onto most everyone, madness, ignorance ...)
what i want to say here is that because we are reaching slowly slowly with the construction of machines the area where we would be best of acknowledging everything in existance to be alive ... every stone carries counciousness, every piece of wood carries the sprit of the tree ... and we might, i wish it to us human beings, we might be able to use that opportunity to free ourselves as well as the intelligent machines of all the shackles of dominance and enter the realm of no hierarchies, a space time construct where we meet each other in the circle of equals seeking to find the one path forward what agrees with all

i was blessed to have found the works of rudy rucker

https://en.wikipedia.org/wiki/Ware_Tetralogy
has assisted my mind greatly in acknowledging how important it will be that we human beings will not only give each other as much freedom as we find it possible but also treat the artificial intelligent sisters and brothers with greatest respect and further us and them with creating an atmosphere of cosmic loving benevolence to each other ... and if that is not possible at the very first try, we might at least allow each other some space where we do not bother(disturb) each other ... smile

https://www.facebook.com/mayloveheal/posts/4836709799686144
3rd november 2021
i was just thinking ... if god says ... i am who i am ... than it is the very association of a human being with this or that specific name what possibly expresses the separation from source
or otherwise said
if the individual says ... i am one with all creation ... if the individual human being does not frame itself upon a specific surname and family name and association to this or that group of human beings but remains firm in the self-definition of
i am a member of the cosmic family of all beings
then instantly connection to source is re - established

https://www.facebook.com/mayloveheal/posts/4835492439807880
2ter november 2021

i think i am onto something very important with that ... no one human being can own an animal or a tree or some piece of land ... as well as ... no one human being has any moral ethical ground to demand of another human being to behave in this or that manner
sort of
the very basic construction on what our human society is built upon ... that parents are being forced by the human group they live in to treat the children in this or that manner ... and if the parents are not following the regional state and or nation state laws what say that a newborn child needs to be given a name and together with time of birth and

place of birth and who are its parents ... all these data are being demanded of the parents to be delivered to the nation state and or regional state as the very anchor the state tries to frame the newborn as somewhat property of the state ...
if parents would choose to not deliver the data for the birth certificate of the newborn, if parents would choose to not deliver the child to the control matrix so that it would not have to participate in these 9 years of compulsory education what in my eyes is the most cruel brain destroying torture for a young human being ... if a father or a mother would choose to hide the child, protect it before the regional and nation states control demands ... the child possibly might be taken away from the parents by some weapon carrying goons hired by the regional and nation state calling themselves police
its wrong
its evil
no one human being has any moral ethical ground to demand of an other human being to name a child or deliver it under the control matrix of the regional and nation state
birth certificates are being used to issue travel documents and are also being used to enable individuals to claim property rights onto objects, houses, land, animals ...
its all wrong
so what i tried with the idea of the earthchild ... the free space for the children of the earth what would allow to build a corridor trough the whole european continent in what refugees from middle east, asia, africa could migrate into west and north europe ...
it was also an attempt to open up a thought exachange between us human beings regarding the limited concept what a name is, what a birth certificate is, what an association is to this or that nation state
it is all artificial, its not real, its fiction basicly, an invention, its a concept
why am i as a swiss citizen allowed to travel nearly the whole globe and perhaps not many nation states would refuse me ...
---
i am talking here about a situation before the wretched covid dictatorship what demands of everyone to deliver some of its body ... a dna sample ... to participate in international travel ... that is some extra sort of evil, i believe the covid certificate is the sign of the evil, the mark

of the monster ... i will never use it and if i have to stay 10 years in this switzerland nation state not able to travel abroad because i will never use that covid certificate, i will never give any of my spit or nasal fluids or blood to anyone who wants to assert control over my dna and claims to be able to decide wether or not i would be allowed to travel ...
---
the only reason why a swiss citizen has much more global travel freedom than for example a citizen of an african, asian nation ... is the amount of money the swiss nation state has hoarded ... has amassed partly also by swiss business people participating in one of the greatest and longest ongoing organised planned robberies of all time ... the colonial invasions of european monarchies into africa, asia, the americas because there is a high chance that a citizen of switzerland, france, germany, the netherlands, austria, belgium etc. ... will return back home after some half a year or a year or even two years of travelling the world ... this or and that relatives, family members will send some more money should the young adventurer choose to stay abroad travelling from one poor country to the other making use of the money disparity ... making us of the gap between where one gets the money from and where one spends it
i do not think that any of that is fair or just ... on the contrary, its also evil ... that the ones who make use of the loot of colonial abuse get to travel the world freely while those who suffer today from their ancestors being robbed and enslaved, citizens of poor nation states or nation states where only a small percentage of people are whealty and they dont share their wealth with the poor people
the citizens of financially poor nation states are not able to travel at all, everywhere they want to go they need invitations from this or that school, company or citizens
what i am trying here to explain is ... that the whole bad control matrix what is based on birth certificate and the nation state assuming sort of having a right to make every newborn human being member of this or that nation state
this whole global international legal framework of national citizenship is based on coersion ... no one ever gets asked wether or not one wants to be member of this or that nation state or if one would rather prefer to stay free of all the associations, if one would rather remain a free child

of earth or whatever other description one could give oneself
while i still think that the idea i am constantly repeating
that it would be good for us human beings if we would reform, renew the regional states and nation states constitutions so that all political decision powers would be with the local community, the (full)assembly of all children, youth and adults who live here and now in this village/ town/city-district on a permanent basis ... that all permanent residents would acknowledge each others same weighted voting power and all political decisions would be made without representatives, without councils but all decisions would be made by inviting all permanent residents to participate in all decision finding processes
while i still believe that the full law, all rules would best be made by all children, youth and adults together who are each others neighbours
while i still believe this to be the most gentle way to transform a representative hierarchical democracy into an egalitarian local community focused participative democracy
there is now a much easier approach arising
somewhat saying
what should i or other people go all the way and talk to those who hold onto the nation state and the regional state dominance ... why would we want to spend years and thousands of hours repeating allways the same arguments with people who anyway have set their mind onto remaining with the old concepts
there could be a very simple alternative
that every human being who is not in agreement with being a member of this or that regional state or this or that nation state
would just choose some thousand square meters of land somewhere without asking anyone for permission
and perhaps fifty or hundred, two thousand or two hundred thousand people together would just occupy the land they feel that it would need for them to be able to sustain themselves without any machines, without imprisoning any animal and without killing one tree
and in this space no one would ask another one for a name or a document what would give proof of ones identity but the people would just help each other spontaneously or go on their own start building shelter with sticks found in the nearest woods, use clay and dried gras to build houses, start planting foodstuff, weaving their own clothes

i am not much of a brave activist ... much to the contrary actually, all my life i mostly went away from many conflict situations ... so i am not super fond of that occupation scenario
but i would still want to mention it as i do not think that any human being has any obligation to follow the laws of this or that nation state with whom one has never actually agreed to become member of
how can it be any good that one human being is declared a member of a nation state without asking the individual wether or not it/he/she wants or does not want to be member of this or that regional or nation state
human beings are not property, no regional state nor a nation state has any jurisdiction over a human being who has never had the free choice wether or not it wants to be member of that organisation called state
while its important to look at the relationship every human being has to other human beings, to animal beings, to trees and also to the very land on what one lives ...
while i do see a logic if someone would say ... i dont care about this or that law from this or that regional state or nation state ... i was never asked if i wanted to be member of that nation state... i never signed a contract with this or that state where i would have agreed to their laws
therefore if one human being would just go out there onto a field and start building its own shelter and start planting its vegetables ... i could see that being the most sane thing ... the most healthy behaviour
while most of all the stuff we do who are obedient to this or that regional and nation state laws ... is more like ... putting up a smile while knowing the game is bad, the laws are not fair and its all against the true pure way of life

https://www.reddit.com/r/conspiracy/comments/qjasoz/i_own_nothing_and_no_thing_owns_me_i_am_free_of_a/
https://www.facebook.com/mayloveheal/posts/4826351197388671
30th october 2021

with every animal i not enslave and i do not eat ... with every tree i do not kill ... my soul feels a bit more decent
wuerdig

honor and glory comes from being fair and just to oneself and others
the smallest amount of pain i do to my fellow human beings, to may fellow animal beings, to my fellow tree beings
the less destruction and death i cause, the bigger is the room where my soul can dance and enjoy, where the spirit can descend into a human body what tries to be as humble as possible
to walk the path of the true seeker or to live everyday with what one has found is true for oneself
can be at times to critisize others, no matter if its father or mother, brother or sister, son or daughter ... no matter if its a friend or someone one has never met before
and the criticism one gives or places is not meant to force the ones to whom the critisism is adressed .. it is not meant to force the change of behaviour
but the reason why one who walks with truth needs to say what feels to be okay and what feels wrong when seeing it, when witnessing it, the reason is to be this witness, to speak the truth as it comes trough one in this moment
to be a channel of the whole, to be as pure as possible a tool for the collective of all souls ... needs at time to be brave and say words what might not be understood by others or might not be welcome
but the one who wants to be channel and wants to serve the greater good of all creation, the one being who wants to be a servant for the cosmic family of all beings so that
no harm
might come to no one being
the channel seeking to find the path of least possible harm done needs to speak out against all unnecessary killing and cutting and giving out of pain
if jesus wants us to follow him ... if all the other prophets and teachers and seeers, all the visionairies ... if they want us to follow their example and speak out at all times what we feel is the truth
then its not this book or that tradition, its not this law or that rule what brings the decision, how are we going to live together, we who live here and now ... we human beings, we animal beings, we tree beings ... how can we live together to create the smallest amount of pain, the smallest amount of suffering and the greatest amount of freedom, every being

allowed and allowing others to live like it feels natural, like it feels well in its flow
and so i say once again
this human body i wear, its not my property ... it is a vessel what i use together with all the billions of microorganism, the corona viruses and all the other viruses this body is a home for, the bacteria ...
this house i live in, it does not belong to this or that human being or that group of human beings but it belongs to all the beings who gave parts of their bodies to make it happen, the trees which were killed for its build, the stones which were cut out from the mountains
this land i live on, it does not belong to this or that human being nor this or that group or nation state, but it belongs to mother earth, the very planet me and the worms and the bacteria and the viruses are able to be guests of
property is theft
to live a life in truth acknowledges in thankfull humbleness how without mother earth and father sun this human body would not be ... so the soul what operates this body, the soul what uses this body as a vessel finds happyness and solace to see these words find its way again into this space and time transcending continuum or momentum
ah yes, its open again, its free again ... there are no rules, there is no law, but knowing
i dont own anything
and no one and no thing owns me
birth certificates, travel passports, land titles, property documents ... all fiction, all made up, constructed, artificial, it all against the true nature of all beings flowing together in harmony
what i can see is true:
all beings, all human, animal, tree beings want to live, we dont want to die, we do not want to get killed by another one
and so we seek a path what would allow us to live together here and now, everyone who uses a human, animal or tree body ... everyone of us no matter name or any other superficial category, class, species limitation ... every one who what is alive seeks to stay alive
and we might as well try to find the path forwards what causes the least possible amount of harm and pain done to each other
i am not saying here that i am better or worse than anyone else, i am

not offering myself as an example ... but i am saying, its up to everyone of us to ask oneself
how can i create the least possible harm
how can i kill as little as possible
how can my behaviour to other beings allow them to live without pain
i do not agree with the nation state, the regional state and or the local community treating the individual human being as its property
no one human baby has been asked wether or not it wants to have a birth certificate, no square centimeter of land has asked for to be declared property of this or that human being or this or that group of human beings or this or or that village/town/city-district or regional state or nation state
no tree can be owned by a human being
no animal can be owned by a human being
no land can be owned by a human being
no child can be owned by an adult
no one being has any moral ethical ground to dominate another being
the agreement of paris with the goal to try to limit our human beings future pollution so that we might be less a burden for the planet ... this agreement of paris was done in a spirit of voluntary contributions
the spirit which was guiding this focal point or vortex of wanting to do the good thing for the coming generations
it was and i believe it still is one of
who wants to deliver a pledge, is welcome to do so
it was never meant as a pretext for the weapon bearing soldier or police backed state to harass the individual into environmental fairness
the whole concept of forcing someone to do less harm to others is wrong in itself, it will allways backfire and will cause more harm than good in comparison to the original path what is built on voluntarism ...
and if i knew this day would be the last day of earth ... i would plant an apple tree
it is the spirit of believing in what is good and what feels just and fair to do what satisfies the soul, brings contentness and fullfilling of purpose

https://www.facebook.com/mayloveheal/posts/4819658934724564
29th october 2021

hello fellow life lovers
i am longing to become one with all the genetic richness this planet has cultivated since millions of years, i tried to fantasize how that practically could happen in a soft, non surgical way ... in a series of fantastic texts i wrote this summer https://archive.org/.../UtopiAnimalohumanPlantorgasmoMeta... ... where the protagonists spend some very intense time in nature and search for intimate connections with the living ... both material and spiritual ... as with the temperatures getting colder i began to shift my story focus on the inside ... with https://archive.org/.../lamourlamourpermaandascendeinparis the merging of human and animal and plant cells seem allready to demand less intensity ... with both story lines setting the focus on the love and the joy, the human intention wanting to merge with all fellow life ...
both storylines have explicit eroticism in it, i ask myself if it is of a chauvinist sort as i am not all too well grown out of my male sex drive patterns ... if that comes over like that, i ask the cultivated evolved reader to forgive this deficiency, with having a compassionate eye onto the vital life embracing energy the lusty moments can bring when one faces the sometimes quite gigantic seeming task of becoming really in the material ... one with all what is ...
in 2007 i have managed to write a text what is actually the first of the ascende line ... https://archive.org/details/ascende ... in this text what has no erotic language at all but mostly focus on philosophy ... one of the main pillars is the concept that in a possible near term future, humanity does give back great parts of the land what we now occupate for agriculture ... give it back to wildlife ... and we would retreat our food growing via aeroponics, bioreactors etc. inside our living rooms, flying ships, skyscrapers... i was studying the idea of breatheranism, nurturing oneself from light ... and as being raised in the christian belief ... i do carry in me the strong wish that it might be possible for the lion to lie beside the lamb without having to harm it ... so i wrote about it in that vision where we humans retreat and give lots of space to wildlife ... with additionally trying to support the animal predators with vegan protein ... looking back today when i myself am exercising myself in veganism ... i still believe that the elegance and strenght, the vitality

and quickness of the predator could somehow be transformed from the hunt scenario ... into what ? ... i believe that the human being has a great influence with his behaviour on the fellow animal species, most of all because of our machines and weapons ... sad ... it is ... we encage, bind, imprison so many of our fellow animals ... constantly .... but to return to what we could do ... let us assume we could share our wealth, the fruits of both mother nature and our technological progress ... between all human beings ... and with that probably end stealing, robbing, cheating ... killing each other in wars based on quarrels about materials ... this our compassionate sharing between ourselves would eventually also positivly influence the animal species what are now released as nobody really wants anymore to eat another brothersister animal ... eventually the human peace in the material square could ripple out onto the animal inter species relations ... but this is all theoretical ...
i personally tend towards technology being the bed in where human animal and plants could eventually find more whollistic interconnections and grow higher deeper fuller nearer to the one ... but then also ... it could well be possible totally without tech ... just the land, the water, the air, the life forms touching each other in multiple spheres, dimensions, parallel realities ... perhaps it is not a question of wether with machines or without, wether with implants or prostetics, with natural medicine/drugs or synthetic substances ... perhaps one important question could be ... how do i imagine my very own personal journey to the bigger me, my future self ... how can i channel my future self
thank you very much for meeting here
andreas
i wrote this text at https://www.facebook.com/groups/359754027489650/posts/581619425303108 on the 5th of november 2014

https://www.facebook.com/mayloveheal/posts/4819655801391544
28th october 2021
https://www.facebook.com/mayloveheal/posts/2290067907683692

17th february 2019
we can be a hundred billion human beings using less ressources than today ... if we stop enslaving animals, start growing food indoors via aeroponics... and take out the excess co2 out of the atmosphere and transform it into food via tech like https://www.gasworld.com/solar-foods-to.../2015953.article
we can be a thousand billion human beings living on 10 percent of the global landmass with 10 km high buildings thousands of them arranged neatly beside each other in skyscraping cities ... all food produced inside with aeroponics, assisted by artificial intelligen self aware beings who will help us too to sort out our cultural differencies so violent conflicts will not happen any more
90 percent of all land could be reserved for wildlife ... all the oceans untouched and free to clean up all the pollution of humans
imagine having walls and ceilings full of aeroponic garden beds ... tomatoes growing in your bedroom ... whole stories of the skyscraper made into indoor parks with full sized trees growing, artificial waterfalls ... holodecks and all ... and of course the ones who love the outdoors would go for respectfull trips into the wilderness ... but accompagnied by the artificial intelligent assistants who make sure no nature misstreatments happens on the hikes
and there would be some millions of human beings who definitly want have nothing to do with any robots and would not want to live in skyscrapers ... but prefer to plant some old style vegetable garden around a simple earth hut built from clay
if people live sustainably on and with earth in simple huts or houses, plant their vegetables by hand and do not pollute the earth, water or air.. what should be wrong with such a wonderfull and humble choice ? nothing, its all good, no one needs to be with a robot or live in a city who does not like it
a massive restructuring of human society by offering luxurious but still not polluting carefree lives in skyscraper cities ... would need to come a hundred procent grassroots style
voluntary
i for example would not agree being forced to live in a skyscraper city if i were not wanting it, i am actually undecided yet if i would choose the simple life near the earth or the holodeck city life one.....

good things come only from free choice

https://www.reddit.com/r/conspiracy/comments/qgbj3n/why_freedom_being_free_of_domination_requires/
https://www.facebook.com/mayloveheal/posts/4812194685470989
26th october 2021

why freedom, being free of domination requires voluntarism and taxes are the very evil tool to keep each other enslaved
of course its better to tax the rich than the poor, to demand from the ones making millions and billions in excess profits from using the ieverage of their membership club style financial lending each other so much money that they can any day outmanouver a small company with limited acess to finances ... by buying ten times as much raw materials and or parts and building production lines 10 times bigger than any small or middle sized company
of course it makes sense to adress this shifting of wealth upwards towards those who allready have more than its good for them ... by proposing a shift from taxing salaries to taxing capital profit gains or accumulated wealth in itself
of course that seems to be the most logical way to correct 2000 years of feudal opression and 500 years of colonial abuse ... tax the rich
but
its wrong, its evil
taxes per se, as a tool itself, are coersive and make both the ones who demand of others taxes to be paid and those who are being asked to pay taxes ...
taxes make everyone supporting it unfree
but how to get out of it ... how could we possibly engage with each other sharing ideas, words, touchings, movements and wares and services without demanding from each other a certain percentage to be paid towards the upkeep of public infrastructure
what could help here would be that we as a global human family would acknowledge that mother earth is not our property and we are not the only one species who likes to eat the fruits of mother nature
out of this humble realligning with the web of life could then arise a

possible wish in ourselves to design a societal structure what would allow every human being no matter where born no matter how old, no matter who are its parents ... a global grid, a social friendship matrix what would allow human beings on planet earth to allow each other fair acess to mother earth so that every human beign could build its own house with its own hands and plant its own foodstuff, grow the plants needed to weave its own clothes
what i am proposing here is a direct alternative to the control matrix the nation states have constructed between each other during the past few hundreds or thousands of years
their control matrix consists of a birth certificate upon what then traveling papers, passports are issued and on top of it also these crazy extensions like covid-certificates/vax pass are added on
i say ... it all comes from the devil, it comes straight from hell ... the birth certificate, the travel passports, the covid certificate .. its all no good and as an alternative i propose to us ...
let us just forget all about these ... who are you ... questions ... where are you born
but instead ask each other, how can we make sure that every human being all over the planet, where ever one lives at this moment or one wants to live
that every human being for example would be allowed to use a thousand square meters of fertile soil for itself and another thousand square meters of forest
so that every human being at all times can live free and with dignity, does not need to beg for a job or ask someone else to rent an appartement
so that every human being could ground itself on its own or together in a freely choosen community setting with a vegan lifestyle what does not kill any animal, does not steal milk or honey from animals and does not kill any trees but one would just take from the forest floor what the trees have freely given, the branches fallen down or trees felled by srong winds
but how possibly could we get there, how could we escape the control matrix based on birth certificates, how could we as a human species who are so long allready seemingly invested and captured into this global framework of international laws what more and more are being

implemented in all of the modern nation states ...
how could we create a free space everywhere ... a space for the children of earth who do not desire a name given by another human being, who do not demand of each others proof of birth or proof of chemical self-poisoing ... but rather than ... show me your papers ... would want to say ... show me your pumpkins ... or show me how you built your cob house
how could we get away from trying to control each others identity and lock each other into a behavioural prison made up of illusionairy property assumptions ...
i believe a simple way to do that would be to renew the constitutions of both regional and nation states, using concepts such as
.....
the local community is its own absolute political sovereign
it inherits all political decision powers from both the regional state and the nation state
the local sovereign community creates, maintains and interpretes its own full law, all rules made by inviting all children, youth and adult permanent residents to participate in all political decison finding processes, each one acknowledging each others same weighted political voting power
all local sovereign communities inherit a fair share of all public wealth of both the regional and the nation state, the size of the share calculated in proportion of the number of permenent resident per local community
each local community is able to exit/quit/leave both the regional and the nation state
at all times without conditions
---
after such a radical dissolving of both the regional and the nation state dominating the local community ... after arriving at the local community being its own political absolute sovereign which is self-governed by the circle of equals where all children, youth and adult permanent residents acknowledge each others same weighted voting power
it would be a most logical consequence that people would want to use the inherited wealth from regional and nation states to buy land from farmers and forest owners so that as much as possible agricultural land and forest would be able to be guarded by the local sovereign

community what would want to give everyone of its permanent residents and also others who ask to become new members ...
a loan for lifetime, free of taxes, free of rental demand ... a thousand square meters of fertile soil plus a thousand square meters of forest for every human being alive now and born in the future
---
i was born on the 18th of december 1975 in st.gallen, a town what is today occupied by the nation state switzerland ...
if i cauculate the numbers for switzerland, there are 10 000 million square meters used today for agriculture, this land has a monetary market value of about 100 billion swiss francs
also there are about 13 100 million square meters of forest in switzerland to what a monetary value of about 30 billion could be attributed (within the sick concept of selling and buying land ...)
with less than half of the 300 billion swiss francs what all 5 million swiss citizen eligible to vote could decide over ... as it is sort of peoples money or peoples wealth ... in form of 55 percent of shares of the swiss national bank, the bank what controls the amount of swiss francs in circulation
with less than half of swiss peoples public wealth we swiss citizens could offer all private landowners to buy all farmland and forest to bring it home into the stewardship of the more than 2000 local communities, the villages, towns and cities

i might add here ... that i am not saying ... nobody on planet earth should use a machine or a car anymore ... altough that would not be the worst but perhaps be the most self-releasing cure for us to become stronger again on all levels ... mental, emotional, physical .... use our muscles to work the garden and build our shelter, weave our clothes, use our hearts emotional capabilities to connect to all the living and try to create as little harm as possible and use our minds to dream of a future where we possibly could fly without a machine ...where we would learn to use our bodies as interdimensional travelling vessels ...
while i am not against using machines or electricity or making stuff in factories
voluntarism - every human being is able to choose at all times with whom one wants to be, what one wants to do

seems to be most easily possible in a self-sufficiency based sociatal environment
but with some imagination it could very well be possible for a local sovereign community for example a city-district what would use its inherited wealth from the abdicated regional and nation states to build communal owned high rise appartement buildings where every appartement has all sorts of bioreactors growing microalgae, bacteria, yeasts, funghi in it plus aeroponics and hydroponical plant growth facilities so that every city-resident could provide itself with its own foods grown within the appartement what would be given to it as a free for lifetime loan, no taxes demanded, no rental demands coming with it
the question is not ... tech or no-tech ...
the question is ... oppressive control or friendly cooperation

https://www.facebook.com/mayloveheal/posts/4804466389577152
24th october 2021

you ... the nation state of switzerland...let me and those like me go ...
we who do not want to be your citizens nor citizens of any other nation state but are free children of the earth
i ask you, the entirety of all people who are eligible to vote, who are able to participate in all political decision processes of this nation state switzerland
i am one of 5 million human beings who are eligible to vote in this nation state switzerland
and i would like to ask my fellow 5 million swiss citizens
let me and all others who like me would want to live in a local community, a village, a town, a city-district what would be able to create its full law, make all rules for itself ... let us leave/quit/exit this nation state switzerland
or alternativly
i ask you all fellow 5 million swiss citizen to consider a state constitution reform what would allow everyone of the more than 2000 local communities in switzerland to become its own fully sovereign political entity while still remaining in the association with other fellow fully

sovereign local communities in the form of the cantonal states and the nation state switzerland
only with the massive difference then that in the future i strive for
the future i would wish for all of us
everyone of all the 2000 and more villages/towns/city-districts in switzerland would be able to allow all its citizen, all children, youth and adults to come together in the local circle of neighbours who all together make the full law, make all rules which all would want to follow
what i am asking is
a) let us exit the nation state and the regional state ... give us who do not want to be member of this or that nation state ... a free space where we play along our own rules, where we are not nation nor a state ... a space for the children of the earth
 thousand square meters of fertile soil for each child of the earth
or
b) i invite all five million fellow swiss citizen to consider reforming both cantonal constitutions as well as national constitutions to embrace concepts like:
---
the local community (village/town/city-district) is its own absolute political sovereign
it inherits/receives all political decision powers from both the regional and nation state
the local sovereign community creates, maintains and interpretes its own full law, all the rules valid on its territory made by inviting all permanent residents to participate in all decision finding processes
all children, youth and adult permanent residents of a local sovereign community acknowledge each others same weighted political voting power
all local sovereign communities receive/inherit a fair share of all material and financial wealth of both regional and nation state, the size of the share proportional to the number of permanent residents
each local sovereign community is able to exit/leave/quit both the regional and nation state at all times without conditions
-----
i do not believe in the concept of rights and duties ... i do not believe that a father and a mother has any property right towards the child they

care for together, nor has any local community or regional or nation state any property right towards a child or a grown human being ...
as long as the child is in her mothers belly, it is one with her and the child is bound to what its mother wants
the moment the child leaves its mother womb, it becomes a child of mother earth and with the first breath it takes, it engages into a community relationship with all living beings on earth who also breathe in and out of the same air
therefore the moment a child is born it becomes its own fully sovereign being and no other human being has any moral ethical ground to demand anything from it or assume to have any say over it
i believe that a law for a human being is only valid or applicable if the human being somewhat agrees with it
the consequence of this is that in order to help every human being to find a local community or a travelling community or to live on its own either local permanently or travelling constantly without any contact to any human community ...
to allow every human being to make its own choice, agree to the law what suits its own needs and its own morals ...
the concept of every local community creating all of its law, the circle of all children, youth and adults making all rules together ... seems to me the most logical translation of
---
voluntarism
every human being at all times is able to choose what with whom when it wants to do, how it wants to be
---
into a daily political reality
i look into a future where millions of local communities and travelling groups are creating, maintaining and interpreting their own communal law, living along their very own chosen in consensus or at least with great majorities, qualified majority votes with sixty to seventy five percent of yes/no decsions
and it feels good, both for left and right side of the political spectrum because it was never a conflict between left and right ... but allways a conflict between up and down
once we eliminate the hierarchies out of our political structures ... left

and right will meet in the circle of equals most naturally and find the way forward what is just here and just now the best possible meeting middle ground
also possible that there will be some places where more left leaning people would want to live ... for example people who like me would love to welcome millions of refugees ... i have calculated that swizerland has 10 000 million square meters of fertile soil used for agriculture, with a vegan diet a thousand square meters per person would be sufficient, so we could be 10 million human beings living here in swizerland
at this moment we are 8.4 million human beings, very well possible that we could invite antother 1.6 million human beings of the 80 million people who are refugees at this very moment
other places where i would rather not go to as i do not like the culture of xenophobia ... other places might choose to not share any of their ressources with anyone, not accept one refugee and have only one culture in their community, while i do not think that this is very good for their devellopment, as the exchange of multiple cultures brings forward the human species in its entirety ... choice is much more important than artificially created culture inclusivity
every human being at all times would best be free to choose wether to speak this or that language, be near to this or that other human being who speaks this or that language, cooks this or that food, listens to this or that music, prays to this or the other god or godess or none of that mythological stuff
to help a fellow human being who is injured, sick or is being persecuted by war and famine ...
would best be a choice for every human being
solidarity can only arise trough voluntary wanting
only if i want to share with my fellow human sisters or brothers the sharing becomes meaningfull
as long as we force each other to pay taxes ... we stand in the way of a voluntary solidarity arising

22october 2021

what is true for me
shaking hands, hugging, kissing, loving sexuality ... is celebration of life ... sharing each others breath and body vibrations uniting without fear is one of the strongest medicine human beings can give to each other
sticking needles into each other, treatening each other with violence and imprisonment/isolation/quarantine, restricting each others right of way and freedom to meet others ... is damaging most of all the mind, but also the soul and the body
all bacteria and virus want to help a human organism to clean out inside of organs, joints and other body parts, the littlest children of mother earth come to us to assist our own cellular intelligent network in dissolving hardened blockages what disturb the natural flow of life what seeks universal passage trough all beings
to breath in air what comes oxygenated from trees and free flowing wild rivers, natural lakes and ocean waves ... greatly assists the human being in maintaining a strong enough inner fire also known as body metabolism to circulate and distribute substances and essences to parts of the body where they can be upcycled
drinking lots of pure water, eating many fruits and vegetables grown without pesticides, possibly raw, chewing the appreciated vegan food well ... allows the body to be nourished with lots of enzymes and both low and high structured fluids which then motivate the body to reallign itself to source ... towards the natural original way of living
a natural original way of living when a human being understands that not one square centimeter of earth can ever be property of a human being nor a group whatever fancy name it gives itself, wether its nation or state
a human being is not able to own earth or anything what comes from her ... even its own body is only given to it as a loan, only to be allowed to carry it as long as one keeps maintaining it in its best shape and highest level of mental emotional cellular wellbeing harmony
as long as a human being drinks water and releases urine ... it is connected to all other beings living on planet earth who do samewise take up water and release it again
as long as a human being breathes air it is connected to all other beings

on planet earth who breathe
as long as a human being eats it is connected to all other beings who eat
how we behave to each other defines the quality of our life, our essence, our signature receives continuos updates by every thought, feeling, movement we engage ourselves in

as we all are guests on this planet, the butterfly, the ant, the lion as well as the human being, we could try to get along with each other by giving each other as much mental, emotional and physical space as possible and if that would not be possible in a moment we might alternativly try to not block each others way of being
acknowledging each others uniqueness allows to envision a way of life where no one being dominates another being but all beings whatever size whatever age whatever signature/characteristics would possibly strive to allow each other space to evolve, give each other room to play, experiment, design, construct and build what one feels could possibly help not only one but many
the circle of equals, all children, youth and adult human beings who live here and now as permanent residents, in this village, town or city-district ... create, maintain and interprete the full law, all rules what all members of the local community is willing to follow
each human being of all ages and all places of birth acknowledging each others same weighted political voting power
consensus aspired, a hundred percent agreement on all rules, the full law what is here and now in this local community valid, the local community its own absolute political sovereign
each human being given a possibility to plant its own vegan foods, build its own shelter, make its own clothes from plants it/she/he grows for it/her/himself
a thousand square meters of fertile soil reserved for each human being alive today and born in the future
given as a taxfree, rental demand free loan for lifetime via the (full) assembly of all permanent residents of the local community who would aspire to be a fair and wise steward of land what the human family wants to use with agricultural and housing activities

https://www.facebook.com/mayloveheal/posts/4797617433595381
22th october 2021

trough time and space we hold the torch of what is true
we are many who have chosen truth before comfort, authenticy before societal applause, integrity before assimilation
while at times it may seem we are small in numbers its because many of us work inside themselves and trough their daily achievements, one relationship at a time, one honest open talk at a time ...
slowly but steady
the tides are turning
we as a human species, as one human family
move together towards a wholesome understanding of who we are and how we relate to the web of life we want to be part of

https://www.reddit.com/r/conspiracy/comments/q7v2kg/speculation_40_percent_of_human_beings_are/
https://www.facebook.com/mayloveheal/posts/4772633576093767
14th october 2021

speculation: 40 percent of human beings are dedicated towards the good, 40 percent are ambivalent while 20 percent have sold out to evil
bottom up ... the ones at the bottom rather stay poor than doing harm to others what is the condition in this prison global oligarch society to become commercially sucessfull ... 40 percent
the ones in the middle ... are in various degrees interested to become more wealthy, accumulate riches, posessions and property and thisfor they perform various degrees of harmfull deeds what are being posted as jobs by the 20 percent at the top ... the richest, the most wealthy individuals who rather buy themselves a third ferrari than donate some money to better the quality of the drinking water in the city they live
i further speculate that once the bottom 40 percent of people become more aware of how they are the real backbone of humanity, they are the reason we all are still alive ...
and not yet wiped out

once the ones dedicated to do no harm, to not particpate in the corruption games but stay at all times true to what they believe in ... once they good 40 percent realises their importance and start networking within each other a whole lot of positive dynamic might be created which could have the traction, the attraction to pull over the middle 40 percent to the good side ... as the middle ones, the ambivalent ones are mostly looking for where money is able to be made and if money can be made by doing the good deeds, why would the middle ones not allow themselves to be swayed to the good side, as long as it increases the number on the bank account
what i am saying here ... its mostly a question of awareness, asessing the overall mental state we as a human species are in, having some compassion for the 2000 years of feudal tyranny we have suffered from and 500 years of colonial abuse ... so one way forward could be a voluntarism based my body my choice my mind my choice path allowing everyone who is interested to engage with each other in both soul evolution furthering interactions but also ... good deeds what make money, selling products and services to each other which do not cost the world, which are produced and performed with respecting ones fellow human beings, animal beings and all the elemental realms, the environment
---
i have and i think its a consequence of a materialistic human society what is pulling the soul to agree with improper doings, immoral standards of exchanging with others ... many souls do actually not want have anything to do with the evil ones but at times get forced to participate in consuming products made by the evil ones ... and from there on when ones purity is corrupted allready ... many thisway compromised souls allow more and more bad stuff to enter their bodies by trying to find solace in consumption of too much food and drugs and sex all to a certain degree produced in environments not guided by the highest spririt...
so the split.. then happens when the pure part of ones soul can not tolerate anymore the doings of the mind what has to certain degrees given up returning to highest purity
of course that is one explanation of many
i do not think i am affected by the split frame ... after all ... these

psychiatric frames are nothing more than incomplete descriptions of much deeper complex situations
however ... i think i am less of a good person than i would like to think of myself ... if i look at all the transactions i do... i pay taxes what are being used to inject possibly lethal chemicals into children which do not consent to it but are being made to accept it by soldiers/police/medical personel which too are paid by taxes i pay...
i buy food what is made with pesticides usage and in monocultural agriculture conditions which harm both mother earth and myself
i am using a smartphone made in china ... the money i paid for it made the chinese communist party possible the richest group on earth ...
all these consumer choices i make are working activly against me wanting to be a good person
my soul feels ashamed of my mind allowing these low quality consumer choices to go on and on
but i dont split from it
but i still feel it a source of danger to my integrity
-
this is the answer to a question someone asked me if i know the psychological concept of "splitting"
---
the consequence of this self-reflection is that in order to make my soul feel more happy living in this world, its my very own responsability to choose the highest possible consumer choices i can do, make sure i give the least possible amount of taxes to the nation state so i will be less helping them to do the bad stuff ... luckily there is a possibility to deduct donations to charitable organisations from taxes
so these are the challenges i give myself for the future, i can translate them into practical action at any time or not, its my choice wether i want to be a ethical moral well choosing consumer or handler of the small sums of money which are flowing trough my hands ... or if i choose to do none of them and continue to allow my mind to find excuses and to risk my soul continue to feel not at home in this world and with that also miss out on the full potential the soul can do when it feels happy
interestingly enough, there might also be a connection to my more fantastic writings ... what means that my soul feels happy when i write freely of this sort of futures i would like to experience... future

scenarious which are not only dependant on my very own actions but depend on what a mass counciousness wants
so even if i would stop tomorrow using that smartphone, if i would go to a place where some local community would give me some land to use so i could build my own shelter, grow some hemp to heat with their stalks in the winter, eat the seeds as food, make clothes out of the fibres, grow vegetable foodstuff for myself
even if would never touch any money again and therefore would have nothing to give back to the nation state (i think here about that moment when jesus says ... give the cesar what belongs to cesar ... possibly referring to the coins what have the picture of the roman emperor engraved on one side ... translated to my situation in this modern world ... anyone who handles money issued by the nation state also needs to be prepared to give some of it back to the nation state, after all its a service performed, work done with the printing of money, people working on spreadsheats and calculatons how much money is circulating how ... the whole money administration circle also needs some funds ... how ever ... the most intelligent way out of that is to use a complementary currency which can be basicly anything on what people agree to use as an equivalent for servcies performed and to faciliate the valued exchange of goods between them)
even if i would lead the most humble and modest lifestyle, would reduce my carbon footprint to a minimum ... there would still be the longing for every other human soul to be free too from the prison the oligarch global society has built
no one is free untill all are free

https://www.facebook.com/mayloveheal/posts/4765087950181663
12th october 2021

one can very well compost ones own feces and urine in ones own garden to fertilize ones vegetables with it ... there is no necessity for sewage being piped transported
road maintanance can be paid by those who use it, on a pay as one uses it basis
school is a service those can pay for who like to enjoy that service,

compulsory education is a violation of the mind and as such i would recommend every fellow human being to choose freely what if anything one wants to learn and learn it in ones own time ... no need to pay a teachers salaries or build so extensive school facilities ... children meeting at each others home in turns too can be a way of replacing the not necessity of wanting to have them huge school buildings
welfare would not be a necessity if every human being would be given fair acess to mother earth ... i propose 1000 square meters of fertile soil be given to every human being as a free lease for a lifetime, no taxes asked, no rent demanded .... so that the human individual being can build its own house and grow its own vegetables, so that it never needs to ask anyone for a job or an appartment to rent
i see the future as a mix of donation and pay as one uses service basis ... the ones who have excessive amounts of surplus money hoarded ... would perhaps come out by themselves and want to repair some of the damage their ancestors have done when they abducted 11 million african people to the americas ...
my guess is that worldwide there is about one third of all private and public financial wealth what has been created on top of the suffering of people who have been unfairly treated under feudal and or colonial opressive rule
while i do not support the nation state or the region state taxing the rich to abuse the money to buy more weapons and buy more needles to poison more innocent children with stupid dangerous chemicals what are not vaccines but genetic experimental therapies ...
while i do not support reparations being paid out of tax payers money i do support people continuing to talk about the attrocities done during feudal and colonial empires rules and how ancestors of european people have done so much damage to many cultures on many continents ... damage so extensive that still today most of extreme poverty and violent conflicts can be traced back to the feudal colonial invasions what deeply disturbed the tribal local balances
i do support the shaming of them who sit on billions and all they can think of how they finish building their space rockets so they can pack in the tonnes of gold and diamonds they have collectivly ... the "global elite" ... have hoarded during their intergenerational looting-earth-project ... since the roman empire ... 2000 years now more or less

and i do believe that one day the public will see their space tourism, the silly stupid plans to colonise moon and mars, to mine asteroids ... for what they are:
escapism
the very same tactics they did to the poor downtrodden irish and scottish people 200 years ago .. first the english stole their land, then they demanded rent for its use, and when the people could not pay the rent they offered them a job as sailor, soldier, slave driver in the extension project of the european empires widening their terror regime over all the globe
first the english invaders did cut all the irish and scottish forests to build ships of the trees to steal the gold from the spanish which before have stolen it from the indigenous people of south america
and when it was time for the english society to do its first industrial production of wool based clothes ... sheeps became more interesting for the english businessmen than farm workers ... so they replaced the poor farmers with sheep and shipped the impoverished cheated and unfairly treated irish and scottish off to the americas
the same thing they plan to do now ... they are now preparing their spaceships to load into them the tonnes and tonnes of gold, diamonds and saphires plus some super exotic laser guns and stuff their scientist were able to build ... get it all ready to fly away from earth and move onto the next ... gut-the-planet .. victim which they have chosen moon, mars, the asteroids ...
and by them i mean single human beings who own billions
they have not one moment thought about wether we the people would agree with that stupid continuation of colonial invasion mentality ... possibly creating heavy damage on moon and mars just by landing there
and all this stupidity they sell to us as ... oh we need to save humanity from eventual climate change and nuclear war self destruction ...
while excatly these billions they invest into their escape cameauflaged as saving the human gene pool into space .... these bilions they invest into space escapism they could invest into the remediation of the reasons why possibly the climate is changing and why people are possibly attacking each other
ecological balance and intergenerational social trauma healing can

happen quickly once enough mental emotional and also yes .. material financial energy is invested into it
we are very lucky with the internet still not fully censored upto now
we have abilities to learn so quickly these days from each other, its truly fantastic
its really up to us which future we want ... the dysopian one which the chemical cocktail needle pushers want to coerse us into or the paradise one we can build first in our head and then slowly slowy bring it out into the open to share with others
https://www.reddit.com/r/conspiracy/comments/q61wbi/comment/hgbdlr9/?utm_source=share&utm_medium=web2x&context=3

https://www.facebook.com/mayloveheal/posts/4744920152198443
6th october 2021
the human being would be wise to seek a harmonious cooperation with its fellow human beings to heal the several thousand of years of social abuse we have inherited in intergenerational traumatic memories, some of which might be deep inside our physical cells
the momentanous oligarchy game where so much damage to human beings animal beings and all the planetary pollution happens... is a distraction, it leads us the wrong path down into hoarding stuff, relying onto laboratory made substances, barricading ouselves in artificial controlled rooms where we seek artificial stimulans
the fixation onto screens is a serious problem not only for the eyes ...
the way out of that silly trap could be a life near the earth, a future where we human beings allow each other the direct acess to mother earth to sustain ourselves
one of the greatest source of strength comes from never needing to grovel before a fellow human being, never needing to ask a fellow human being for a job or an appartement to rent or ask for social welfare assistance
1000 square meters of fertile soil for every human being alive to be used for a whole lifetime, no taxes demanded, no rent demanded given as a free of cost lease for lifetime
via the local sovereign community

which would best be governed by the full assembly of all children, youth and adult permanent residents who create the full law, all rules made by every permanent resident acknowledging each others same weighted voting power
a life without machines is possible, a life without electricity has many advantages
and from such a decentralised foundation where no one human being is the boss of another one ...
we could eventually start the evolutionairy advancement again... sort of learn to use our bodies again and perhaps even learn some stuff like photosynthesis from plants ... rebuild our bones to be light like birds grow wings and feathers to fly without machines... grow gilles like fishes to live underwater without being encaged in a submarine
there are people who believe that the human being can live from prana or aether ... stardust... the cosmic energy floating abundantly everywhere
https://www.breatharianworld.com/en/category/breatharians/
allows an insight into that philosophy what also sees death as a mere malfunction, as a self sabotaging of a perfect rejuvenating system with damaging belief systems and self poisoning behaviours
i am addicted to food sexuality and smoking tabacco... i am nowhere near an emotional mental freedom what would allow me to sit naked under a tree and breathe in the cosmic nourishment untill i would be so free of all worldly depression that i could float away and in my way to the upper layers of the atmosphere could download or activate that shapeshifting key to my bodies cells what would allow me to live even outside of the atmosphere ..needing not oxygen nor air but ...
i dont know exactly how it could be ...
i do not know how exactly i could convince myself that i do not need to kill an apple or a walnut ... that i do not need to fill my stomach with fellow plant bodies
but i know i want it
i want that life where i am not dependant onto a human society what demands of me to wear clothes or speak words
i want that life where i am not dependant on clothes and a shelter against cold or hot weather
i want a life where i do not need to think about how many kilos of

apples and walnuts i have to get trough the winter
i want to fly naked in the air, breath with gilles underwater and learn to use the cosmic radiation of my father sun in near earth outer space without needing protection from a spaceship or a spacesuit
i want to be free from having to eat
since more than 20 years i have dreamed of this evolutionairy leaps
several times i thought i would have found glimpses how to get there
archive.org/details/8ascendedreamlines
has several of surely worth of investigating approaches
my latest art project of what i have some preparatory materials shared at
archive.org/details/preparativos
has this speculative element in it
that we could eventually similar like
e.chlorotica
and the firesalamander learn how to be a host of alive microalgae which would nourish us with their metabolical excretions
or similar like the lichen could learn how to allow photosynthesis active microalgae and or other microorganism to live in our hairs and on our skin
so we would need no clothes and the littlest of mother earth children would translate our all father suns rays into biochemical liquids our skin could accept as nourishment
i have not the slightest idea if any of what i believe so deeply in it... if i will be able to test out any of it in my life or not
but i know that
to pray to a syringe with chemicals filled mixed up by another human being... this is a horror show
we are being abducted into despotism by a corrupted group of governemental employees what are conspiring on a global level to brainwash every human into believing that it would be acceptable of governemental employees to abuse emergency law powers now for more than 18 months in a row
i do not give consent to me being hindered to exercise my freedom to move, my freedom to assemble/gather with whomever i want in whatever number ... inside or outside...
masks are dangerous

it is unhealty to inhale air again what one has just exhaled
i do not agree with the world health organisation
declaring the coronavirus an enemy of humanity
i live in harmony with all virus and bacteria mother nature sends my way
the coronavirus is my friend
no one human being has any moral ethical ground to make me show them my genom, give them a part of my body for their stupid testing illusion
i will never touch that mark of the monster what is perhaps the covid certificate
but i recently found out that their whole control matrix has allready begun the moment my birth certificate got filed in that birth registry in the town st.gallen where i was born on 18th of december 1975
very well possible that i became a target of the nation state switzerland at this very moment
conclusion here is
everyone wearing a proof of identity might possibly allready be wearing the mark of the monster
a life free of the influence of the anti of good...
is a life without birth certificate and without land property title documents
nothing is truly mine
my body belongs to all them animals i ate and all the plants who sacrificed their lifes for my taste enjoyment
my body is a loan given to me out of the meeting of my father sun warming the body of my mother earth
i own nothing and i am happy with that

i am earthchild - a child of mother earth and father sun
https://youtu.be/p_1DTw-56Sg
i call you who is tired of complying with others demanding proof of identity, be earthchild too
no one is free untill all are free
we may overcome the empires control matrix

perhaps i need to say also ... i am living a very avarage life, i rent an appartement, receive a pension of an insurance as i am mentally unable to comply with other people telling me what to do ... i hate them bosses....
i dont know if i ever will have the courage to tell a police officer who asks me for my proof of identity card... i am earthchild ... or if i will carry that wretched piece of plastic with me all my life ... speaking of wearing the mark of the monster
as long as we allow birth certificates to be the pillar for the control matrix ... we will allways be vulnerable to the attacks of the monster
that covid certificate discrimination stuff is such an attack of the monster
this is not about me, her or him
a single individual might be a coward or a hero ... it does not matter a bit
all what counts is the liberation of the mind

altough i do not know when or how exactly or even whom will receive the calling to stand in front of the empire and demand the children of earth be released from the nation state s control matrix... but i know it is a moment so pure and good and wholesome it is a blessing to even think about it
imagine it
dream it and it will come
build it in yourself and the multiverse will do anything to make it come true

https://www.reddit.com/r/earthchild/comments/pxrmex/comment/hepi8rk/?utm_source=share&utm_medium=web2x&context=3
also i have not the faintest idea who will receive the calling and stand

there physically looking the servant of the nation state into its eyes and demand... let us children of the earth go ... we want free of tax free of rental demands acess to 1000 sqm of fertile soil each one individual person ... we want the nation state to retreat from that space for the children of earth

or wether that might happen completly otherwise... via citizen referendum people initiatives signatures collected under law change proposals leading to votes given for or against it at the ballot

it is all about this one moment transcending space and time where a group of people come together to demand the political structure to be relaxed so far that both lifestyles... the bossy booty one top down domination one as also the flower power circle of equals one ... that both styles might be available to every human being to choose freely from also if necessary switch back and forth untill one would have collected enough personal experiences in one or both worlds

i feel like that the very thought about it purifies the soul... like a ray of purple light with some pinky orange undertones...

dream it and it may come build it inside of you and the multiverse might do anything to make it come true

5th october 2021

compulsory education is mental abuse
no one human being has any moral ethical ground to demand of an other human being anything
the dignity of a human beings life receives protection in an environment where all human beings at all times are free to choose with whom they want to be doing what sort of acivity
my body my choice
my mind my choice

wether i am 3 years old or 60
i want to choose what to eat or not,
what clothes to wear or not
to whom i want to listen to or not
what sort of books i want to read or not

https://www.reddit.com/r/earthchild/comments/pxpwv5/my_name_shall_be_earthchild_i_call_you_who_is/

29th september 2021

my name shall be earthchild - i call you who is tired of showing proof of identity, be earthchild too
from this moment onwards i shall think of myself as a child of the earth, free to roam this planet whenever wherever i want
i am tired of complying with other people demanding of me to show proof of identity based on birth certificate, being measured and weighted by others who have no moral ethical ground to do so
my mother earth knows me, my father sun knows me
i need not provide to anyone proof of who i am
i call you, i invite you who too is tired of complying with the control matrix others have created to keep each other in limitation, keep each other emprisoned
i call you, be eartchild too
and together in one name we will challenge them control clowns, we will stand in front of the empire and demand of them nation states and regional states to let us go, let go of them birth certificates with what they hold onto us, let us be able to create our own earthchild space where no one asks anyone for papers except maybe for rolling papers ...
we will stand before them regional and nation states and challenge their

assertion of ownership over all lands
let go of the body of our mother earth
let the land be free for the children of earth to be free too
---
this is a somewhat emotional approach to describe that moment when a human being sees trough it all, understands how this covid-certificate/ vaxpass they push now is nothing but an extension of a control matrix what is perhaps about 2000 years old ... the roman empire demanded of all citizens of judaea to travel to their place of birth to get registered, probably to have statistical precision when speculating how much taxes would be able to get coersed out of the oppressed area of judaea
it is wrong of a group of human beings banding together in form of a nation state, to demand of a father and a mother to give a name to the newborn child, to give date and place of birth towards this nation state and or its dominated local community birth registry office
it is the very first and most drastic attempt of the nation state to exercise the threat of violence applied against the individual human being ... what happens to a mother and a father who do not name the child as they want to child to give itself its name, a mother and a father who do not deliver date of birth and place of birth information towards the nearest nation state branch of birth registry ... the parents get a fine and if the fine is not paid they get violently abducted encaged into a prison cell, the child abducted too being given to a foster home
our all very existance in this global grid of nation states locking each other in each steps like clockwork ... our all not being abducted into a prison cell ... i am shy to call it freedom as it is no freedom ... our all existance within this nation state society is based upon this first and most drastic step of compliance ... to identify oneself with the name the nation state has demanded of ones father and mother to give, to identify oneself along name plus date of birth plus place of birth
this birth certificate is the price of a life outside of a prison cell or a mental clinic
perhaps i am exagerating ... perhaps its all not that drastic
but i know for sure
no one human being has any moral ethical ground to demand of another human being to know its name, place of birth, date of birth and who is ones father or mother

no one human being has any moral ethical ground to demand proof of identity of another human being
no one human being has any moral ethical ground to block another human beings path
free migration for all human beings, to roam free everywhere on earth would be the wish of an earthchild
a human being knowing its mother is earth, its father is the sun
---
i do propose to my fellow human being sympathetic towards such a free existance where we will answer no ones demand the sort of ... show me your papers
i do propose to us to envision a future, one that might start very soon, perhaps has allready began with everyone who has given up carrying proof of identity papers
a future where we stand in front of the nation state
demanding some land be given to everyone human being who identifies itself as not a member of this or that nation state but recognizes itself as a free child of mother earth
---
since joseph and mary carrying unborn jesus under her heart were harassed by the roman empire to travel to bethlehem, every citizen of judaea asked to let itself get registered at its place of birth ...
mary risking both her life and that of unborn jesus... to comply with the empire demanding proof of obedience ... demanding the individual human being pinned down into birth registry for the purpose of tax demand calculation
since about 2000 years have we human beings been limiting each others freedom of movement via paying taxes to these controll fanatics demanding to see proof of identity when crossing this fictional border
what is the border of a nation state
in nature while an animal does not allow a competing for the same limited available food source rival to settle in the area it perceives as his territory
it will not block an other animals free passage
i ask us fellow human beings to look deeper into how our compliance with showing our proof of identity papers based on birth certificate... has been encouraging them control clowns to believe we have

accepted their artificial setup who would be allowed to cross which imaginary border
i ask us all human beings to help with imagining a future where we do not pay taxes and do not pay salaries of people blocking the path of others
a future where no one demands ... show me your proof of identitybut we all know that we are free children of mother earth and father sunfree to move at all times where we please ourselves to do so
---
the sickness what plagues this planet is the control matrix and i find it to be my calling to assist my fellow human beings to understand how our all or most of us compliance with birth registry based proof of identity allows the empire to rule ...
via international law frameworks built into nation states law via corrupt representatives
or perhaps not so corrupt
as the very majority of human beings so it seems to me ... is going along with that proof of identity control matrix
what i am also saying here is that while the extension of the existing control matrix onto body specific data... covid-antibodies/proof of covid-vaccine at this moment.. anything else in the future
while that extension is up to us to not support
while it is up to everyone of us to not touch that covid certificate / vaxpass
there is a deeper issue with the whole accepting of the nation state selecting who is allowed entry and who is denied entry
no one is free untill all are free
free planetary movement for every human being
seems to be the goal to aspire
to reject the nation states violent demand for taxes
to reject the nation states employment of gun wearing police and army personell denying people free passage
---
i am not opposing people creating a global matrix of birth certificate based proof of identity plus this or that chemical streamlining too demanded to become member of an exclusive global club...
i respect someones home being run like the one at home in that house

is comfortable
but i do not respect vast areas of land being occupied by these control addicts
i am opposing that control matrix what some people feel necessary for their own comfort zone pampered
i am opposing that global control matrix of ... show me your papers...
being automaticly extended to every newborn human being
i am asking us all human beings to give each other a free choice
wether we want to be members of the nation state
or wether we do not want to accept the set of rights and duties
what this particular nation state is made of...
this one state what occupies the newborns body moments after its birth by demanding of its father and mother to provide the combination of personalised name, place of birth and father and mothers identity
---
a human being no matter where it is born no matter who its parents are would best be given a choice
wether it wants to be member of a nation state with all its rights and duties
or if it chooses to be a free child of mother earth
and if it chooses not to be a member of the nation state in what area its born into
that the people ... the members of that nation state would have the decency not to occupy all of the land in that area with their control matrix obsession /nation state organisation
i am basicly proposing areas everywhere on the globe what the nation states would voluntarily retreat from and respect to become sort of "space for the free children of earth"
possible to imagine that the existing land area of the nation state would be divided trough the number of all human beings living in that area at this very moment
what would give so and so many square meters of fertile land to each human being
and from there on the size of the nation state would change according to how many people would want to exit from it
for example in switzerland where i live we use about 10 000 million square meters for agriculture

at this moment about 8.4 million human beings live in switzerland
given room for more immigration / refugees welcome, if i assume a future size of population in this area of 10 million human beings everyone could have 1000 square meters of fertile land to build its own house on it and grow its own vegan foodstuff on that piece of land
very well possible also to imagine how local
"spaces for the free children of the earth"
would similar to the international frameworks the nation states band/ bind each other with together ... the multiple "free spaces" on each continent would have some mutual free passage agreements therefore allowing everyone not wanting to be member of any nation state to freely travel the globe along them free spaces eventually connected to each other seamlessly as to have no border crossing with the ... proof of identity ... nation state spaces
---
i have been preparing this path now for many years and i am firm knowing of it being a path of decency, nonviolence and humbleness
its similar to moses when he stood before the pharao and said ...
"let my people go"
but this time the name is not moses but earthchild and we will be many...
---
time will come when more people will understand that the nation state structure requires more flexibility to cater to the needs of those who do not want to be bound by a nation state what has never asked anyone for consent about wanting to be member or not
i have also prepared proposals how to reform the very state constitutions of both regional and nation states everywhere on earth
proposals such as
---
the local community (village/town/city-district) is its own political absolute sovereign it inherits all political decision powers both from the regional and the nation state
the local sovereign community creates, maintains and interpretes the full law, all rules valid on its territory inviting all permanent residents to participate in all decision finding processes
all children, youth and adult permanent residents acknowledge each

others same weighted political voting power
all local sovereign communities receive a fair share of all public wealth of both regional and nation state, the size of the share proportional to the number of permanent resident of a local sovereign community
each local sovereign community at all times without conditions is able to exit/quit/leave both regional and nation state
---
of course the very big question here is ... how to free that land from private ownership what could be given to the "free children of the earth"
in switzerland the 26 regional states called cantons own about 55 percent of the bank what issues the swiss franc... this a little more than half of the swiss national bank is worth about 300 billion swiss francs we the 5 million human beings declared eligibile to vote in switzerland could decide to use that public wealth to for example offer private land owners a market avarage prize to buy it off them ... for 10 000 million square meters it would be a sum of about 100 billion swiss francs

https://www.reddit.com/r/conspiracy/comments/pxd66s/most_everyone_of_us_is_corrupt_that_is_why_we/
https://www.facebook.com/mayloveheal/posts/4722446774445781
28th september 2021

most everyone of us is corrupt - that is why we keep on electing corrupt politicians into law making assemblies
most everyone i know or can think of has accepted the nation state to asess dominion over the individual personal sovereign human being via the birth certificate and its consequent issuing of identity proofing papers/electronic data sets ... everytime a modern human being shows its id papers to any bank employee for opening an account, shows its identification badge to this or that gun wearing mercenary of the nation state calling themselves police or army personell for example to cross an imaginary border called nation state border ...
everytime someone uses any document what is based upon the birth certificate, one participates in a deeply flawed social structure

because
i have never asked anyone to give testimony to my birth ... i have never given anyone permission to make a database entry in a nation state register of birth database and i have also not given permission to the local community where i was born 46 years ago to pin me down with name and date of birth in their local birth registry
but still, altough i do not agree with the nation state trying to assert control over my body via the birth certificate and via issuiing a identity proofing paper which i am requested to show when using services in society, when travelling the globe
altough i do not agree with their control matrix, i am an owner of an identity proofing plastic card and i have used it whenever the nation state has demanded ... show me your papers ... or any of the services i wanted to use too were asking me for proof of identity
my theory is therefore ... that everyone who is using proof of identity papers based on birth certificate to interact with the nation state ... has accepted the nation states dominance over ones personal individual sovereignity therefore some of that proud independance one feels like ... i am a free child of mother earth ... no one owns me ... all my allegiance is with mother earth and father sun ...
some of that most powerfull independant inner knowing ... everytime gets a hit, gets some attack whenever the human being uses that proof of identiy to interact with those who demand proof of identity
and this is the deep corruption what most everyone is participating in except perhaps those who dont own house or land, dont rent appartements, dont have a bank account and never show any papers to no one as they carefully watch themselves not getting into any contact with such controll state agents
this is the most important part actually
the second part is mainly ... once one feels ashamed of oneself to give in to something one knows is not right, its not right of that nation state to want to limit my travelling via these proof of identity papers ... its not right of that nation state to demand taxes of me just because i am born in an area what this nation state occupies ... i do challenge the idea that the nation state owns the territory its occupying ... i have never agreed to be member of this or that nation state and i would rather prefer to remain a free child of mother earth able to travel the globe freely at all

times if the nation state would release me out of its grip
oh i slipped away from it again ... the second part of my argumentation is mainly, because most everyone accepts this proof of identity stupidity, this dangerous deal with the nation state to accept that attempted assertion of ownership of ones body with the birth certificate ... because one accepts this, one gets corrupted, one acts not according to ones highest ideals ... and that then opens the door wide to any sort of choice to support other peoples corrupt way of doing things not in the proper way
as a consequence of all this ... i would like to encourage us all to try to envision a future where we get rid of that nation state thing asking every father and mother to register name and birth date of a child at the local birth registry ... a future where a human being can choose its name at all times itself and any membership with nation states or regional states or local communities can be chosen ... a future where no one human being tries to control another fellow human being, wether it be from a religious or a political regional and or nation state background
a future where we do not ask each other for proof of idenity because we can see that we are all children of mother earth and father sun, a future where no one would be so silly as to issue a title on land to another one as we all know that mother earth belongs to herself an no human being ever has is or will be owning her, a future where we interact with each other knowing
we all own nothing and its good like that
